DYING FROM GALL-STONES Trade Pact With Philippines Is Suggested by Dr.

Doctors Said Only an Operation Could Save His Life—"Fruit-a-tives" Enabled Him to Pass Nearly 200 Gall-Stones.

J. B. HARDING, Esq

46 Grove Ave., Toronto, Ont., Jan. 10th, 1913.

"I suffered untold agony from GALL-STONES for the past three years and tried many doctors without getting relief. I also paid \$5.00 for one bottle of medicine which was useless. At times the pain from these gall-stones was so great that I lost consciousness, and my condition was desperate. I was quite satisfied that I was dying and the doctors said I must be operated upon

"During one of these very severe, acute attacks, I was given some 'FRUIT-A-TIVES,' and after taking a short treatment of this remedy, I passed gall-stones over an inch in length, and as many as one hundred and fifty or two hundred in number. 'FRUIT-A-TIVES' was the only thing that would relieve my pain. They are the greatest medicine in the world, and if there is anyone in Canada, or anywhere else, that suffers from gall-stones, I say, 'Let them take 'Fruit-a-tives' and be cured.'

"If this testimonial will further the good work of 'Fruit-a-tives,' publish it with my full authority."

J. B. HARDING.

Are you wondering how "Fruit-a-tives"—a medicine made from fruit juices, can cure Gall-stones? We will teil you. The Gall bladder is the reservoir for holding the Gall, or bile, secreted by the liver. If there is insufficient bile, then the bile in the Gall bladder is thick and easily forms stones. When the liver is weak, it secretes very little bile and then the Gall bladder is partially filled with a thick, jelly-like mass of bile and thus forms into lumps or stones. "Fruit-a-tives" stimulates the liver to secrete more bile, and this increased bile softens the Gall-stones and by overfilling the Gall bladder, forces the passage of the stones through the Gall duct. the Gall bladder, forces the passage of the stones through the Gall ductand thus cures the disease.

"Fruit-a-tives" is the only medicine in the world made of fruit juices. By a wonderful process, the medicinal properties of certain fruits are greatly intensified—then valuable tonics and antiseptics are added and the whole made into the pleasant tasting tablets known in every section of Canada as "Fruit-a-tives.

CANADA NEGLECTS A WIDE MARKET

IS REVISITING TORONTO

Has Lived in Land of Copra For Fourteen

A great opportunity for Canada to secure as a market for her products a country whose population is of equal size to her own, and the splendid chance the Dominion has of obtaining raw materials for manufacture and many articles of food at a greatly reduced figure and in much larger quantitles, is told in a striking way by a former Toronto boy, who left here in 1898 for the Philippine Islands to join the medical staff of the U. S. Army. and who after passing thru the stirring days there until 1902, became identified with the U. S. Government Bureau of Agriculture in the Philippines.

He is Dr. William Robert Llewellyn Best. He was born in Pickering Township and is the son of James Best, an Uxbridge farmer. Graduating from Uxbridge High School he became a student at the Ontario Veterinary College at Toronto, and immediately on obtaining his degree left to become a member of the staff of veterinaries with the U. S. Army in the Philippine

war.

After a continuous residence of about 14 years on the islands, he returns to Toronto for a brief visit to relatives here. Roy C. Best, C. P. R. accountant at Toronto, is a brother. Two other brothers are in Saskatchewan. He has five married sisters residing in Toronto. Accompanying him is his wife, who joined him in the Philippines at the conclusion of the war and who returns after ten years absence.

in the semi-tropics, and despite the excessively warm weather of the past few days, looked cool and comfortable. The suggestion that it was uncomfortably hot in Toronto at present caused them to smile. They are used to an average all year round temperature of from 90 to 95 degrees. "We are just in our element in this temperature and if the weather was cooler we would not feel warm enough," remarked Dr. Best. "I have worked hardest at times when the temperature was over the 100 degree mark."

Bathing a Daring Feat.

The doctor stated that the warm

weather on the islands rendered it ne-cessary to take a daily plunge. And most of the time this was taken in waters infested with crocodiles and alligators. The largest snakes to be found anywhere are prevalent on these islands and pythons and bea constric-tors are numerous. The doctor said he reniembered on one occasion hav-ing helped to kill a boa constrictor that measured more than 27 feet in length.

that measured more than 27 feet in length.

The many changes that had taken place in Torento since Dr. Best left here fourteen years ago he described as truly remarkable. One of the principal changes was in the number of motor cars to be seen in the streets, and it was this that brought to his mind a great opportunity that is being neglected by Canadian manufacturers. About thirty-live different makes and more than ten thousand American motor cars are being used in the Philippines, and this mode of traveling is steadily growing with a constantly increasing demand for cars. Despite this fact, however, not one Canadian manufactured motor car is to be found on the islands.

this fact, however, not one Canadian manufactured motor car is to be found on the islands.

Canada's Opportunity.

A thoro knowledge of conditions in the Philippine Islands had convinced him that one of the greatest chances which a young and growing country could wish to have was before the Dominion of Canada right now.

That chance lay in a reciprocal trade agreement between the two countries. The main reason the Canadian manufactured motor cars were not largely sold in the Philippines was because of the duty levied against them in comparison with the U. S. car. Many thousands of bushels of wheat in the form of flour were, imported into the Philippines annually, and the demand there for this product was growing very fast. Here again with a trade arrangement between them would be a splendid outlet for a Canadian product and in fact there would be a demand for all Canadian products and manufactures.

A great advantage could be abtain. The young man was instantly taken from the ranks, and at the conclusion of the parade was court-martialed and discharged from the regiment. The rest of the regiment immediately rerigned.

The officers of the regiment held a consultation and the man was later reinstated, owing to the fact that the bugle band are to take a prominent part in the parade in honor of 600 delegates of the real estate board today.

for all Canadian products and manufactures.

A great advantage could be obtained by Canada getting the raw material from the Philippines. The rubber industry is pursued on a very large scale there, but the commodity is shipped out in its raw snape. It is obtained in buckets after tapping the rubber trees and in the same buckets is shipped away. Why not let this rubber into Canada duty free and ship it back in the form of automobile thres, he suggested Canada could obtain abundant supplies of the finest fruit from the islands.

supplies of the finest fruit from the islands.

Other big crops, the products of which would be in demand here, include the hemp crop. This had increased more than fifty per cent, under American occupation. Copra, or the dried meat from the cocoanut, which is now shipped in large quantities to Europe for and from which the oil for soaps, etc. is obtained, has increased the near the company of the first tobacco grown was to be found there, but strange to relate it could not be obtained in Canada.

For the picwing and harvesting of these crops a large number of agricultural implements were required, and it was here again the opportunity for the Canadian manufacturer could be found. Canadian apples would also find a ready market.

MACKAY'S MAJORITY 200.

EDMONTON. Alta. Aug. 1—When the polls at Fort McMurray and Fort Vermillion have been heard from Hon. A. G. MacKay, members elect for Athabasca. Will have a majority over Major Woods, defeated Conservative candidate, of about 200 votes. There were twelve polls in the constituency, and ten that have come in give MacKay a majority of 115 votes. In every poll hermas a majority of from 10 to 17.

ment.

The next few days will be given over to tactical instruction and shooting practice under camp discipline. It is expected that about 150 men of the regiment will leave with the main body today.

TORONTO WOMAN INJURED IN WRECK

Mrs. Heaslip of Kendal Avenue Suffered in Thousand Island Railway Collision.

KINGSTON, Aug. 1.—(Can. Press.)

—A Grand Trunk freight train and a passenger train on the Thousand Island Railway collided near Gananoque this morning and one of the passengers, Mrs. W. T. Heaslip of 27 Kendali avenue, Toronto, was badly injured. Several ribs were broken. She was on her way home from Toronto after visiting at Tremont Park. The freight was backing up and as the accident occurred on a curve the engineer on the passenger train did not have time to stop his train, Henry Abrahams of Gananoque was the engineer and he jumped and saved his life. The fireman, Henry Case, Gananoque, also jumped, but was badly injured. All the injured, it is expected, will recover. The engine was knocked off the track. Sheriff McCamer of Brockville was one of the many passengers who suffered a severe shaking up.

PREMIER BACK IN OTTAWA.

OTTAWA, Ont. Aug. 1.—Premier and Mrs. Borden arrived in the capital at noon today from St. Andrew's. They were met at the station by Hon. Messrs. Perley and Kemp and conveyed by auto to the premier's residence. The Premier stated that he expected to be in the capital for several days and has not yet definitely decided upon his holiday program thereafter. He stated this morning that a cabinet council had not been fixed for today, but that he and his colleagues would meet tomorrow to discuss a number of questions awaiting disposal. The premier appeared to be in fairly good health when he arrived this morning. OTTAWA, Ont., Aug. 1 .- Premier an

Trimmings to Adorn a Cake

Much of the joy of cake making comes in the icing. Having provided a delectable foundamay be tried. For the cake part itself there must be rigid adherence to rule, but upon the icing you may exercise your ingenuity. Once having acquired the basic idea explained here, you may work out many variations, especially along the line of decoration. There is opportunity for really artistic work that will delight the creative spirit.

work that will delight the creative spirit.

There is endiess variety possible in the flavoring. One need only be careful to have it blend well with the cake itself. For instance, a banana icing that would be delicious on an orange cake would ruin a chocolate dainty food. One must adapt the ornament to the foundation. Nuts and fruits, both fresh and candied, aid not only in flavoring, but in schemes of decoration that will give each cake a distinction of its own.

PRESS CRITICIZES **ENGLISH GIRLS**

English Press Filled With Condemnations - Young Women Have Champions.

ARE BLASE AND BORED

Fury of Controversy Is Only Equaled by Its Fu-

pecial Cable to The World. Copyrighte by The Toronto World and N. Y. World. LONDON, Aug. 1 .- Criticism of the young English woman of today is epidemic in the London press. Her lack of manners, of charm and grace, her mannishness, her brainlessness - in fact, everything about here is held up

This is an unusual manifestation, and undoubtedly is due to a reaction from the suffragette movement. Singularly enough, the "flapper," as the young girl just before getting into long frocks is called, comes in for the severest censure for her repellant, saucy precocity, and her brazen attempts to divert young

men's attention from her elders. Old-fashioned people wonder what sort of woman she will be since she is growing blase and bored before she even puts her hair up.

The athletic craze among girls is also condemned. The golf girl, who is delighted with herself in her woolen blazer, her tight dress almost up to her knees, is pronounced by Gen. Hildrich, a well-known connoisseur of dames, as ungraceful, untidy and unattractive. Then the mother are scolded for los-

ing control of authority in their efforts to appear as young as their daughters. But the women of today are not without their champions, who compare them favorably with the mid-Victorias mothers, with their hysterics, false blushes and pretended prudery and in-
