# INSOMNIA.

SOUTH AMERICAN NERVINE RESTORES REST

If the digestive organs refuse to do their work, indigestion and dyspepsia follow like lightning's flash—the nerves are shattered and then insomnia runs riot, and the patient is on the road to the mad-house or insane asylum. A well known Toronto newspaper man was a victim of nervous prostration and insomnia through overwork—retiring at night was more of a dread than a welcome to rest—prejudiced against medicines and remedies, he spurned the thought of resorting to what he called nostrums—he became almost incapacitated for work—he was recommended to try South American Nervine, procured a bottle and when half of it had been taken, he found himself improving—sleep was induced, the nerves grew quieter, the appetite returned—he continued a bottle and when half of it had been taken, he found himself improving—sleep was induced, the nerves grew quieter, the appetite returned—he continued to take the remedy until he had used six bottles, and at the end of that time the twenty pounds he had lost in worry and for want of rest was put on again—to-day he says, "I feel strong enough to do two days' work in one." South American Nervine is without a peer in the cure of nervousness, indigestion and insomnia. A few doses will convince the most sceptical. It gives immediate relief and effects a cure in every case. Strong as this statement may seem it is absolutely true.
