The building trade continues very active. The chief trouble in this industry is the scarcity of materials.

There is very little pessimistic talk about collections this week. For a few days some of the houses said there was a slight slackening, but in the last few days payments have been very satisfactory. ommend Tanlac, for it certainly fixed

Loyalty to London

Londoners each year in buying goods in Detroit and Toronto that should be bought right here in our home town, I heard a lady remark just this week "I must go to Detroit

week, "I must go to Detroit to get my fall suit right away." I asked her how much money her husband made in Detroit,

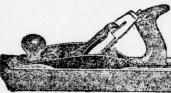

ner husband made in Detroit, and received only a stony glare for reply. Of course, a good many women like to talk about getting their hats, clothes and shoes from Detroit because it makes the other woman jealous and sore, but if they only realized the harm they are equising is send.

but if they only realized the harm they are causing in sending their good Canadian money away from home they would refrain from doing so. I venture to say that there are no finer values anywhere than what may be had at our drygoods, milinery and shoe stores. Every dollar sent out of the city is a dollar lost to London, and every dollar spent here remains with us. Let your iron men help to boost London.
