

This Wife and Mother Wishes to tell you FREE How She Stopped Her Husband's Drinking

By all Means Write to Her
and Learn how She did it.

For over 20 years James Anderson of 105 Elm Ave., Hillburn, N. Y., was a very hard drinker. His case seemed a hopeless one, but 10 years ago his wife in their own little home, gave him a simple remedy which much to her delight stopped his drinking entirely.

To make sure that the remedy was responsible for this happy result she also tried it on her brother and several of her neighbors. It was successful in every case. None of them has touched a drop of intoxicating liquor since. She now wishes everyone who has drunkenness in their homes to try this simple remedy for she feels sure that it will do as much for others as it has for her. It can be given secretly if desired, and without cost she will gladly and willingly tell you what it is. All you have to do is write her a letter asking her how she cured her husband of drinking and she will reply by return mail in a sealed envelope. As she has nothing to sell do not send her money. Simply send a letter with all confidence to Mrs. Margaret Anderson at the address given above, taking care to write your name and full address plainly.

Every reader who wishes to cure a dear one of drunkenness should take advantage of this lady's sincere offer at once.

MENTION "FARMER'S ADVOCATE."

QUESTIONS AND ANSWERS. Miscellaneous.

SOLID CEMENT AND BLOCK SILOS—BARN CAPACITY.

1. Which is the better, a cement silo, or a cement-block silo?
2. Which is the cheaper of the two?
3. Is sand or gravel best for cement silo blocks?
4. Give an estimate on the cost of a cement-block silo 30 feet high by 12 feet in diameter, the sand or gravel deducted from the cost. The silo is to have a nice, substantial roof.

Which is the larger barn, or which has the greater capacity, a barn 68 feet long and 32 feet wide, or a barn 60 feet long and 40 feet wide, both barns having same length of posts?

SUBSCRIBER.

Ans.—1. Solid cement is usually stronger, and likely to prove more durable. Cement-block silos give rather less trouble from freezing of the silage.

2. Probably solid cement.
3. Good, sharp gravel, but not too coarse. In using sand, more cement is required.

4. In the November 16th, 1911, issue of "The Farmer's Advocate," M. C. Bell, Oxford Co., Ont., gave a carefully-prepared statement of the cost of his cement-block silo, 12 feet 8 inches in diameter by 46 feet high, with roof, the total being \$409.50. From this, our correspondent can approximate how much less the outlay would be for the size he proposes.

5. The latter (60 x 40 feet) has the larger cubic capacity. Capacity above the posts will vary according to the pitch of the roof.

RUNNING AN INCUBATOR.

I have a second-hand incubator, and no instructions for running it. It is heated by a lamp underneath. Do not know what firm it is made by. Are all incubators run about the same, and could you give me the orders for running it?

SUBSCRIBER.

Ans.—All incubators are operated very much the same. If this machine is the make I think it is, the lamp rests on a wooden bracket hinged beneath the machine. The machine is heated by a galvanized-iron tank by hot air, not hot water. Put into the machine a tested thermometer, then heat the machine so that it will register 103 degrees with the bulb lying on the top of the eggs. Now tighten the regulator so that the damper lifts over the lamp about the thickness of a five-cent piece. Keep the thermometer towards the lamp-end of the machine, as this would naturally be the hottest end. If you can conveniently do so, put two or three thermometers in the machine, in different parts, and see whether it heats evenly. If it does not heat evenly, raise the cold end two or three inches, or until it does heat evenly. Keep the moisture-pan in the top of the machine filled with water the first ten days, and keep the ventilator at the far end shut, until the ninth day, when it should be gradually opened, and then have it wide open at the end of the hatch. Do not set anything but clean eggs, and wash the machine out with boiling water, or with a ten-per-cent. solution of a good disinfectant. I think you should succeed fairly well if you follow these directions. The name of the incubator should be on the front of the machine.

W. R. GRAHAM.

A "365" Day Liniment

YOU ARE SAYING TO YOURSELF—

"If I only knew of something to stop that Backache—help my Rheumatism—cure my Neuralgia, I would send and get it at once." Get It. Gombault's Caustic Balsam will give you immediate Relief. A Marvelous Human Flesh Healer and a never failing remedy for every known pain that can be relieved or cured by external applications. Thousands testify to the wonderful healing and curing powers of this great French Remedy. A Liniment that will soothe, heal and cure your every day pains, wounds and bruises.

Gombault's Caustic Balsam The Great French Remedy Will Do It

It Helps Nature to Heal and Cure. Penetrates, acts quickly, yet is perfectly harmless. Kills all Germs and prevents Blood Poison. Nothing so good known as an application for Sores, Wounds, Felons, Exterior Cancers, Burns, Carbuncles and Swellings.

"I had a bad hand with four running sores on it. The more I doctored the worse it got. I used Caustic Balsam and never needed a doctor after that." —Ed. Rosenberg, St. Ansgat, Ia.

Mrs. James McKenzie, Edina, Mo., says: "Just ten applications of Caustic Balsam relieved me of goitre. My husband also cured eczema with it, and we use it for corns, bunions, colds, sore throat and pain in the chest."

A Safe, Reliable Remedy for Sore Throat, Chest Cold, Backache, Neuralgia, Sprains, Rheumatism and Stiff Joints. Whenever and wherever a Liniment is needed Caustic Balsam has no Equal.

Dr. Higley, Whitewater, Wis., writes: "I have been using Caustic Balsam for ten years for different ailments. It has never failed me yet."

A liniment that not only heals and cures Human Flesh, but for years the accepted Standard veterinary remedy of the world.

Price, \$1.50 per bottle at all Druggists or sent by us express prepaid. Write for Free Booklet and read what others say.

THE Famous

Rayo
Lamp

The Ideal Reading Lamp

Opticians agree that the light from a good oil lamp is easier on the eyes than any other artificial light.

The Rayo Lamp is the best oil lamp made.

It gives a strong, yet soft, white light; and it never flickers. It preserves the eyesight of the young; it helps and quickens that of the old.

You can pay \$5, \$10, or \$20 for other lamps, but you cannot get better light than the low-priced Rayo gives.

Made of solid brass, nickel-plated. Easily lighted, without removing shade or chimney. Easy to clean and rewick.

Dealers everywhere; or write for descriptive circular direct to any agency of

The Queen City Oil Company, Limited

The Elastic Cultivator

On any cultivator when the front and rear teeth are fastened to the same section or tooth frame the back teeth are bound to cultivate deeper than the front ones, or perhaps the front row of teeth do not enter the ground at all. On the Peter Hamilton the sections or tooth frame are divided into rows, and each row of teeth swing or move independent of the others. What is the result? Even cultivation on every square inch of field and better crops. This is only one of our exclusive good points. Ask our agents about others.
