

NEW IDEA FURNACES

No Running Up and Down Stairs

The New Idea Furnace may be entirely controlled and regulated without going down stairs. The New Idea Regulator does this.

Handsome, solid steel chains are connected to the draft and check dampers in the furnace room, and brought up stairs over smooth working pulleys to a regulating board, placed in the hall or dining room, or other place convenient for the owner of the furnace. The installing of this system does not in any way disfigure the room, and the board itself is beautifully nickelled and is a real ornament. It is simply operated and saves an endless number of trips up and down stairs.

If your house is too warm you simply change the chain to a position marked "Check," if more heat is desired you change the chain to "More Draft," and you always get a quick answer when you operate the Regulator on the New Idea; it responds quickly at all times. Saves you trouble and gives you the temperature desired.
