

a way as to prevent personal illness and social catastrophe.

I am interested in your statement that at least one Province in Canada had already expressed a desire for scientific assistance in this direction. This is a matter worth developing. I am so confident that co-operation with State governments is an important element in any mental hygiene program that I am sure some means will be found within a few years for putting it into effect.

It has been a great pleasure to me personally to work with you and your associates in these programs of mental hygiene in Canada. We are honored that this Foundation has been able officially to co-operate in certain aspects of this work.

Please accept my best wishes for the continued prosperity of your enterprises.

Very truly yours,

(Signed) Edwin Embree

Vice-President.
