

We've put the knowledge and experience of years into the Oxford Chancellor Range. We've constructed it on lines that give the best and quickest cooking results for the amount of fuel burned, the fire-box being accurately proportioned to the oven. The

Oxford Chancellor Range

is built of cold-rolled, patent-levelled, Bessemer steel plate, closely riveted with the best quality rivets, insuring great durability and gas-tight construction. It is lined with asbestos mill board to economize the heat. The ornamentation is rich but easily kept clean.

The Oxford Chancellor is as easily controlled as a gas range, the damper, though very powerful, is simplicity itself. The range may be fitted with grates for wood, or soft or hard coal. Ask your dealer to show you an Oxford Chancellor, or write to us direct for full particulars.
