SIAM'S CAPITAL HELD BY ENEMY

Nationalists Fighting For Constitution Soon in Possession of Teheran.

TEHERAN, Persia, July 13.—Recent events in Turkey are being repeated in Persia. The Constitutional forces of the advance of which on Teheran for a time was not considered serious, are now in possession of the greater part of the city, which they entered this morning without encountering an organized resistance.

While the leaders in the movement concentrated the attention of the Royalists by demonstrations to the west, a strong body of Nationalists and Bakhtiari made their way unnoticed around to the north, from which point the capture of the capital was not difficult.

The guards at the north gate were dispersed and the invaders marched in, the foreign section leaders taking up their quarters in the old Mellies building.

This gives the Nationalists command of the city, with the exception of the artillery square and the main thoroughfare. The Royalists are badly situated to make further resistance, and the Cascocks, under command of the British, remain outside the city, entirely cut off from their comrades in the artillery square.

The strictest discipline being maintained by the Nationalists. The Nationalist leader in a note to the Russian and British legations guarantees security of life and property to foreigners, which could be used in hauling out heavier cables. This work is now done with guns.

Has a Wireless Dirigible For Wrecked Ships

U. S. Inventor Interests European Govts. in Wonderful Marine Life-saving Device.

NEW YORK, July 13.—The Herald says: In a private test before representatives of one of the European governments, Mark O. Anthony, an electrical engineer, last Saturday afternoon succeeded in sending a small dirigible balloon, controlled by wireless electricity, out over the ocean near Sandy Hook, a distance of one mile and a quarter, directing the movements of the craft by manipulation of an ordinary keyboard on the beach.

During some of the flights a brisk breeze was blowing in shore, but the little dirigible, with its large propeller, at all times made good headway and appeared to be much steadier and to travel faster than other and larger balloons which have been operated by a pilot aboard.

Anthony declared that what he had already done proved to the satisfaction of those who saw the model work that it could be used successfully at life saving stations and that it could be inflated from large hydrogen tanks and sent out over a ship one mile from shore in less time than surf boats could be used.

He explained that in his life saving service the dirigibles would be used chiefly for carrying small life boats, which could be used in hauling out heavier cables. This work is now done with guns.

DISORDERING THE ED'S LIFE

Has Two Interviews With President Ross—Damages to the Phalen Seam.

GLACE BAY, N.S., July 12.—(Special)—Reports have been rife that Bishop Cameron (Roman Catholic) was using his influence to end the strike. These were revived this morning when President Ross arrived on a special train and proceeded immediately to the Glebe House in the Bishop's automobile. Later he had a long interview with his lordship.

His lordship, Bishop Cameron, did me the honor of calling on me at my house in Sydney, which distinction I appreciated very highly and I have to-day returned his lordship's call.

The chief topic of conversation was naturally the present labor troubles, and his lordship was imbued with anxiety over the danger and distress which might result among his people at this critical period.

Impressed by the lofty humility and earnestness of his sentiments and assured him that all danger of possible violence had been removed by the presence of the troops and that furthermore, when the unfortunate strike was over, our managers and officials had been captured and every means taken to remove all cause of bitterness and re-orientation. I further stated that it would be our policy to give every man now absenting himself a chance to get back to work.

I heatedly before saying anything to the newspapers about these interviews which were really of a personal and friendly character, but I informed his lordship that his interest in the present situation was particularly presented in some quarters, and I think it only right to say that his lordship's sole object is to do what he possibly can to bring about a settlement, as the honored leader of a church which embraces a large body of our employees, to prevent harm and distress befalling these people.

A Midnight Conference.

President Ross has been around the collieries all day and this is taken as an indication that he considers the situation very serious at the collieries. At midnight Manager Duggan and other prominent officials were summoned to a conference with the president, about a mile from the town. No. 2 is the largest colliery in Canada. This is the U.M.W. colliery, and it has resumed work yesterday, with less than 100 men in the pit. One thousand seven hundred men is the usual force engaged at No. 2. The president and his staff, together, that an output of 240 from this colliery when it is capable of turning out 400 tons of coal.

The following reply was received, signed by President Alphonse Verwill, M.P.:

"Congress authorizes endorsement of the United Mine Workers' strike, and demands recall of militia, there being no disturbances."

May Call More Troops.

A well defined report was persistently circulated to-day that more troops, about 150 in number, were to be brought to Glace Bay in order to more efficiently look after the strikers and their families. The soldiers are not now located at all the mines, owing to the charges to break up the strikers in small sections. The report to-day was that the soldiers would be brought from Quebec, that they would be sent to the site of the first Marconi wireless telegraph station, known as Table Head, is now the camping ground of the larger portion of the troops.

According to a statement by an official of the company, there will be great loss to men, company and government on account of the strike. Serious damage is being done to the Phalen seam, especially the south side.

This is the seam from which the Steel Company must be supplied with 80,000 tons of coal per month. All the mines, with the exception of Nos. 7, 8, 10, 12 and 14, are on the Phalen seam.

In ordinary times, it takes three times as many men to look after the south as the north side of the seam, in repairing the roof. In spite of this, the men on the level fall in at times. Men must be up work constantly, or else the roof timbers begin to break, large sections will come down. If such a break occurs, it is a matter of seconds before the roof will fall. Therefore the police had their quarry fairly bottled.

'Torpedo Motor' Solves the Problem Of Cheap and Fast Railway Service

When the passenger travel is light and the revenues moderate and patrons of branch lines ask for frequent, modern and fast service, what is a railway to do?

That is practically the plaintive protest of the C.P.R. and G.T.R. when the matter of suburban service is broached.

The Northern Pacific Railway has solved the problem by adopting the "torpedo motor" in place of trains hauled by steam locomotives, and has placed one of the new type of passenger carriers in service on a Minnesota-Wisconsin branch where the passenger service is light, but made up of a particular class of people who want the best and insist on having it. The new car is gasoline driven, and under one roof houses passenger accommodations, space for baggage and mail, and its own power plant. Gasoline engines drive it and the tests, made on a stretch of suburban track between St. Paul and White Bear, LaSalle showed a speed of a mile a minute.

The new car has an odd appearance and is unique in its general design. The forward end is pointed like the prow of a ship, and offers little resistance to the wind. There are few projecting ventilators, or other devices to retard speed. The engineer has his station in the forward end of the car, which is controlled by air-brakes the same as a railway train.

The rear portion of the car is fitted up handsomely for passenger accommodation and forward of the passenger compartment is a space for baggage and mails.

Exhaustive tests show that the car is under perfect control, is capable of a maximum speed greater than is ever required in branch line service, and is very economical in the consumption of gasoline.

The success of the tests will be followed by the abandonment of steam service and the substitution of the new type of motor on many branches where the traffic is light.

EXPERT ON TUBES TO BE CHOSEN FOR CITY

J. W. Moyes' Name Sent on by Special Committee to City Council as Engineer to Make Report.

The recommendation that J. W. Moyes be appointed "by the city to make a report on the most practicable means of installing an underground or "tube" street railway system, and that \$500 be provided therefor was made by the special civic committee chosen to investigate the merits of Controller Hocken's proposal yesterday afternoon. The matter will come before the city council at Friday's meeting.

Moyes was formerly engineer of the Metropolitan Railway, and it was he who prepared the viaduct plans for the board of trade under Controller Hocken, who was made chairman, suggested that an engineer who had handled street railway problems should be appointed to report on the districts that could be served best and at least cost by an underground system.

Ald. McChie thought City Engineer Rust capable, but the controller objected that his hands were already full. Mr. Rust said he was willing to make a preliminary report, remarking that some years ago he had reported in favor of shallow as against deep tubes for the city.

The chairman, however, proposed J. W. Moyes. Mr. Rust replied that all Mr. Moyes had done was to operate the Metropolitan Railway, and that he considered his knowledge equal to that of Mr. Moyes. If an expert were appointed it should be someone who had built the tubes.

Controller Harrison thought diagonal tubes too expensive and that an underground line up Yonge-street to the C.P.R. tracks with surface lines east and west would fill the bill.

Controller Hocken believed the ideal system would have lines radiating east, west and north from the centre of the city, but that the cost, \$12,000,000, was prohibitive.

Ald. Baird held that a line to the northwest section was needed, rather than one up Yonge-street. A passenger could get on near the C.P.R. crossing at Yonge-street, and be taken down town in 10 minutes, while to reach the centre of the city from Keele and Dundas-streets took 35 minutes. 4000 passengers are taken to Toronto by rail. A diagonal tube was the only solution, as even by having a surface line in the north and from there several roads to the northern terminus of the Yonge-street tube, no time would be saved. He opposed Mr. Moyes' appointment, because the latter had formerly been connected with the street railway, but the chairman said there was reason to believe that the Controller's suggestion was prejudicial to the city's interests.

Controller Harrison's motion to appoint Mr. Moyes was supported by Controller Hocken, Ald. Baird and McMillin, with Ald. McChie and Baird opposing.

POSTPONE SERVICE BILL TILL GOVERNMENT'S OUT

House of Lords Vote Against Present Interference With Secretary Haldan's Program.

LONDON, July 13.—The house of lords to-night, by a vote of 123 to 103, decided not to proceed with the national service bill, which Lord Roberts introduced in the house yesterday. The bill provided for the compulsory service in the territorial army of all male citizens between the ages of 18 and 30.

The decision of the house of lords was taken at the advice of the Unionist leaders, who considered it inadvisable to interfere with War Secretary Haldan's scheme for the reorganization of the territorial forces, until a change of government should make it possible to introduce some such idea as proposed by Lord Roberts.

WHITE GIRLS—YELLOW MEN

Twenty Dollar Bill Leads to Arrest of Two Women.

Two more white women who frequent Chinese resorts were gathered in by the police last night. Bradley, who was arrested with Ellen O'Dare, both of 243 Simcoe-street, who admit that for some time they have been engaged in a scheme to defraud a Chinese man, who declared that the girls had robbed him of a \$20 bill, which is the same as the Chinese, which is the same as the O'Dare girl, who, with Miss Bradley, was jolting the "chinks" in the street, and threw it back. They say they do not know what became of the money.

FAN TAN GETS GRANDSLAM

RAID ON QUEEN ST. GAME

Twenty Chinamen were gathered in to the police net from a Celestial resort at 194 York-street last night. One is charged with keeping a common gaming house and the others as frequenters. All were added to bail, the keeper in the sum of \$600 and the frequenters at \$250.

If you recognize any of these names your laundry may be late this week.

When the police court clerk starts in this morning this will be part of his patter: Keeper Wong Yoo, 194 York-street; frequenters, Yip Yook, 105 1-2 West Queen; Lew Hip, 276 West Queen; Wong Sing, 107 College; Wong Ching, 115 West Queen; Tom Hing, 192 1-2 York; Ing Sing, 99 West Queen; Lee Sing, 184 York; Lee Wing, 115 West Queen; Lee Ching, 14 West Adelaide; Low Ching, 194 York; Chun Chip, 144 West Adelaide; Wong Dow, 115 West Queen; Charlie Chan, 194 York; Sam Sing, 807 Bathurst; Lung Low, 194 York; Ho Ping, 194 York; Lum Dow, 194 York; Tom Sing, 194 York.

At 9 o'clock a whole drove up York-street. It stopped before No. 194 and four large-sized men leaped out. They were Inspector Davis and Plainclothesmen Sackett, Riley and Sanderson. They dashed in at the doorway and thru two more doors in the hallway and came upon a stairway leading into the basement. They were met by an up-coming rush of Chinese, whom they turned back by the weight of their onslaught and were in time to see a number of frightened Celestials grabbing fan tan beads and money from four tables, which were being overturned in the melee. Inspector Davis made a jump for \$10 in silver and got to it before the yellow hand of a Chinook could sweep away this evidence of more than a merely sporting interest in the queer game which had been in progress.

This raid, as nearly all Chinese raids are, was made upon complaints made by disgruntled Chinese. It was in this way that the police chose the exact time and were so well able to travel a direct route to the room where the game was in progress. The police will not give away the names of their informants.

An unusual feature of this place, which in the directory is given as Kong Wob Lung Company, grocers, was that from the cellar, in which the game was being played there was no second exit. Therefore the police had their quarry fairly bottled.

EVILYN THAW REFUSES TO ADMIT A THREAT

State Tries to Show That Harry Thaw Threatened That He Would Kill Her.

WHITE PLAINS, N.Y., July 13.—Evelyn Nesbit Thaw, pretty, petulant and school-girlish, and dressed in the blue which she affected so much during the trial of her husband, Harry K. Thaw, for the murder of Stanford White, was before Justice Mills in the supreme court here to-day, supported by the state in its fight to keep Thaw in the asylum for the criminal insane at Matteawan.

Deputy Attorney-General Clark tried hard to get her to admit that Thaw had threatened her life when she visited him on one occasion at Matteawan, but she repeatedly refused to answer, and after a clash between counsel Justice Mills ruled that he would hold the conversation a confidential one between husband and wife, and therefore privileged, unless the state presented proof to show that Daniel O'Reilly, the New York lawyer, present at the time, was not then acting as counsel for both Mr. and Mrs. Thaw.

This Clark promised to do. His question was:

"During that conversation did Harry Thaw say to you or words to this effect: 'When I get out of here I will have to kill you.'"

The tears came to her eyes once when Justice Mills ruled against her, and she turned to him and said: "I guess I will have to obey, for I cannot afford contempt proceedings or go to jail. My husband is not paying me anything now and I have not enough money to hire counsel."

Frank Toomey, Thaw's bodyguard for five or six months at Matteawan, said that Thaw had exhibited no irrational tendencies during the time. Many little suggestions made by Thaw had been acted upon, greatly to the improvement of the management of the institution.

The state has retained Dr. Austin Flint and Dr. Charles B. McDonald, who with Dr. Amos E. Baker of Matteawan, will make up the state's trio of alienists along lines agreed upon by counsel yesterday. The mental examination to test his sanity is to be conducted in open court by the lawyers prompted by the experts.

ONTARIO GOVERNMENT CHOOSES WELL-KNOWN EXPERT TO REPRESENT PROVINCIAL INTERESTS

Mr. Kelly Evans Appointed Commissioner to Investigate and Report Upon the Fish and Game Situation in Ontario.

A. Kelly Evans has been appointed a commissioner by the Ontario Government to investigate and report upon the fish and game situation in Ontario.

Mr. Evans was formerly connected with the street railway, but the chairman said there was reason to believe that the Controller's suggestion was prejudicial to the city's interests.

Controller Harrison's motion to appoint Mr. Moyes was supported by Controller Hocken, Ald. Baird and McMillin, with Ald. McChie and Baird opposing.

PREACHER'S WIFE DEAD

POISONING SUSPECTED

CHATHAM, July 13.—(Special)—Mrs. Edson, wife of a colored preacher at North Buxton, died under suspicious circumstances Sunday night.

She had been treating with Dr. Bell of Merlin, for stomach trouble. He paid a visit to her last Wednesday and found her improving. Between Wednesday and Sunday, Edson telegraphed to his wife's relatives in Chicago that she was dying, and to be prepared to receive her body. He did not call the physician, however.

On Sunday afternoon, Dr. Bell accidentally called at the Edson home and found the woman dying and unconscious. He held a consultation with Dr. Oliver and neither could understand the woman's condition. She died Sunday night and both doctors refused to give a certificate for burial unless an inquest was held. It is said the husband strongly objected to a post-mortem, but was finally induced to consent. All organs in the body were found to be in a healthy condition, with the exception of the stomach.

Crooner Bray of this city conducted an inquest and the stomach of the woman has been sent to Toronto for analysis.

MAY BECOME ARCHBISHOP

OTTAWA, July 13.—Rev. M. F. Fallon, D. D., formerly of St. Joseph's Church here and now of the Holy Angels College at Buffalo, is regarded as most likely to be elevated to the vacant position of archbishop of Vancouver.

MANY MEN THINK SO. A STATEMENT OF FACT.

It were easier far to catch the man in the tower's girdle than to define the charm and exquisite comfort of a Straw Hat from Dimeen's. Some are \$2.00, some are \$2.50. What you get is more important than what you give. Quality is remembered long after price is forgotten.

PRESIDENT ROSS KNEW

Entirely in Accord With Actions of His Officials.

MONTREAL, July 13.—(Special)—A rumor was published in Toronto this evening that the president of the Dominion Coal Co. had been deceived by his officials to the effect that 500 men would continue to work, and that Mr. Ross was now endeavoring to settle the strike. A wire having been sent to the president, he replied as follows:

"Glance Bay, July 13.—The story published in Toronto is absolutely false. I have been fully in touch with the situation from the first and am entirely in accord with the action of the company's officials. I have announced that the company will never meet the representatives of the U. M. W. A. This is final."

PROVE INNOCENT AT LAST

Man Sentenced for Stabbing, When Glass Caused Wound.

CHATEAU, July 13.—(Special)—Robert Hallinan, butcher, had a piece of glass removed from his back to-day. It had been in his body for twenty-two years.

New Year's night Halinan got mixed up in a fight in the Idlewild Hotel. He fell thru a window. Afterwards, it was discovered that he had a wound in his back. He was taken to the office of Dr. Springer who thought it must have been inflicted with a knife. Quigley, the man he was fighting with, was then accused of sticking him in the back with a knife and was sentenced to six months for his supposed deed.

No glass was found in the wound at the time, and only now has it made its appearance.

INVITE BRITISH BOWLERS

Ontario Association Will Ask East and West to Join With Them.

NIAGARA-ON-THE-LAKE, Ont., July 13.—(Special)—The twenty-second annual meeting of the Ontario Bowling Association, was held to-night. The following officers were elected: Hon. patron, Lord Strathcona; hon. president, Wm. Brown, Westmount; president, D. Baxter, Hamilton; president, first vice-president, Dr. L. Robertson, Stratford; second vice-president, J. Warren, Parkdale; hon. secretary, Colin Postlethwaite, Canada; Toronto; hon. assistant secretary, A. E. Kusner, Toronto; Toronto; auditors, Thos. Renne and R. J. Keenan.

On motion of E. T. Lightbourne and M. J. McCarron the article in "Courier and Bowler" roasting the Canadian team to British Columbia was severely condemned, and the thanks of the association were extended to the team for the worthy manner in which they had represented Canada.

Dr. Russell, secretary of the team, moved that an invitation be extended to the British bowlers to visit Canada in 1910, and that the western and eastern associations be requested to join in the invitation.

The following clubs were elected to membership: Weston, Tillsonburg, Whitby, Barrie, Oakdale (Toronto), Victoria (Hamilton).

TO FLY ACROSS CHANNEL

CALAIS, France, July 13.—Inventor Latham completed repairs on his flying machine to-night and contemplates taking advantage of the improved weather conditions to make a dash across the channel to-morrow at day-break without further trial flights.

SUFFRAGETTE PRISONERS UNRULY

LONDON, July 13.—The suffragettes sent to Holloway Jail on charges of disorderly conduct during a meeting to present a petition to Premier Asquith following the tactics inaugurated by Miss Dunlop, and in addition to refusing to eat, they decline persistently to change their street clothes for the prison garb. The rules of silence also are ignored.

A SPLENDID OFFER.

Have you taken a few minutes to think over The World's offer for clubs in the big \$15,000 contest that has aroused such keen interest throughout Ontario? If you have not look inside and see the opportunity extended to you. Every candidate should jump at this chance to pile up votes.

EUROPEAN BUTTER NOW

July 13.—A special report from the Wood River butter plant is that the product will be known as "Wood River Butter". It is said to be the best in color, lasts a longer time than real butter and does not rancid.

THE WESTERN CROPS.

WINNIPEG, July 13.—(Special)—Reports from the Ogilvie Flour Mills Co.'s inspectors and buyers continue most satisfactory. Splendid rains have fallen in all sections of the prairie provinces and a number of points claim wheat further advanced than at a corresponding period last season.

THE MAYOR PROTESTS.

Major Douglas is proving a thorn in the side of the Coal Company. He has written to the Ontario Association of Coal Producers, asking them to support his protest against the company's proposed coal tax.

THE WESTERN CROPS.
