Again, fruit flourishes in hot climates where liver, kidney and skin diseases abound—and he who lives in a hot climate and abstains from action. skin diseases abound—and he who lives in a hot climate and abstains from eating fruit will die — generally from liver disease. Why? Because fruit acts on the bowels and makes them move, acts on the liver and causes more bile to flow-which is the natural purgative—acts on the kidneys and makes them excrete more urine, acts on the skin and increases the action of the skin in throwing off impurities. Fruit purifies the blood by increasing the action of the bowels, skin and kidneys. One has to eat a lot of fruit to get the full benefit. A physician in Ottawa has discovered a method of combining the juices of apples, oranges, prunes and figs and then forcing an additional atom of bitter from the orange peels into the united juices—and this makes a stronger fruit material—many times stronger than ordinary fruit. times stronger than ordinary fruit.
