

- Hip-joint, injuries of the—secondary
suture of 345
treatment of 344-6
- Hiss's serum water 74
- Horse serum 76
- Hughes—adjustable splint for humerus
442
- Easton splint 440
- Humerus, fractures of the—337
complications of 339
splints for 441-3
supinator and case for 444
treatment of 440-6
- Huts, nursing in 326
- Hydrogen peroxide in cleaning wounds
276-278
atmosphere in culture of anaerobe
78
- Hygiene, personal, and care of soldiers
217-52
- Hyperemic stage of wounds 440
- Hyperemic saline 278
- Hypochlorites, action of upon leucocytes
224; see Dakin's solution
- Impetigo 241
- Incised wounds 15-16
- Incision of wounds, importance of 24
- Incontinence in malaria 269
- Infection of wounds—general reaction
against 130
—as a cause of secondary haemorrhage
177
in gas gangrene 150
type of 136
see Sterilisation. Wounds. Carrel-
Eakin treatment, etc.
- Inflammation of connective tissue—due
to enterococci 40
due to pneumococci, etc.
18-54
due to staphylococci 42
due to streptococci 44-5
syphilis, favoured by 46-8
see Local infection
- Innate bone injuries to the
411-15
osteotomy in connection with
415
complications of 413-17
genitalia and buttocks involv-
ing the 413-14
treatment of 415-16
- Instillation of antiseptic—see Carrel-
Eakin treatment
- Intensified shock 88
- Interosseous arteries, haemorrhage from
the 184-5
- Intestine, protrusion of in perforating
wounds 12-27
suturing of the 303-302-3
see Gut, Colon
- Intramuscular administration of quin-
ine 182
- Iodoform in compound fractures, applica-
tions to 235
- Iodophil reaction, Bond's 105-6
- Irrigation of wounds early in the war
270
- Joint—(1) anatomical considerations 330
avulsion of 332-3
closed 336
diarthrodial 336
dislocation of 332
infection resistance of to 333-333-45
- (2) gunshot injuries of 270-330
400
—antigenous vaccine treatment
of 332
bacteriology of 336-8
complications of 337 *et seq.*
indirect 332
nerve trunks involved in 339
penetrating 332
perforating 332
septicaemia resulting from
337-8
—suppuration in 335
- Jointed pole trench stretcher 260-2
- Jones' abduction splint 345
crab splint 383-387
splint for humerus and elbow-joint
445
- Kernig's sign in cerebral malaria 269
- Kidneys, wounds of the 500-4
- Knee-joint, gunshot injuries of the
274-346-80
—anatomical considerations of
346
—ankylosis a complication of
339
—antigenous vaccine treatment
of 332
bacteriology of 350-67
base hospital at the 369-80
battlefield on the 336
films from examination of
361-3
fluids aspirated from 358-61,
366-7
infection spread of in 421
types of 359
nature of 352
nerves involved in 339
open 356-8
operative treatment of 369
sterilisation of 384
Staphylococcus pyogenes in 352
377
suppuration in 361-376
suppurative arthritis in 377-
80
treatment and after-treat-
ment of 368-80
unbroken capsule with 364
- Kneeberry, wounds inflicted by 16
- Kilinc's methylene blue 105
- Lacerated wounds 271
difficulty of excising 272
- Lachrymatory gas 18
- Laparotomy 272
incision, infection of the 503-4-506
- Latent damage of tissue 24
- Leishman's stain 219
- Leucocytes, activity of, tested 105-6
in wound defence 101
