

## The Best Car in Motordom

The man with \$1,650 to invest in a car cannot find a more substantial proposition than the McLaughlin-Buick Model "3."

We say "substantial". What other word could describe the quality that makes a car just as comfortable, easy-riding and reliable after a few thousand miles travel as it was when new?

### Model "3" at \$1650 Has More Life in it Than a Good Many Higher Priced Cars. We Can Show You Why.

In the first place, it has the McLaughlin-Buick unit power plant—proven to stand up under years of service—full 32 h.p. for very low fuel cost. Such a motor will be a smooth-running machine when many another is ready for the scrap heap.

The body has wide U-shaped doors. It rides easy on extra long springs fitted with rebound snubbers. The tires are large (35 x 4.) This car will not jolt you or the machinery. It keeps its good appearance.

Model "3" has electric lights all round, canopy light under cowl, and extension trouble lamp. It is equipped with Gray & Davis Electric Starter, clear vision built-in windshield, mohair top with dust hood, besides the usual accessories, tools, etc.
