are significant, to say the least.

In the case of one a complete somersalt was tunnel, and the cause of a certain tenderer was supported more warmly than citle control had been previously, in the other, a half-hearted advocacy of what had before been vigorously pushed followed the appearance of the advertisement referred to. This may have been next excess a more coincidence, but such is not the general opinion, and I only give expression to the voice of many when it ask if \$150—for that is what two columns come to at that rate—is hig enough to buy the elutorial columns of any one of Toronto's dailies? I certainly wouldn't have thoughet so, but I tooks mighty like it. Of course, as far as the principle is concerned, the amount makes no difference, but I would have inagined that our Toronto dailies, even the smallest of them, would have talued themselves more highly.

This does not apply in the same sense to all, for some have consistently opposed the idea of civic management from the lottest of civic management from the they considered, but they considered it the better side, but on account of managing interested stock-loders, or the personal animus of the owner, therefore consistently. You may consider this assertion as a hit of presumption our my part, but I think I am justified in making it, for I have yet one can house and what extempt by any of the dailies to prove the impracticulity of civic operation. Of radiculate there has been plently, the or management management management management management management of the contract of the THIS does not apply in the same

woman who has committed no offence before consistently. You may consider this assertion as a his of presumption on my part, but I think I am justified in making it, for I have yet one so an honest and able attempt by any of the dallies to prose the impracticability of evice presistion. Of ridicule there has been plenty, but without a manufacture and of municality statement is not that demands under a first part of first part of the selection of place hunting there has been no end, but as far as any intelligent attempt to fairly weigh the prox and cone is cornect activation of place hunting there are maintain the fairly weigh the prox and cone is cornected, there has been none of it.
