WEAK BACKS MADE STRONG

If you have a pain in your back or a weakness around the loins, and have tried all kinds of drugs and plasters without getting permanent relief, I can assure you of perfect cure if you will wear for a few nights my

Dr. McLaughlin's Electric Belt

It cures Lame Back, Rheumatism, Lumbago and Sciatica. It soothes and strengthens from the first application. You wear it while you sleep and get up in the morning feeling like a two-year-old. I have thousands of testimonials like the following:—

"Dr. McLaughlin: Dear Sir,—I received the Belt from you a month ago, and I now write you with pleasure. I am pleased to say that the Belt is doing me a great deal of good. My back has not troubled me once since the first night I had it on. I have a good appetite and I feel better than I have felt for several years.—Thanking you for the Belt.—J. W. BUSH, No. 317 Pacific Avenue, Winnipeg, Man."

"Dr. McLaughlin: Dear Sir,—I got one of your Belts nearly three years ago and used it according to your instructions for over two months, and I am well pleased with the result. My back, which was so weak and lame, is entirely cured and has not bothered me since. I lent it to some of my neighbors with the same result. Wishing you all success in your good work.—ALLEN SHOEMAKER, Grandview, Man."

IT DOESN'T COST YOU A CENT TILL CURED

Don't delay trying it. Your future happiness depends on your checking this drain upon your vitality, so stop it now and you can be sure of a long and vigorous life, full of the joys of a healthy vigor.

Don't drug. Drugs can't cure you, as you know, if you have tried them. My Belt cures because it increases your nerve power and vitality.

It's easy to be cured my way. You put my appliance on when you go to bed; you feel a glowing warmth passing through your body, and the electric power gives you new life. When you wake up in the morning you feel bright, lively and vigorous, and you wonder where your pains and aches have gone. My Belt has removed the cause and they will never return. That's a better way than making a drug store of your stomach. And who ever saw anybody actually cured by drugs? I can tell you drugs don't cure, and if you have tried them you know it. Nearly all my patients tried drugs first.

CALL TO-DAY

I have a beautiful book, full of good, honest talk about how men are made big and noble, and I'll send it to you, free, sealed, if you send me this coupon. Call for consultation free.

Office Hours—9 a.m. to 6 p.m.
Wednesdays and Saturdays until 8.30 p.m.

supply comes at present from only two plant species, sugar cane and sugar beets, and it comes about equally from each. The former is grown only in tropical or sub-tropical climates, the latter only in temperate climates.

The great bulk of the beet sugar consumed is made in European countries, Germany, Russia, Austria-Hungary and France being the leading producers. But there are now 64 active beet-sugar factories in United States, located in 16 different States. Last year the farmers of these States harvested about 365,000 acres of beets, and delivered to the factories 3,415,000 tons of beets. From these, nearly 426,000 tons of refined sugar was made. The yield of beets per acre was 9½ tons, and the yield of sugar per acre of beets was 2,334 pounds.

The U. S. Department of Agriculture has issued its annual report on "Progress of the Beet-sugar Industry in 1908." One marked feature of progress is seen in the improved quality of the beets grown. The entire beet crop for 1908 averaged 15½ per cent. of sugar in the beets. The factory processes have also been improved, until the refined sugar produced is about four-fifths of that contained in the beets.

One of the instructive features of this report is an account of the use of by-products. The beet pulp from which the sugar has been extracted, is a useful stock food, and vast quantities of it are fed in the fresh state to cattle and sheep. It finds special favor with dairymen. A dozen or more factories have installed plants for drying pulp. With this is mixed molasses, the product being put on the market as "dried-molasses-beet-pulp." The molasses is also extensively used in the manufacture of alcohol.

The prospects for further development of the industry are reported to be good. Plans are on foot for the building of several new factories.

ADVOCATES ADVANCED REGISTRY

Speaking of the importance of advanced registry and official testing of cows, M. H. Gardner, the Superintendent of Advanced Registry, says: "The herdbook conserves the purity of a breed, being based upon purity of blood; any animal being eligible to registry whose sire and dam have been recorded. An Advanced Register is a herdbook within a herdbook, based upon individual merit, and designed as an aid to improvement within the breed. Advanced registry is especially adapted to the improvement of the dairy breeds of cattle. Since the establishment of this system by the Holstein-Friesian Association, over 9,600 cows and 700 bulls have been admitted to advanced registry, many of the cows making very notable records.

"While the system does not ignore the value of conformation, as indicated by its score-card, it is based more largely on the individual excellence of the animal as measured, on the part of the cow, by her ability in dairy production, and on the part of the bull, by this potency in the production of daughters of merit. The system enables the breeder desirous of improving his herd to ascertain the true dairy ability of his cows, not only to his own satisfaction but to that of his customers also; while by its records it enables him, as also the owner of grades or common cows, to select a bull with a heredity such as is most likely, when mated with his cows, to increase the productive capacity of the herd. Many owners of grade and mixed herds will now use nothing but a bull of advanced registry breeding.

Indirectly, it pays a breeder to officially test his cows and enter them in the advanced register, because he thus aids in raising the standard of the breed and in increasing its popularity. It pays him directly, because by proving the capacity of his cows to the satisfaction of the buyer, he increases their selling value, and the selling value of their progeny; also, he may win a large sum in prize-money."

"The Maple Leaf"

WEAK BACK FOR YEARS. Mrs. A. Schnare Black Point, N.B. writes: "For years I was troubled with weak back. Oftentimes I have laid in bed for

days, being scarcely able to turn myself and I have also been a great sufferer while trying to perform my household duties. I had doctors attending me without avail and tried liniments and plasters, but nothing seemed to do me any good. I was about to give up in despair when my husband induced me to try Doan's Kidney Pills, and after using two boxes I am now well and able to do my work. I am positive Doan's Kidney Pills are all that you claim for them and I would advise all kidney sufferers to give them a fair trial."

Price, 50 cents per box, 3 boxes for \$1.25. At all dealers, or will be mailed direct on receipt of price, by The T. Milburn Co., Limited, Toronto, Ont. In ordering specify "Doan's."

Traction Engineering

Traction Engine Practice teaches student how to line up, fire under load, clean boilers, engine driving, etc. College furnishes four traction engines for student practice.

Shop Work teaches pupils how to forge and temper chisels, make welds, habit bearings, set and repair flues, repair machinery, test boilers, put in stay bolts, grind and set valves, etc. Not a short lecture course, but a three-months' course, where a student is taught to do the work himself. Correspondence course if desired. Send for catalog. Highland Park College of Engineering, Des Moines, Ia.

Fits Cured

For proof that Fits can be cured write to Mr. Wm. Stinson, 134 Tyndall Ave., Toronto for pamphlet giving full particulars of simple home treatment. 20 years success—over 1000 testimonials in one year.

CHURCH BELLS

CHIMES AND PEALS

MEMORIAL BELLS A SPECIALTY

FULLY WARRANTED

McSHANE BELL FOUNDRY CO.

BALTIMORE, Md., U. S. A.

Established 1866

You can't always tell, says an exchange, what will happen. For instance, there is a story of a man who determined to commit suicide. He went to the store and bought a rope, a can of coal oil, a box of matches, a dose of arsenic and a revolver. He went down to the river and pushed the boat from the shore and waded to where a limb hung over; saturated his clothing with the coal oil, lighted a match and set fire to his clothing, took the dose of arsenic, put the muzzle of the revolver to his temple, pushed the boat from under him and pulled the trigger. But the bullet glanced and cut the rope above him and he fell headlong into the river; the water put the fire out and he got strangled and coughed up the arsenic. He rose and waded out, and declared himself a candidate for the Legislature on the reform ticket.—The Wayne Register.
