Remarkable Progress!

That there is no better Company with which to place your Life Insurance than

The Manufacturers Life

is clearly shown by the following comparison:—		
	DEC. 31, 1894.	DEC. 31, 1904.
Insurance in Force.....	\$9,555,300	\$37,666,468
Policies issued during the year.....	5,710,756	7,107,118
Policy Reserves.....	628,459	2,255,977
Income.....	821,320	6,112,544
Assets.....	296,468	1,659,107
SURPLUS to Policy Holders.....	177,630	771,869

The ten years during which these increases have taken place cover the period of the present management of the Company. Certainly such magnificent success guarantees

POSITIVE PROTECTION TO POLICY HOLDERS.

FEEDING NEEDS MORE ATTENTION

There is no question at all but that if our farmers would pay attention to the things pertaining to the handling of the cow, making her feel comfortable, taking care of her with strict regularity, giving her the kind of food she needs with which to make milk, that he can by doing these things, without changing any of his cows or any material number of them double his income, says T. L. Haacker, of Minnesota.

We have at the experiment station, I think, some forty complete yearly records of just ordinary cows, not even select. Some of them yield 150 pounds of butter a year, some of them yield 200 pounds of butter a year, some 300 pounds, and some 350 pounds, and we have now and then one that just in the meridian of her life will touch the 600 pound mark before you, but taking all these different yearly records, we find the average cow on proper care and proper feeding will produce about 275 pounds of butter in a year, while she is giving us only about 150 pounds, is the difference between the yield at the state farm and the yield on the average farm is simply because the cow is not provided with the material she needs to make milk, and she is not taken care of, she is not comfortable, she is subjected to cold, she is subjected to changes, and those things. Every little incident that happens that brings discomfort to the cow will cause the yield of milk to change, and so the average farmer never brings a cow up to her full flow, simply because the cow has not a chance.

COW VS. BALANCED FEEDING. A system of individual feeding renders the matter of nutritive ratios and prescribed rations of only secondary importance, since it must be left largely to the cow herself to determine how a maximum amount of production may be obtained in each case, says an agricultural authority. It is therefore, not only useless, but decidedly a wrong system to prescribe certain rigid standards of food rations for all cows, even when the quantity of milk produced is considered in the construction of these standards.

Dairy farmers should familiarize themselves with the chemical composition of available feeding stuffs and the market prices of these and should strive to know the characteristics of each cow in the herd so that the system of feeding practiced in individual cases may be such as will secure the best results. The largest dairy production of which the cows are capable.

Economy of production should not, however, be a prime consideration, since a herd of cows that can produce a minimum amount of milk and butter fat, would be likely to produce also a minimum amount of milk and butter fat. The ideal dairy cow is one that will produce large quantities of milk and butter fat economically and will continue this production during her entire life in the herd.

The continued usefulness of the individual members of the herd is of importance to the dairy farmer and should be kept in view, rather than a maximum reproduction for a single lactation period or a portion of the same.

COTTON-SEED MEAL FOR COWS.

The Missouri experiment station has been making some feeding tests of cotton-seed meal and linseed meal for dairy cows. In the report of the tests in which large quantities of milk and butter, a ton of cotton-seed meal has \$2 to \$3 more value than a half-ton of linseed meal. They say further: "When cotton-seed meal can be bought, delivered to your railway way station, at \$15 per ton or on in car lots, as it usually can in the fall, the desirability of each community ought to club together and buy at least a car to protect themselves against a rise in the price of bran and oats, which usually occurs about the middle of each year. Cotton seed meal at this price is far cheaper than bran at \$15 per ton or oats at 25 cents per bushel.

A VALUABLE REMEDY TO DESTROY INSECTS.

The arsenate of lead poison is a combination of the acetate of lead and arsenate of soda. It can be made at home, but I think a better product can be obtained from dealers as cheaply as one could afford to make it. There is a surprising difference in the price asked for this material. Some dealers charge 18 cents a pound in 200 pound lots, while it can be obtained for 9 cents of other manufacturers. I have recently analyzed three different arsenates of lead and they vary from 39 per cent. to 41 percent. to 50 per cent. of the arsenate of lead, the remainder being largely water. The better material was one of the lowest priced. Arsenate of lead at 9 cents and containing 50 per cent. of the poison is cheaper than paris green containing 60 per cent. of arsenic and costing 10 or 12 cents.

THE FARM

One of Three Things Always Cause RHEUMATISM

Do you know the system rid itself of waste matter through bowels and kidneys? Yes, but by the skin as well.

As a matter of fact, the skin rids the system of more urea than the kidneys do. If the skin, or bowels, or kidneys are unhealthily—they won't throw off enough urea. This urea is changed into uric acid—carried by the blood to joints and nerves—causing rheumatism.

One never inherits Rheumatism. One does inherit weak kidneys, irregular bowels and bad skin action.

Fruit-A-Tives

OR "FRUIT SEVEN TABLETS"

will positively cure Rheumatism because they increase the eliminating action of skin, kidneys and bowels—and make these three organs so vigorous and healthy that there can be no urea or waste retained in the system to poison the blood and irritate the nerves.

FRUIT-A-TIVES are fruit juices, combined with tonics—the whole forming the most effective cure for Rheumatism.

50c. a box or 6 boxes for \$2.50. Sent on receipt of price if your druggist does not handle them.

FRUIT-A-TIVES LIMITED - OTTAWA.

lead is now used mostly where it is necessary to apply large amount of poison so that the insect may be killed quickly or before it lays its eggs, as in the case of the grape beetle and of the elm-leaf beetle. For these insects it is advisable to use the poison at the rate of four or five pounds in 50 gallons of water or kerosene.

For spraying potatoes, I would use two or three pounds arsenate of lead in 100 gallons, and the same would also apply to general orchard spraying. I find that orchardists who do a large amount of successful spraying are using paris green much stronger than formerly, many of them putting in a pound or more to each 100 gallons of spray. The arsenate of lead is certainly a valuable addition to our insecticidal batteries, especially where it is necessary to use a strong poison, as indicated above. There is also on the market an arsenite of lead, but I would not advise an orchardist to use this material contained enough free arsenic so that it seriously burned plum foliage. The analysis of the three different makes of arsenate of lead mentioned above, showed no free arsenic in either case.

TO MAKE THE FARM HOME ATTRACTIVE.

It is well to keep the barn clean and neat. Keep walks and porch swept clean. Clean up or fill up small, dirty ponds. Burn as much of the garbage as possible. See that fences are mended and painted. Keep the grass around the house in good condition. Cover the old rain barrel with a piece of cheese cloth, to keep insects out. Take off the old rubbish, pick up the papers and disperse all waste matter. Keep the house in good condition. See that the roof is mended and the house painted. Put screens on neatly and see that the screen doors have locks that are in order. Don't keep garbage or wet material in wooden barrels, because the wood becomes soaked and can't be cleaned. Don't empty dishwater right outside the kitchen door. It makes a wet slippy place, which is often the source of disease. Be sure that the fence around the chicken yard is in good shape, so that the chickens won't get into the flower garden. Dig a deep pit and put all the old tin cans, broken bottles, kerosene cans and rusty pans and knutles into it. Cover with earth. Prune the trees and don't leave the branches lying under them. Either take them away or use them for a hedge for sweet peas. Don't keep empty tin cans lying around the house. When it rains they fill with water and breed mosquitoes, and are a constant danger to the family. If there is an unsightly building, plant vines that will form a screen.

When you have dressed, skirts, blouses, jackets, caps, stockings and other articles of wearing apparel to recolor, use the DIAMOND DYES only, and you will have results which will fill your heart with joy. DIAMOND DYES make old things look like new.

Always ask your dealer for the DIAMOND DYES and refuse any other make that may be offered to you. The common dyes are sold by merchants simply for the sake of big profits. New Diamond Dye Direction Book and Diamond Dye Cook Book sent free to any lady who sends her address to Wells & Richardson Co., Limited, 200 Mountain street, Montreal.

ALSO BURIED.

A certain village on the Roman road to Scotland used to have a bad reputation among cyclists. Few ever got through it without suffering from the attacks of a big dog, which (in fact, it is believed, by its owner) flew viciously at passing machines and gave the riders a very bad time. Often enough had the dog's decess been reported, but the story of its ultimate defeat and death is graphically told in the neighborhood.

One hot day a meek-looking clergyman stopped at a wayside inn and begged Boniface to give him a meal. He explained his inability to pay for it by declaring that, as he was passing through an adjacent village, a brute of a dog jumped out of a house and got under his motor. He rode it down and killed it, and had given the owner all the money he possessed as compensation.

The landlord's eye grew wide. "Are you certain you'll eat that dorg?" he asked. "Indeed, yes. To make sure it was really dead, I compelled them to bury it while I was there."

"Then come, expense, parson," cried Boniface, enthusiastically. "That dorg's been killed a time before now, but you're the first man 's' had the gumption to stop an' see it buried."

Wild cucumber, wild hop, morning glories and flowering beans make quick growth. Do not have too many trees right around the house. A farmhouse should be very healthy, but is often quite the opposite; and we find the rooms damp and the roof and foundation often covered with moss.

COMBATING THE WHITE GRUB.

In strawberry fields, planted on sod lands, plants are often injured by white grubs the larvae of the May beetle or June bug. No remedy has proved effective since the grubs are always below the surface. The only satisfactory method is prevention. No old sod land should be used for a strawberry field.

When such a field must be used it should be fall plowed, at least two seasons previous to planting with strawberries and some such crop as early cabbage, followed by crimson clover to be fall plowed and the land immediately sown to buckwheat or rye for a winter cover crop. The following spring after plowing should be a safe time to set the berry plants. From then forward frequent rotation of short period crops will keep the field free, particularly if the land is more or less bare in late spring and early summer, when the eggs are laid.

DIAMONDS For Every Home

Diamonds for every Canadian home are not the gems which the wealthy alone can purchase; they are those invaluable gems known as DIAMOND DYES which have been for twenty-five years true money savers for the women of Canada.

DIAMOND DYES, wherever used, have proved their superiority over all other packages dyes in richness, fullness and durability of color. Certain speculators, jealous of the popularity of DIAMOND DYES, are putting on the market cheap imitations to imitate the DIAMOND DYES. These common and cheaply prepared dyes produce blotchy and muddy colors and ruin good materials.

When you have dressed, skirts, blouses, jackets, caps, stockings and other articles of wearing apparel to recolor, use the DIAMOND DYES only, and you will have results which will fill your heart with joy. DIAMOND DYES make old things look like new.

Always ask your dealer for the DIAMOND DYES and refuse any other make that may be offered to you. The common dyes are sold by merchants simply for the sake of big profits. New Diamond Dye Direction Book and Diamond Dye Cook Book sent free to any lady who sends her address to Wells & Richardson Co., Limited, 200 Mountain street, Montreal.

As Mrs. Kauffman, her husband and Sheriff Phillips reappeared on the street, expecting to find their carriage waiting, they found themselves facing an infuriated mob.

LYNCH HER, TEAR HER TO PIECES.

"Cries of 'Tear her to pieces!' and 'lynch her!' arose and the crowd surged about the party. The prisoner shrank behind her husband, who is a large and powerful man, and turned pale from fright. The party started to cross the street to the livery stable kept by Mayor Burnside, but the crowd, cursing and threatening, blocked the road. Women's high-pitched and excited voices renewed the cry of 'Tear her to pieces!' 'Scratch her eyes out!' 'lynch her!' etc., and screamed, 'She devil!' and 'Murderess!'

Red Rose Tea "is good tea"

Use a package and you will not be satisfied with any other tea.

T. H. ESTABROOKS, ST. JOHN, N. B. WINNIPEG. TORONTO, & WELLINGTON ST., E.

Is This Rich Man's Wife Woman or Demon

(Continued from Page 3.)

denounced by the people of her own city. But she has not yet given her side of the case except through her physician and her husband, Moses Kauffman, president of the Sioux Falls Brewing Company and one of the most widely known and best liked men in South Dakota, and a politician of note.

They have declared that Mrs. Kauffman asserts that the Police girl, suffering from vertigo, fell down stairs several times receiving her injuries in this fashion. But Dr. Germain, the family physician, who signed the death return, stating that the girl died from natural causes, has revised his statement, stating new belief that death resulted from wounds inflicted by some blunt instrument.

He has thus placed himself in an unenviable position as regards the law in South Dakota, which makes the returning of a false death certificate a misdemeanor punishable by fine or imprisonment or both.

The doctor attempts to justify his act by the statement that Mrs. Kauffman being a woman so well respected, he accepted her statement as to the cause of injuries.

All these facts were public property before the woman's arrest. But a preliminary examination of witnesses was to furnish evidence startling even to the prosecution itself. Anna Jensen and Mrs. Oscar Larson, former servants in the Kauffman home, testified that ten years ago Mrs. Kauffman lost an only daughter, and that since her daughter's death she has been unable to bear the sight of youth and health in other girls.

And then, as though possessed by a demon of cruelty, she would treat Mrs. Kauffman lost an only daughter, and that since her daughter's death she has been unable to bear the sight of youth and health in other girls.

They swore that whenever Mrs. Kauffman saw a girl of the same age her own child would have been had she lived, the wife of the brewer became almost insane with desire to harm her.

THE DEMON IN THE HOUSE. In the case of Agnes Polaris the prosecution was greater than usual, as Mrs. Kauffman was heard to remark her resemblance to her dead daughter. The witnesses quoted Mrs. Kauffman as saying in Agnes's presence: "Why should she live and my girl be dead?"

And then, as though possessed by a demon of cruelty, she would treat Mrs. Kauffman lost an only daughter, and that since her daughter's death she has been unable to bear the sight of youth and health in other girls.

While this testimony was being given a furious crowd was gathering in the street. It was the intention merely to confine Mrs. Kauffman in her home pending trial on the charge of murder, but the angry crowd, which included many women, surrounded her residence and became so violent that the officials guarding her were compelled to take her to jail for safety. Crowds came from miles around, many pouring into the city from Parkston, the home of the girl victim.

ONLY SAVED BY A RIDE TO JAIL.

This brought an order that the prisoner should be placed in jail, and she was removed by a detour of the back streets to a cell in the big stone court house. The crowd refused to consider this a concession, being the seriousness of the offence warranted the same treatment for a rich woman as for a poor one. All day the situation remained critical, and at night a special guard was placed at the jail.

In justice to Mrs. Kauffman, it must be stated that as soon as it was known that she had been locked up, at least a score of the best citizens of Sioux Falls volunteered to go on her bail bond. Although formally committed on the charge of manslaughter, she has since been released.

Her husband took her in a closed carriage from the jail direct to a train. Their destination was a secret that has not yet been revealed. It is believed that they have gone to some retreat where both will be able to recover from the strain of their terrible experiences, and be prepared to face the trial which is inevitable.

Herr Rubelk's Views

Kubicki, the great violinist, recently made the statement that he found more true musical appreciation in the smaller cities and towns of the United States and Canada than in the great musical centres. Of course there may be a modicum of exaggeration in this; still the progress of musical education in America during the last few years has been phenomenal. In Canada the musical fever is rampant, greatly to the advantage of the country. Down in Windsor piano and voice teachers of standing are much in demand.

Since Mr. H. Whorlow Bull opened a studio there his time has been fully occupied, for not only has he a high standing in Detroit, where also he has a studio, but he is the director of the Choral Society of Windsor, Walkerville and Harrow, and organist of the Central Methodist Church, Windsor. Mr. Bull is an Englishman, and has been associated with the choir of Westminster Abbey and St. Paul's Cathedral before coming to this country about two years ago. His musical taste is unimpaired, and his opinion worthy of attention. In a letter written recently to the Toronto firm of Gourlay, Winter & Leeming he said: "Permit me to express my entire satisfaction with the Gourlay piano. I have used this instrument ever since I opened my studio in Windsor, and, although it has had hard constant use, it retains that sweet, clear, pure tone that is such a help to violinists. I congratulate you on the success of the Gourlay as a thoroughly musical piano."

HYMNS THAT FIT.

The Automobillist's—"Oh in danger, off in woe."
The Dentist's—"Change and decay in all around I see."
The Multi-millionaire's—"Ten thousand times ten thousand."
The Bookkeeper's—"A charge to keep I have."
The Hypnotist's—"Art thou weary, art thou languid?"
The Divorce Lawyer's—"Blest be the tie that binds."
The Bonaster's—"Blow ye the trumpet, blow."
The Life-saver's—"Breathe the wave."
The Paglist's—"Fight the good fight."
The Eskimo's—"From Greenland's icy mountains."
The Engaged Girl's—"Shout the glad tidings."
The Elected Candidate's—"The strife is over, the battle's won."
The Astronomer's—"The spacious firmament on high."

HOT WEATHER AILMENTS.

At the first sign of illness during the hot weather, give the little ones Baby's Own Tablets or in a few hours the trouble may be beyond cure. Baby's Own Tablets is the best medicine in the world for preventing summer complaints if given occasionally to well children. The present another will keep her children well through an occasional dose of this medicine. Mrs. Edwards Clark, McGregor, Ont., says: "My little girl suffered from colic and bowel troubles but Baby's Own Tablets speedily cured her." And the mother has the guarantee of a government analyst that these Tablets contain no opiate or harmful drug. Sold by all medicine dealers or by mail at 25c a box from The Dr. Williams' Pink Pills Co., Brockville, Ont. Keep the Tablets in the house.

Wilson's FLY PADS

ONE PACKET HAS ACTUALLY KILLED A BUSHFUL OF FLIES
