

- Nodal system, physiology of, 13
 tissue, 6
 Node of Tawara, 3, 4, 46, 177
 Non-hypertrophic hypertonia, 202

 Obliterative endarteritis, 67, 222
 Occlusive coronaritis, 84
 coronary angina, 84
 Œdema, seesaw, 211
 Œdème à bascule, 211
 Opium, 154, 230, 240, 248, 249
 "Opium of the heart," 236, 240
 Orthopneic position, 246
 Ossification of central fibrous body,
 32
 Oxygen gas, inhalation of, 241

 Pace-maker, 33
 Pace-making of sinu-auricular node,
 19
 Pacinian bodies, 98
 Pain, cardiac, 54
 Paludism, 67
 Paracentesis, 242
 Paroxysmal irregularity, 222
 tachycardia, 200, 213, 215
 auriculo-ventricular, 176
 ventricular tachycardia, 198
 Parry's syncope anginosa, 115
 Pars membranacea septi, 28, 32
 Pathology of cardiac pain, 59
 of nodal structures, 20
 Pelvic nerve, 53
 Pericarditis, 201
 Peripheral dysæsthesiæ, 130
 Peri-pneumonics, 96
 Phlebograms, 179
 Phlebotomy, 242
 Physiology of sinu-auricular node, 17
 Pig. nerve terminations in, 9, 11, 18,
 32
 Pilula diuretica, 253
 Pneumogastric nerve, ascending neu-
 ritis of, 70
 Pneumogastric nerves, 23
 Pneumo-hydraulic apparatus, 243
 Pneumonia, 185
 Position, effect of, 199
 orthopneic, 246
 Postural treatment, 236
 Posture, 242
 Potassium, iodide of, 152
 Præcordial thoracostomy, 233
 Primitive cardiac tube, 26
 Prognosis of cardiac motion, 210
 Proliferative arteritis, 67
 Pseudo-angina, 97, 98
 Psychological factor, 229
 Purgation, 246

 Rat. central fibrous body in, 32
 Renal colic, 54

 Reptilia, cardiac action in, 1, 33, 45
 Rest, 228
 Retrograde stasis, 182
 Reversible pulmonary œdema, 211
 Rhythm, cantering, 198, 212
 nodal, 177
 triple, 198
 Rhythmic tachycardial ventricular
 extrasystolia, 184
 ventricular extrasystolia, 252
 Rings of Vieussens, 23
 Rodents, 15
 Roentgen radiography, 129

 Seesaw œdema, 211
 Senile heart, 253
 Sensory disorders of the heart, 52
 Septum intermedium, 11
 primum, 12
 superius, 11, 12
 Sera, 250
 Sheep, central fibrous body in, 31, 32
 nerve, terminations in, 9
 Sihler's hæmatoxylin method, 8
 Silvester-Laborde method of artificial
 respiration, 143
 Silvester's method of artificial respira-
 tion, 143
 Sinal systoles, 177
 Sinu-auricular node, 2, 3, 4, 20, 22,
 34, 195
 innervation of, 6
 physiology of, 17
 Sinus bradycardia, 178, 185
 coronary, 13
 venosus, 14
 Sleep, 228, 229
 Sleeplessness, 229
 Sodium nitrite, 145
 Solar plexus, 39
 "Soul, spinal," 44
 "Soul, visceral," 44
 Southey's tubes, 238, 242
 Spasm, 55
 Specialism in research, 60
 Specific aortic valvular disease, 87
 "Spinal soul," 44
 Splanchnic nerves, 53
 Squill, 253
 Stasis, retrograde, 182
 Stenocardia, 92, 96
 Stimulus, adequate, 53
 production, 40
 Strophanthus, 151, 154, 237
 Strychnine, 154, 156, 239, 251
 Submucous plexus in stomach, 39
 Superior mesenteric ganglion, 39
 Suprasigmoid distension of aorta, 130
 Surgical treatment of angina pectoris,
 154
 Swedish resisted movements, 140
 Syncopal bradycardia, 188, 190
