

## Harness That Merits Your Approval

**Designed with a special regard for the desires of women drivers, who delight in an elegant turn-out—as well as for men who desire something stylish and serviceable.**

Every ounce of goodness that can be obtained in a light driving harness is here for your service. Every buckle and ring, loop and strap has been selected with the purpose of making this really the one desirable harness. Of course it's Eaton-made, that's why we speak with so much assurance. It is made from pure Canadian oak-tanned leather, taken from the backs of specially chosen hides, giving uniform thickness, even texture, strong fibre, while being as pliable and soft as the live skin—stitched ten to the inch.

This harness is the result of long experience and knowledge of the requirements of horsemen. The saddle is flexible full patent leather skirts and jockey with either black or white calfskin bottom, the bearer runs from dees at the end of jockey, thus making it easy to attach the two-minute outfit for track purposes, as well as giving freer action to the bearers and thus securing less friction on the horse's back, consequently an easier harness for the horse; the blinds on bridle have aluminum plates which are much lighter than the ordinary sheet-iron plates and will not rust and rot the leather. The lines are made with beaded fronts, which, while looking very light and neat, are much stronger than the ordinary line.

We accept your order for a harness with the understanding and agreement that if you do not find that you are receiving greater value from us, a better harness in every respect than you were ever offered at the same price, you can return it at our expense and we will refund your money as cheerfully as we received it.
