

becoming hard to control, hyoscin $\frac{1}{20}$ was administered, calming him somewhat but producing no sleep. He had egg-nog oz. vii, at 6 a.m. and breakfast of toast and milk at 7:45 a.m. Becoming uncontrollable and violent, hyoscin, grs. $\frac{1}{25}$ was administered at 9:30 a.m., keeping him quiet until 1 p.m., when he was given a sponge bath which proved very refreshing. During all this time his respiration remained natural and his pulse about 50.

Following is a chart of his case from this time on :

Date.	Temp.	Pulse.	Resp.	Urine	Stool	Medicine.	Nourishment.	Remarks.
Nov. 22								
2:30				1	1	Hyoscin 1-50		
3							Milk oz. vi.	
5		50	nor'al				Egg-Nog oz. iv.	
5:30							Toast Biscuit	
8							Milk oz. vi.	
10						Hyoscin 1-50 Strychnin 1-60	milk and coffee.	
10:30							Milk oz. vi.	
11		46						
11:30		46						
12		46		1			Egg-Nog oz. vi.	
1		56				Hyoscin 1-50 grs. Strych. 1-60 grs.	egg-nog oz. viii	restless.
1:30		60						sponged.
2								
3				1			hot milk	
5						Hyoscin 1-50 grs. Strych. 1-60 grs.		restless but not noisy
5:30		56					glass of milk	
6					1 full			
8		48						
10							albumen oz. iv	noisy.
10:30							egg-nog	
11:30							albumen oz. vi	
1 p.m.		60					dinner	quiet.
3							oyster soup	
4	99 2-5	60	20		1		m'k. coffee oz. vi	
9:30						Hyoscin 1-50 grs. Strych. 1-60 grs.	milk oz. vi	
24th.								
12:30							milk oz. vi	
1						Hyoscin 1-50 grs. Strych. 1-60 grs.	milk oz. vi	very restless.
2		66						quiet.
4:30							milk oz. vi	
5:30							milk oz. vi	
7:30	100	46	20					awake & rational
