To cure snoring, let a piece of soap be dropped into the mouth of the snorer. The oil in the soap will lubricate the pharynx and other Latin parts of the throat. The remedy, however, must be applied with caution; otherwise the snorer will awake suddenly and lubricate the floor with the person dropping in the soap.

The Executive of the Canadian Press Association is asking the Post Office Department to delay the enforcement of the new postal arrangement till the first of January next, that the Postmaster general issue stamped wrappers in order to save the enormous labor entailed by the new regulations and also that the general newspaper rate be ameliorated as a set-off to the loss which the new order of things will entail on the publishers.

It appears that the Indians at Cape Croker, who have been approached by oil men for leases of their land, do not snap at the bait at all. The Indian is not a business man anyway, and in this particular case he is afraid that he might be giving some valuable thing away. If there is anything there he wants it for himself, and if he reasons oil is found near by, then he will dig down and have the whole thing. Why should they give 92 barrels to the Yankees and have only eight for the owners of the reservation? This is now what is going through their brains, and the oilmen cannot do very much with them.

A farmer near Georgetown who requested the Immigration Dept. to send him a married farm laborer, went to the station to meet the man and his wife. He took a double seated rig, but when eleven instead of two arrived it was found necessary for the majority of the big family to walk to the farmer's home. The farmer will now have hands enough to help him on his large farm.

Walkerton blacksmiths came to an agreement in regard to prices, and the new rate went into effect on May 1st. The new prices are a little higher than formerly, for example, the old price of putting a new shoe on was 25c., it is now 30c., while for re-setting the price is 12½, instead of 10c. There are a few other slight increases. The blacksmiths say that they either have to raise prices or get out of business.

Why Remain Thin And Pale?—Pale people have pale blood. The stomach is wrong, assimilation is poor and food is not changed into blood. The system lacks vitality and reconstructive power which can be supplied by Ferrozone. It braces the appetite, digestion is stimulated, what you eat is transformed into the kind of nutriment that your system requires. Vital life-giving blood that makes rosy cheeks, strength that defies weariness, spirit and ambition all come from Ferrozone. Nothing in the annals of medicine so sure to build up and strengthen as Ferrozone. Try a 50c box Sold everywhere.

Mr. Brown and his little boy were paying a visit to a cemetery in which a friend of theirs was lately buried. Little Johnny, his son, had been carefully eyeing some of the tombstones, when he suddenly remarked—“Say, pa, why didn't the man who is buried here go to Heaven?” Pa—“Perhaps he did, my son.” Little Johnny—“But it says on his tombstone, 'Peace to his ashes,' and it must be a hot place where there's ashes.”

It will be of interest to students who propose writing on the higher grade departmental examinations this summer to learn that special care will be taken by the examiners in setting the papers to avoid what is known as the “catch paper.” The papers this year will deal with the work very comprehensively, but will avoid anything like “catch questions.”

SANITATION.

An exchange gives the following good advice:

We would point out to each and every citizen the great necessity for the keeping of back yards and other surroundings in a state of, as far as possible, perfect sanitation.

Do not wait for the arrival of warm weather before commencing upon this work. Start now to have the pile of ashes, tin cans, etc., which has heaped up during the winter months, removed. We have overheard certain individuals remark that piles of tin cans and ashes are merely unsightly and not at all menacing to the health. This is a mistake, as these heaps contain dirt which becomes a most dangerous breeding ground for diseases of a virulent type. Chloride of Lime or some such disinfectant should be kept in all closets during warm weather, or for that matter the year round.

The keeping of property in a clean and sanitary condition is a duty to which the property holder should attend; without the reminding of the health officer, out of respect to his own well-being and that of the town in general.

We cannot hope that everyone will follow out this advice, but we do hope and trust, on behalf of the majority of the citizens, that the Council set a date by which back yards, etc., have to be cleaned. We would also like to see that the penalty for non-compliance with the by-law made no insignificant one, and what is even more important, we would like to see any individual, who cannot give valid reasons for not having their premises cleaned up, made to pay the penalty, as a reminder that, apart from their own health that of their fellow citizens depends upon cleanliness, and not only are they imperilling their own lives by their wanton neglect, but also their neighbor's. The time, trouble and expense involved in cleaning up these accumulations in the first place is not very terrible, and if some method and regularity is observed afterwards, the maintenance of clean and sanitary surroundings will resolve itself into a matter of little or no difficulty.

A HEAVY RAIN.

Each man had told his tale of the “heaviest rain he ever saw fall out of the sky.” The York County farmer was an easy winner with his of the great harvest rain in '93.

“It began with big drops scatterin' like” he said. “Then it got to a shower, and I just thought I'd crawl under the canvas on the binder till it was over. But when lightning took to hitting right at the binder I concluded to get out and run. I had a gallon and a half bucket on my arm, and it soon began to get heavy. I looked down, and if the blooming thing wasn't full of water, I'm a—”

Then Rooty Tooty, who was listening, broke in—

“Well, now, I think that must have been the day I am thinking about. What made me know it was raining was seeing a flock of wild ducks go over; but I noticed that all the ducks had folded their wings and were swimming quite naturally.”

Then silently, with bowed heads, the crowd dispersed.

REGAIN NOW THE STRENGTH YOU LACK.

WINTER LEAVES US MISERABLE, AILING, WEAK. BUILD UP NOW.

During the winter the system gets sluggish. The blood, polluted with impurities, deadens the nervous system and dulls the actions of both liver and kidneys; the foulness of the system increases and when spring comes we are limp and useless.

Spring “system cleaning” is a duty; the body sewers must be flushed out and waste matter removed—otherwise weakness and nervousness will surely follow.

Begin by enriching the blood. Make it pure and nutritious by taking Ferrozone, its the greatest blood former known to medical science.

Ferrozone make the liver fairly sing with new life, makes the kidneys dance with renewed vitality, and thus the winter's accumulation of pollution is expelled.

Of course digestion must be improved and probably the stomach will require aid as well. Ferrozone serves the purpose admirably. Those who use it, enjoy appetite and digestive powers far beyond the ordinary.

That tired feeling is replaced by the buoyant, joyous sensation of health and vigor. Day by day as your strength increases, you feel new energy surging through your veins, and know that a tonic of great merit is at work.

No remedy more nourishing or uplifting, no treatment so sure to bring lasting health, good spirits and contentment. Ferrozone contains just what run-down folks need; it cures because it supplies more nutriment than you can get in any other way. Free from alcohol and prepared only in chocolate-coated tablets, 50c per box or six for \$2.50 at all dealers. Be sure you try Ferrozone.
