SPECIAL ATTENTION GIVEN TO MAIL ORDERS.

The Capstan Manufacturing Co., Toronto, Ont., Can.

MADE IN CANADA

FAIRBANKS WOOD-SPLIT PULLEY

The Best for Saw and Planing Mills

This pulley is not an experiment but has been sold for several years past all over the United States, and the universal satisfaction it gave and the success it met with prompted us to manufacture in Canada.

It has a reputation superior to that of any other Pulley for merit of design, workmanship and finish. The web construction (see cut), built in the rim, not only strengthens the entire Pulley but makes it impossible for the rim to work loose at the arm.

Each segment is not only glued but nailed with three nails to the next one. Four joint bushings are used, giving twice as much grip on the shaft as in the usual two piece bushing.

The merits of any article are best proved by a trial. Send us a trial order the next time you want any pulleys. We carry a large stock and with our factory in Montreal can supply any special pulley in 24 hours if not in stock.
