

British Columbia.

BELLA COOLA.

Bella Coola, May 20.—The weather is very nice, and although this has been considered a very late spring, all the garden planting is done and most of the plants are up and give good promise.

A large bridge over the Bella Coola river is now going up and soon will be finished. Town lots are now being surveyed, and a town site laid out. The location is very beautiful.

Mrs. O. Swidahl, who increased the population with a bouncing baby boy some time ago, has been very sick some time, and there is regret that no doctor is located at or near this place.

The health condition in general is very good. The school children are preparing to celebrate the Queen's birthday.

The settlers are generally annoyed over the irregularity of the arrival of the mail at this place and would be pleased to see more regularly established.

The case of Rickards vs. Newton, in which the plaintiff made application for the ejectment of defendant from the premises owned by the latter, was tried before Gold Commissioner Lambly at Osoyoos on the 21st instant.

The case of Rickards vs. Newton, in which the plaintiff made application for the ejectment of defendant from the premises owned by the latter, was tried before Gold Commissioner Lambly at Osoyoos on the 21st instant.

and the Gold Drop in Long Lake, represent the class of people one is glad to see investing in Boundary Creek. Both are wealthy and enterprising men and the claims into which they have bought will doubtless be well prospected this season.

A gang of men is to be put on the road on the 1st of June, and this will not be a bit too soon. Appropos, when will there be money available for widening the highway? Under the present state of affairs, fatal accidents may at any time occur, supposing a heavily laden wagon were to meet near some of the spots overhanging precipitous descents, where "backing" is hardly possible.

Mr. Mitchell, a bricklayer by trade, now working at Midway, located last year a placer claim near Rossland. Later on a quartz location was made by two men on the same ground, but the respective owners came to an understanding of a mutual ownership of the property.

The case of Rickards vs. Newton, in which the plaintiff made application for the ejectment of defendant from the premises owned by the latter, was tried before Gold Commissioner Lambly at Osoyoos on the 21st instant.

half-dollar of the issue of 1894 was received by a local merchant last week. As far as we can ascertain no others are in circulation, and it does not appear as if any effort, similar to that of last year, was being made to push spurious coin in the city.

No better weather could be desired by the farmers than that which has prevailed for the past few weeks. Warm rains and bright sunshine have caused the crops to shoot ahead at an amazing rate, and the prospects for a heavy yield of both fall and spring wheat were never better than this season.

Mr. Charles Malin, of Kelowna, left on Friday for Prince Albert, N.W.T., and it is probable that he will not again return to the country. His many friends will sincerely regret to hear that business difficulties, principally connected with land speculations in the Northwest have forced him to make an assignment and his affairs in this district will be wound up for the benefit of his creditors.

What came near being a very serious accident occurred on Saturday evening, when Miss Zillwood, who was riding in company with a party of friends on the road near Swan Lake, was thrown from her horse and dragged some distance, her foot having been caught in a stirrup. The horse was going at a brisk canter, when in some way Miss Zillwood lost control of the animal and was thrown.

were Patrick Keough, William Armstrong, John Wright, Charles Magee, William Delapp, W. Sturdevant, Edwin Goodall, Robert Eastwood, John Burring, Alfred McNeil, Thos. Pearson, D. Morrison, W. C. Gabe, Henry Taylor, John Knowles, Doc Lewis, John McGarrigle, Ralph Jarvis, Nick Horton, L. Lewis, M. T. Fitzgerald, John McNeil, A. Forest and O. P. Humphreys.

The party represent the 43rd Mining and Milling Company of Ottawa, and the superintendent, Colonel Wright, with Fred Valleau and Doc Bittoway, made the trip into the same district they now are starting for last season. They have some valuable ground located and are the pioneer company to operate on a large scale in the Omineca country.

Mr. Drummond, who for over a year has been on the Montreal Company's ground on Queneville river, Cariboo, was in town Tuesday evening and left for the coast the same night. To the Journalist Mr. Drummond said: "We have now about 1000 feet of shaft drifts and tunnels and are thoroughly satisfied with the outlook of the property. A drift one thousand feet long with uprisings into the bank develops the entire bench for that of shafts and tunnels in places on this drift, but it seems to be an old channel and water gives much trouble in sinking. Shafts at other places along the river have been sunk and there is no barometer in the gravel; the grade of the gravel varies much, but there is none. Mr. Drummond thinks, but that will pay well for working."

Ex-Mayor R. A. Anderson, of Vancouver, accompanied by W. H. Hoeg, promoter of the Granite Creek and Tulamene hydraulic mines, went up on Monday's stage to visit and expert some bench ground on the lower end of Light-bear Creek where Mr. Anderson has an option on three leases held by J. Boyd and others.

LAURIER ENDORSED

Manufacturers Address an Open Letter to the Liberal Leader.

Warm Expressions of Confidence in the Liberal Trade Policy.

To the Hon. Wilfrid Laurier.

Dear Sir: Much is again being urged by those opposed to you in politics as to the disastrous effects on the manufacturing interests of the country which they claim and profess to believe would follow your accession to power at the approaching elections.

Your many independence during the last session of parliament under the most trying circumstances that could have been imposed upon you shows us that no hasty or ill-considered action would be likely to be taken by you on any important question.

Speaking for ourselves as manufacturers in one of the leading industries in Canada (the manufacture of furniture), we take this opportunity of assuring you that we believe that you are so imbued with the spirit of justice and fair play that manufacturers in any branch of industry need have no fear that they will be treated unfairly in any readjustment of the tariff which may be made by any government of which you are the head.

We realize that the necessity of a large revenue to meet our heavy annual obligations demands such a rate of taxation as must afford to manufacturers a very reasonable protection for an indefinite time.

VITAL QUESTIONS.

We are all other things equal, and thus the only matter requiring the attention of the electors, it could make but little difference to manufacturers as such whether yourself or Sir Charles Tupper should have control in the next parliament; but we believe there are other matters of vital importance to the welfare of the Dominion which should receive consideration at the hands of the electors at the present time, and in considering them we are bound to keep in view the character and records of those asking our suffrages.

As business men we believe that the government of the country should be conducted on strictly business principles, and that those entrusted with it should not only be capable, but free from any taint of scandal. The general trade of the country was never in a worse condition than it is at the present time, whatever politicians may say to the contrary. We therefore take the liberty of placing before you a few things which we believe as business men would assist in restoring confidence and prosperity in the country. We would like to see:—

- (1) A more rigid and economical administration of public affairs.
(2) An honest administration, guarding the public funds and rendering impossible the scandals which have disgraced Canadian politics in recent years.
(3) An active immigration policy for the people of our great Northwest and the consequent extension of the home market for our manufactures.
(4) The development of our mineral resources.
(5) A policy that will weld together rather than sow the seeds of dissension among the different creeds and nationalities that compose our population.
These are a few matters which suggest themselves to our minds, and it is because we have the highest regard for you as a statesman and an honorable politician that we feel that under your guidance the affairs of the country would be carried on in the best interests of the whole Dominion. We are etc., etc.

A GOOD SUPPLY OF RAZORS.

Horrifying and Determined Attempt to Get Rid of Life.

Joliet, Ill., May 30.—Antonio Patta, a young Italian, thought to be from Buffalo, N. Y., ended his existence in a horrible manner last night at Montana, a small station a few miles east of Joliet, on the Rock Island road. He attempted to board a freight train, and falling off the wheels, had both legs cut off. In his frenzy Patta took a razor from his pocket and drew it across his throat. The horrified spectators took the razor from him, but he drew a second one from his pocket and managed to make a deep cut before he could be prevented. Then in his delirium from pain he grasped the gaping wound and sought to tear the flesh. In a few minutes he fell over dead.

ROYAL Baking Powder

has been awarded highest honors at every world's fair where exhibited.

MIDWAY. Midway Advance. The Advance is a victim this week to the tariff laws and red-tapeism; here the bilious-headed paper on which the weighty happenings of Boundary Creek for the last seven days are chronicled. The paper as usually used in this office was ordered from Spokane nearly seven weeks ago, but through vexatious and needless delays at the customs house has not yet reached its destination. It is unfortunate for the Liberal cause, for \$20,000, the first country is not a newspaper proprietor, for let a man's private interests be in any way affected by a public policy and he at once develops a passion for reform.

As the mines of the district are being known, owing to the obscurity of some of the local assayers, that a large variety of metals are to be found in the east of the district, some of which are of rare occurrence. In making an analysis of ore taken from one of the Kinger mountain claims the other day, Mr. A. Guess, of Midway, discovered that it contained, greatly to his astonishment, two rare metals, or combinations of metals, viz, selenite, or telluride of silver, and tellurite, or telluride of gold and silver. The ledge containing is associated with pure gold and carbonate of iron, or siderite, and so far as known it is the first time it has been identified as existing in ore from any of the camps in this vicinity.

Several important transactions were consummated last week. On Thursday Mr. John Weir bonded, on behalf of the American Exploration company, a wealthy and powerful association of eminent realtors, the Copper claim, in Copper camp, for \$20,000, the first payment being made on that day. The balance is to be paid over in six months if the claim proves after so much development anything like as valuable a property as the magnificent indications seem to promise. The showing on the Copper is marvellous. The ledge can be traced for over 4,000 feet, and varies between 50 and 80 feet in width. The ore is copper, in the form of red oxide, native copper, and copper glance, with a small percentage of gold, and runs from 6 to 35 per cent. in copper. Besides the copper, three other claims—the No. 7, Rob Ray and Falcon—have been bonded for Mr. Weir and his associates. All three claims are in Atwood's camp. The No. 7 was located by Mr. J. Atwood, E. Lefevre and J. Schell. There are three parallel veins on the claim, and all three carry the same character of ore, a high grade silver and gold. Picked samples have run over \$800. The No. 7 is geologically interesting from the fact that it is one of the most perfect examples of a concretion vein to be found in any country. The footwall consists of a peculiarly soft mica schist, and the hanging wall is a granite or trachyte of very close grain. The Rob Ray, an east extension of the No. 7, was located in the fall of '94. It was abandoned by the original holder, Mr. Mangott, of Fairview, on account of the fall in the price of silver. The ore is of the same character as the No. 7. The Falcon is likewise an easterly extension of the No. 7.

Dan McClung has bonded a claim near Catherine Creek to Spokane parties. Captain Hall is visiting Fairview camp with a view to handling properties there. Mr. Munroe has staked a claim at Grand Prairie. The ledge crosses the wagon road. Work will soon be commenced on the ledge at Long Lake. The locoman of the Cariboo at Camp McKinney was in Midway on Wednesday looking for miners to work in the mine.

Mr. Lefevre has returned from prospecting on Myer's Creek. He failed, however, in finding anything worth recording. A contract has been let by Mr. Wier for the sinking of a hundred-foot shaft in the Copper. When this work is completed an immense body of ore will doubtless be shown up. A new work is going on at the Gold Drop, Green wood camp. Two shafts 25 feet deep, one of which is down to the ledge with drifts running into the ledge from the foot. Mr. Turner is continuing satisfied with the result of the work so far accomplished.

During the past week some half dozen new claims with farm produce have been bonded in from Concomely. All the ready cash in the place has literally been cleaned up. It is to be hoped that our local producers will not allow this state of affairs to occur a second season. Before leaving Boundary Creek Mr. Wier invested largely in Anaconda town property. A magnificent smelter site was secured by him to the rear of the bank of Concomely, a bench situated on the shore where the stream empties into the Boundary creek.

As will be seen by this week's record, some quite important deals have taken place lately in the camp. Messrs. Gardner and Hay, who have bought into the Gem in Deadwood, and the Jewel

Union News. F. S. Roper, veterinary surgeon of Victoria, has been paying this section an official visit. While here he inspected the dairies from which Union is supplied with milk. He tested several cows about which a suspicion had been raised, but found them perfectly healthy. He examined one cow in Union which was found to be affected with tuberculosis. The animal was condemned and killed. It is only fair to say that the owner reported the case for inspection. He also visited our knife points of the farms where butter is made and found the cattle healthy.

Wellington. Wellington Evening. The two-year-old daughter of Mr. Jas. Dik, of Wellington, was drowned on Thursday afternoon last. While playing on the bank of the creek at South Wellington, she fell into the water and was too far gone when discovered to be resuscitated. It has been reported to us that one of the delegates to the recent convention of the Liberal Conservatives, held at Nanaimo, got there by "travelling in the dark" and was "taken for a ride." The "delegate" referred to called a meeting near his residence (somewhere between Wellington and Alberni), but alas! not one of the "true and independent" electors turned up. Nothing was done, and the worthy "delegate" elected himself chairman, secretary, etc., ad lib., without any serious opposition, and nominated himself a delegate to the Liberal-Conservative convention. Coming from such a strong party of the constitution, he was a conservative pillar of no mean order. Thus another of the "delegates" is accounted for.

New Denver. The concentrator at the Washington will commence running as soon as the water supply is sufficient. A deal is on for the purchase of the Reed and Burt's land, Vanderfoot, Jenkinson and other properties. If successful, a tramway and concentrator will be put in this summer. Messrs. Benedum, Price, Rackliffe, Curtis, Kye, Teeter, and Lorenson own the Howard Fraction, which is a crown land, but it is only right that he should go and thank them for past kindnesses. This is the first visit he has made up the river in many years. I believe why he is making it something so quietly; there must be something in the wind. Have a care, ye who are there. Mr. Askwith, who for some time has owned the Robble Burns mine in the McMurdo district has it reported sold to Mr. Townsend & Co. The property has at present a five stamp gold mill on it, which was worked at the great disadvantage for a sort time in the summer of 1892. It is the intention of Mr. Townsend to again work the mine as soon as the weather will permit. He has also procured the International gold mine, which is a crown grant claim situated close to the Robble Burns. Though they have not yet decided what character of plant to place on it, this will be done during the summer.

Mr. Kingsmill, of Toronto, who was staying at Golden two weeks ago, passed through here this week from West Kootenay, on his way back to Toronto. He has bonded several properties in West Kootenay and has obtained an interest in mines in East Kootenay near and on the C. P. R. near Field. The properties there are yet covered with snow for the most part, but work will be commenced in a few weeks on an extensive scale. Mr. Kingsmill is their representative here. Mr. Kingsmill has, I believe, formed a strong company of Toronto and English capitalists. They intend to pay much attention to East Kootenay this year.

Rossland. The Prospector. Paterson, Johnson & Co., yesterday sold the lot to the west of their office for \$300 to parties from Portland, Oregon. John Y. Cole has put on a force of men to work on the White Bear, which adjoins the Mayflower and San Francisco. The Mayflower vein has been uncovered on the Confederation. The latter claim joins the Hill Top and is one of the Great Republic group, owned by W. D. Pratt and associates. Sol Cameron and Roy Clark not very long ago took a bond on the Mayflower and did some work on it. On Saturday Col. Turner and his associates rebonded it for \$16,000. After an examination of the property, Col. Turner declared that \$30,000 would not buy it now. A company with a capital stock of \$1-

The ledge containing is associated with pure gold and carbonate of iron, or siderite, and so far as known it is the first time it has been identified as existing in ore from any of the camps in this vicinity.

As the mines of the district are being known, owing to the obscurity of some of the local assayers, that a large variety of metals are to be found in the east of the district, some of which are of rare occurrence. In making an analysis of ore taken from one of the Kinger mountain claims the other day, Mr. A. Guess, of Midway, discovered that it contained, greatly to his astonishment, two rare metals, or combinations of metals, viz, selenite, or telluride of silver, and tellurite, or telluride of gold and silver. The ledge containing is associated with pure gold and carbonate of iron, or siderite, and so far as known it is the first time it has been identified as existing in ore from any of the camps in this vicinity.
