

FACING BRICKS FOR HOME OR BARN

In selecting a facing brick you should be careful to see that it has a smooth surface and clean, sharp edges. You should also see that the colors are of pleasing shades and are not made with color chemicals. All these qualifications are embodied in

Interprovincial Pressed Brick

and you could not do better than to write us to-day for a set of samples, sent all charges paid, to any address for your inspection. Now is the time to haul your bricks for building next Spring and you should get your samples early. Write to-day.

Pollands, Durocs, & Berkshires Young stock at all times, both sexes, and all ages. Can also supply anything in Dorsets or Southwicks. Everything priced to sell. EGIL STOBBS, Leamington, Ont.

Questions and Answers. Miscellaneous.

Service Fee.

A certain man A had charge of a Government stallion, and after having him for a period of time found that he was of no service, so he sent word to the Government to take him back. A man was sent for the horse and all expenses paid to date. However, A kept the horse two weeks more and I bred my mare the day he was sent away. Can A collect any pay? READER.

Ans.—We believe A is entitled to the service fee he was regularly charging.

Keeping Factory Books.

Could you give us a pretty fair idea as to how cheese factory books should be made up next year, as the new Standards Dairy Act will then come into force. Tell us wherein the work would differ from this year and an idea of the method.

"A SUBSCRIBER."

Ans.—Paying according to the fat content of the milk or on the fat + 2 basis will require a little more figuring than the system of paying according to quantity. Instead of striking a rate per hundred pounds of milk the rate will have to be per pound of butter-fat. The amount of butter-fat in each patrons milk will have to be figured out and this multiplied by the price per pound of fat to determine the value of the milk.

Veterinary.

Splintered Jaw.

Mare began to salivate in October. A swelling appeared on outside of lower jaw and a small ulcer in the mouth, at root of molar tooth. The swelling broke three times, and then I had the tooth extracted. The tooth was sound. The swelling broke several times and a piece of bone came out. I have been using carbolic solution, but the wound does not heal. W. S. B.

Ans.—The jaw bone was fractured in some way. There are probably more pieces of loose bone, so it will be necessary to cut down through the tissues and remove them, then syringe out two or three times daily with a 5 per cent. solution of carbolic acid. If there be no more pieces of loose bone, the use of the carbolic lotion as above is all that is necessary. The cavity left by the removed tooth will gradually fill up. V.

Questions and Answers.

The Tillsonburg Ayrshire Sale.

This is the last call to the auction sale of Ayrshire cattle, consigned by members of the Southern Counties Ayrshire Breeders' Club, to be held at the Imperial Hotel stables, Tillsonburg, on December 28th. This is an opportunity, that should not be missed, of securing some of the great producing Ayrshires that are coming from this district. The breeders consigning stock to this sale are: W. W. Ballantyne, Stratford; Geo. Apel, Mitchell; F. H. Harris, Mt. Elgin; J. A. Morrison, Mt. Elgin; McConnell & Ferguson, London; E. B. Palmer & Son, Norwich; J. L. Stansell, Stratfordville; Jas. Begg & Son, St. Thomas; Thos. Dennis, Stratfordville; MacVicar Bros., Belmont; E. Burns Stansell, Vienna; Collier Bros., Beachville; and R. J. A. Smith, Hatchley Sta. There will be 40 females and 10 young bulls in the sale, many of the females will be cows fresh in milk or due to freshen soon after the sale. A choice lot of young bulls, most of them old enough for service, are also listed. The blood lines to be found in the Ayrshires herds of this district are among the very choicest to be found anywhere. Scotch Thistle, the present R. O. P. three-year-old Ayrshire champion and Lenore 2nd, the holder of the highest butter fat record for a two-year-old Ayrshire, were both purchased at a former club sale, and stock can be secured in the present sale closely connected to them. Stock will be found in the sale closely connected with such great producing families as the Jean Armours, Garclaugh's, Brierys and Primrose of Tanglewyls. W. W. Ballantyne, Stratford, Ont., is president of the club and John McKee, Norwich, Ont., secretary and sales manager. Send to the secretary for a sale catalogue.

Scientific Saving!

Life insurance constitutes a savings bank account with the additional feature of protection. If the life insurance depositor dies, instantly a sum equal to the savings of many years becomes available under his life insurance policy. Whereas only the deposits themselves, with interest, would be available for the relatives of a depositor in a savings bank. Banks are, of course, an absolute economic necessity, but they do not fulfil the double purpose that an insurance office accomplishes. Patient saving of \$50.00 per annum for 20 years would give a depositor \$1,000, plus interest, but if he died during the first year his family would withdraw only \$50.00. Under a Mutual Life Endowment policy maturing at the end of 20 years a deposit of \$50.00 would carry with it an indemnity of \$1,000, payable to the beneficiary if the assured died in the first or any succeeding year—and the full amount with profits is payable to the assured if living at maturity. Thus an Endowment policy in the Mutual combines SAVINGS, INVESTMENT and PROTECTION. *The Best Security one can hold is a Mutual Policy.*
