which have been more or less prominent of late.

Public interest was not very pronounce in the dealings, but this was as true of sellers as of buyers and at no time was there any congestion of stock on offer. The floating supply of mining shares in the market is not very large and to this fact alone is due the appearance of firmness which has been apparent since the break in the market last week.

The only issues which showed any disposition to sell off to any extent were Foster and Timiskaming, and even in these cases the loss was not of much moment. Considerable profittaking in Foster stock is being indulged in at the present level by those who got in before the rise last week. The shares were off a point at 43 to-day. Beaver, Peterson Lake, Rochester, sliver Leaf and Silver Bar were all decidedly firm, with higher prices recorded in cases. Timiskaming lost a point for no apparent reason other than that the stock offered found few layers.

Le Rose was steady around yester—would help this market letter says: What would help this market more than any—interest the same would help this market more than any—interest the same was steady around yester—would help this market more than any—interest the same heads to show the same say the desired samples from Vein No. 6
Shown at Local Brokers.

Messrs. Warren & Gzowski, brokers, Traders' Bank Building, have just received some spiendid samples of ore from the Otisse Mine at Elik Lake. The samples were taken from No. 6 vein we samples were taken from No. 6 vein which was discovered about a month ago at the 75 foot level in

week's developments have not resulted in a general slump as some market followers predicted.

SPECIAL MINING REPORT Rumored That Syndicate Contemplates

Buying Block of Trethewey.

GENERAL MANAGER WATSON Did Not Favor the High Dividend Paid on La Rose Stock.

Shirley Ogilvie, in discussing the adverse comment by certain outside in-terests directed against the new man-agement of the La Rose Consolidated Mines, in their decision to cut the d vidend, and otherwise advise the public as to the exact condition of the affairs as existing within the company, says that it is a well-known fact that R. B. Watson, the general manager of the company, has been always very much against the policy of the former management in placing the stock on a 16 per cent. basis, that is three per cent. quarterly, with a one per cent. bonus.

Mr. Watson's policy, as outlined by him before, has been to accumulate a decimal of the control of the cent. large cash surplus and to develop the other claims of the company, also be expected that the La Rose min itself'could furnish sufficient money to pay dividends at the rate of 16 per cent and to obtain the objects aimed at by Mr. Watson. The present directorate believe that the general manager's policy was in the best interests of the shareholders, and have made up their

minds to carry it out.
"The directors," said Mr. Ogilvie, announced their policy on the divi dend long before such announcemen was necessary to be made, in order to show their good faith both to the shareholders and the public. Had we not made the cut in the dividend when we did all the trades in the stock up to

Those Who Speculate

Should be willing to take small profits in the mining market at the present time. Holders of Foster and Rochester who bought before the recent rise should get out and await developments.

You can pick up most of the low-priced issues on weak spots, but there are some which we would not care to carry, except for a speculation of this kind.

La Rose can be safely bought for a turn. Trethewey is good, and if bought now will show a satisfactory turn a little later.

For other stocks write us.

A. J. Barr & Co., TORONTO.

Members Standard Stock Exchange

The Majority of Listed Cobalt Stocks

Are selling at bargain prices. There will not be an immediate allround improvement that will hold, but stocks can be bought now and held for profits within a comparatively short time—advantage being taken of quick advances to liquidate and wait for a reaction. Investors can buy and hold the good stocks for future benefits, and speculators should take advantage of quick declines to buy, and sell on sudden advances. This advice applies, to the whole Cobalt market at present market at present.
