New York, Nov. 3.—The Tribune will say to-morrow: "The democrats retain ed by a figure and the democrats make the plurality which the state gave President Cleveland almost invincible. The stay-alive voters decided the matter. The vote was tight, but the republican who did not have the trouble to vote outnumbered the democrats."

WAITING ON A WOMAN.

King Theban's Wife advises Him to Temper. RANOOK, Nov. 3.—A letter from Mandalay, capital of Burma, states that the queen of Burma, who exercises great influence over her husband, is envious, and her majesty declares that fighting and the small of gunpowder will be injurious to her health. She advises King Theban to temporarily suspend the demands of the British government and fight after her commission, as it is very important that there shall be no war with the Burmese throne. England has now no suitable candidate for the succession, both of the present claimants being unacceptable, owing to their illegitimate habits. It is believed, therefore, that the government of Burma will answer the ultimatum of the Indian government in an effective manner in order to secure time for the accomplishment of her majesty.

One Among Thousands. From the Brooklyn Eagle. So many stories are told about the rise of men in Wall street that they seldom attract as much attention now as they did years ago, when speculation was carried on with caution. One of the most amusing specimens of Wall street men is to be seen every day on his way by the "cave" in a team of his own, with a magnificent team of bays and an English coachman on the box. Within the brougham sits the speculator, leaning forward on his case and looking thoughtfully at his well-gloved hands. He has a pale and almost effeminate face, and his manner is reserved and austere. He is very exclusive and elegant in the manner of personal enjoyment. 24 years old, and in department more dignified than Mr. Gould, Mr. Connor, or Henry Clewmont of whom you hear so much in the papers, or in yellow cab. This young man had charge of a certain department of value in a firm on Wall street, and he lived in a boarding house on Twenty-second street, on terms of special friendship with the manager of the house. He performed the marriage ceremony for an elderly man, and he kept her eye on the matrimonial knot. He had a "played" the bucket shop, and often made very little winnings. The landlady had raised \$4000 during her many years of keeping boarders, and was about to devote it to paying off a mortgage on her house, when the solemn business man succeeded in persuading her to invest some of it in Wall street. She was a cautious woman, and agreed to let him have \$200 every Monday morning for five consecutive weeks. This is not a great amount of money, but he happened to catch the market as it rose, and he was able to get it. His profit the first two weeks was enormous, and the landlady threw all of her money into the pool. Now he is living in bachelor's chambers in the City, and he is a millionaire.

Remarkable Case in Surgery. From the Baltimore American. An accident so remarkable occurred in this city a few days ago to one of our leading merchants that it has no recorded parallel in civil surgery. The patient had military experience, and had few children. After he had set down to rest, to his amazement he found that he could not place his back close to the chair. Finding no apparent cause in the chair for this obstruction, he requested his wife to examine his back, and she discovered a hideous protuberance in the region of his right shoulder blade, quite six inches beyond the back and adherent to the ribs. The protuberance was a tumor, which recognized the lesion as displacement of the inferior angle of the scapula by rupture of the inferior fibers of the latissimus dorsi muscle, and quickly reduced the dislocation so as to alleviate the excessive pain and distortion in the shoulder and arm. Appropriate bandages have been applied, and the case is progressing most favorably.

THE AVERAGE NUMBER OF DEATHS IN MONTREAL.

Nearly Three Hundred in the City Last Week—Ninety New Cases Reported—A Doctor's Wicked Advice. MONTREAL, Nov. 3.—At a meeting of the civic board of health today Mr. C. P. Desjardis waited on the board, stating that jurors had been discovered having smallpox in their families, and it was also probable that a number of witnesses might be in the same predicament. He suggested that they be isolated at the house, and Dr. Leberge replied that a house was being occupied for disinfection on the Champ de Mars. They might be sent there. Mr. Desjardis replied that the arrangement would likely satisfy the witnesses, and that the smallpox in their families should be isolated at their hotels during the sitting of the court.

Dr. Leberge's report which work done yesterday showed that 90 reports of new cases had been made to the department, and that the physicians visited 68 houses verified 68 cases.

Mrs. Hopkins has taken an action for libel against Le Monde. Upon the 28th of October she was invited to give evidence in an article bearing upon the St. Roch's hospital exposure that Mrs. Hopkins was mentally unfitted to give reliable testimony, and the action will be taken for the purpose of clearing that lady from this aspersion, merely nominal damages being claimed.

A crowd on St. James street west threw stones at a physician who accompanied the isolation officer this afternoon. Two cases of smallpox which occurred from smallpox last week 238 were French Canadians, 10 other Catholics and 6 Protestants; 245 were under 10 years of age.

The medical health officer states that Dr. Barrill of Hochelaga is advising his patients not to comply with the sanitary law, in which the doctor advised the parties not to go to the hospital or have the inmates of the house quarantined.

Thirty-five new cases of smallpox were reported up to 10 o'clock and 55 verified. The official report of this morning shows this morning show 35 deaths from smallpox in the city yesterday, 5 in Cote St. Louis, 4 in St. Jean Baptiste village, 4 in St. Cenege and 1 in St. Charles.

THE BISHOP OF BATOCHE.

HIS VIEWS ON THE SITUATION REGARDING RIEL.

'T would be folly to hang him and to deprive him of his life. The Riel case is the all-absorbing topic in political circles here. It is understood that the question of appointing a medical commission was again before the cabinet this afternoon and the appointment of a commission may now be said to have been decided upon.

Bishop Grandin of Batocche, who is at present in the city to obtain if possible assistance from the government for staying in the city, was interviewed by a reporter. In reply to the question as to his own political activity he said: "I do not think they are. The man had a wonderful influence over the poor ignorant people. He told them he was a prophet and had his instructions direct from God, and as he is possessed with a great deal of eloquence he worked himself into their confidence and they actually think he is not enfeebled for age."

"Does your lordship think Riel should be hanged?" "I have no opinion, I would not say hang him or liberate him. The trouble is, should he be hanged the Metis would consider him a martyr, and not only so, but they would also consider him a hero. He would be remembered. He would rather be a martyr than a hero. He would rather be a martyr than a hero. He would rather be a martyr than a hero."

POLITICAL RUMORS.

The air was thick yesterday with political rumors. On Monday night a number of prominent members of the opposition in the local legislature met Mr. Meredith at the Queen's and had a long discussion.

What it was about no one knows. Orlighton, of Owen Sound, was among those present. But rumor has it that the meeting was called to discuss the question of a general dominion election. And certainly there were many things that point to that. The Mail has not been indulging in all its recent political activity for no purpose. Here is the most probable solution of the situation: Sir John's cabinet have decided to hang Riel; strong protests have been sent Mr. Sir John has replied that if the Riel question is to be faced on his next session he will therefore the present parliament, go to the country for a verdict on his hanging Riel, and abide by that decision.

If he succeeds the question will not bother him any longer. Many things are favorable to the holding of the election almost forthwith. Sir John is doomed in Ontario if he lets Riel go—begins to look as if Ontario was more determined to hang Riel than Quebec is to save him. If that is so Sir John will, if he has not already, square himself accordingly.
