For Sale or to Let
In order to close the estate of the
late M. P. WOOD, Port Williams, the farm
formerly occupied by him containing
156 acres of land is offered for sale
Said farm consists of 25 acres of
dyke and twenty-five acres of
orchard and the remainder in tillage
land, this is one of the best stock
farms in Kings County, and at
this stage in our history, when mixes
farming is so essential to success it
offers to the right man a golden op-
portunity to make good. If not
sold it can be rented with a view to
purchasing. This farm is offered at
a bargain. Apply to
G. A. CAMPBELL, Agent
Port Williams

For Sale
Part of the Real Estate of the late
HOWARD BLIGH
namely: Forty-five acres of orchard
and woodland (known as the
Coleman Property) situated on
Brooklyn Street, Kings Co., about
two miles from Cambridge Station,
one mile from Woodville Station,
also fifty acres of orchard, meadow
and woodland (known as the
Eagles Farm) situated on Brooklyn
St., Kings Co., about 1/2 mile east
of the above named property. This
property will be sold cheap in order
to settle up the estate. For further
particulars apply to **Howard Bligh &**
Co., Limited, Halifax.

SON OF BONAR LAW MISSING.

theria**

Up-to-date Silo and Barn in the West.

FOR many years Western Canada has not been thought of as a silo country. The enormous areas of unoccupied land, on which cattle roamed at will, or the settler cut his year's supply of native hay, to a large extent met the fodder problems of the country. With closer settlement and more intensified agriculture, however, a change is coming about. Particularly on account of the rapid advance of the dairy industry the farmers are becoming more interested in the various means of caring for their herds, especially during the winter months. The silo has been found to solve one problem, and is making its appearance in many parts of the country.

From experiments that have been undertaken at the various experimental farms it would appear that the silo method of feeding dairy stock is one of the very best. Superintendent G. H. Hutton, of the Dominion Experimental Farm at Lacombe, Alberta, claims that winter silage is one of the best means of keeping the farm stock well fed during the winter, and has solved the problem of securing succulent feed for the dairy cattle.

In his report Mr. Hutton says that the growing of roots has met with many objections among them being the high cost of labor and the difficulty of storing. Where these difficulties can be overcome roots add very materially to the rations for the dairy cow and are a means whereby the milk production can be increased in its first flow after freshening and maintained at a higher daily

average throughout the winter months. He believes that the solution lies in the silo since it can be erected at a comparatively low initial cost, considering the tons of material that can be stored, and considering also that silage can be made from peas and oats, or oats alone, a crop which can be universally and successfully grown, and which will yield a green weight of from eight to twelve tons per acre. The crop intended for the silo is cut while the oats are in the milk stage and is at once run through the cutting box and cut as fine as possible, going into the silo absolutely green. It is important that the silage be thoroughly tramped. A silo 20 feet high and 12 feet in diameter will hold from 80 to 90 tons, according to the amount of moisture in the crop at the time it is cut. At the Lacombe Experimental Farm some bulky fodder, as hay or oat straw, is usually fed in conjunction with the silage as well as the usual grain ration. When so fed cows on full flow of milk will consume around 40 pounds per day.

Experiments which have been conducted at the farm during the past two years to determine the feeding value of this silage as compared with the same feed cured in the ordinary way in the shock of green feed, show results very decidedly in favor of ensiling the crop. It shows also a saving in the cost of producing one pound of butter of as much as four cents per pound, and as much as seven cents per pound with silage made from corn.

HELP FROM THE PATRIOTIC FUND
Men Selected Under the Military Service Act are Assured of It by Resolution

Ottawa, Sept. 28.—It is now known that, so far back as June, 1917, the executive committee of the Canadian Patriotic Fund had decided to grant the same assistance to the men selected under the Military Service Act as to the men already enlisted, in the matter of payments to dependents. On June 14, 1917, at a meeting in Ottawa, the executive committee of the Fund passed a resolution providing that in the event of the Government's passing and enforcing legislation providing for a measure of selective drafting, the dependents of the men so selected be entitled to the same assistance as the dependents of the men who have volunteered. Under the Military Service Act of 1917, of course, with the first-class unmarried men and widowers without children, not a great many are expected to require assistance for dependents from the Patriotic Fund, although each case will be considered considered carefully.

With assistance, where needed, from the Patriotic Fund, the men selected under the Military Service Act will receive every convenience and right of the men already enlisted. Their status will be assured.
