

CATARRH HAY FEVER CATARRHAL DEAFNESS

A NEW TREATMENT.

Sufferers are not generally aware that these diseases are contagious, or that they are due to the presence of living parasites in the lining membrane of the nose and eustachian tubes. Microscopic research, however, has proved this to be a fact, and the result of this discovery is that a simple remedy has been discovered which permanently cures the most aggravated cases of these distressing diseases by a few simple applications made (*two weeks apart*) by the patient at home. A pamphlet explaining this new treatment is sent *free* by A. H. Dixon & Son, 337 and 339 West King Street, Toronto, Canada.

N. B.—This treatment is not a snuff or an ointment. Both have been discarded by reputable physicians as injurious.

A NEW HOME TREATMENT

FOR THE CURE OF

CATARRH, Catarrhal Deafness, AND Hay Fever.

THE microscope has proved that these diseases are contagious, and that they are due to the presence of living parasites in the lining membrane of the upper air passages and eustachian tubes. The eminent scientists Tyndall, Huxley and Beale endorse this, and these authorities cannot

be disputed. The regular method of treating these diseases is to apply an irritant remedy weekly and even daily, thus keeping the delicate membrane in a constant state of irritation, accompanied by violent sneezing, allowing it no chance to heal, and as a natural consequence of such treatment not one permanent cure has ever been recorded. It is an absolute fact that these diseases cannot be cured by any application made oftener than once in two weeks, for the membrane must get a chance to heal before any application is repeated.

It is now nine years since Mr. Dixon discovered the parasite in catarrh and formulated his New Treatment, and since then his remedy has become a household word in every country where the English language is spoken. Cures effected by him nine years ago are cures still, there having been no return of the disease.

So highly are these remedies valued, and so great is the demand for them, that ignorant imitators have started up everywhere, pretending to destroy a parasite, of which they know nothing, by remedies the results of the application of which they are equally ignorant. Mr. Dixon's remedy is applied only once in two weeks, and from one to three applications effect a permanent cure in the most aggravated cases.

Mr. Dixon sends a pamphlet describing his new treatment on the receipt of ten cents in stamps. The address is **A. H. DIXON & SON, 337 and 339 KING ST. WEST, TORONTO, CANADA.**—*Scientific American.*
