When they find Scarcity of Game they remove a League or Two farther ; and thus they traverfe throughthefe woody Countries and Bogs, fcarce miffing' one Day, Winter or Summer, fair or foul, in the greatest Storms of Snow, but what they are employed in fome kind of Chace. The imaller Game got by Traps or Snares, are generally the Employment of the Women. and Children; fuch as the Martens, Squirrels, Cats, Ermines, &c. The Elks, Stags, Rein-deer, Bears, Tygers, wild Beeves, Wolves, Foxes, Beavers, Otters, Corcajeu, &c. are the Employment of the Men. The Indians when they kill any Game for Food, leave it where they kill it, and fend their Wives next Day to carry it home. They go home in a direct Line, never milling their Way, by Obfervations they make of the Course they take upon their going out, and fo judge upon what Point their Huts are; and can thus direct themselves upon any Point of the Compasy. The Trees all bend towards the South, and the Branches on that Side are larger and ftronger than on the North Side; as allo the Mofs upon the Trees. To let their Wives know how to come at the killed Game, they from Place to Place break off Branches, and lay them in the Road, pointing them the Way they should go, and fometimes Mofs; fo that they never mils finding it.

In Winter, when they go abroad, which they must do in all Weathers, to hunt and shoot for their daily Food, before they drefs, they rub themfelves all over with Bears Greafe or Oil of Beavers, which does not freeze; and alfo rub all the Fur of their Beaver Coats, and then put them on: They have also a kind of Boots, or Stockings, of Beaver's Skin, well oiled, with the Fur inwards; and above them they have an oiled Skin laced about their Feet, which keeps out the Cold and alfo Water, when there is no Ice or Snow; and by this means they never freeze, nor fuffer any thing by Cold. In Summer allo, when they go naked, they rub themfelves with these Oils or Grease; and expose themfelves to the Sun, without being fcorched; their Skins always being kept foft and fupple by it: Nor do any Flies, Bugs, or Musketoes, or any noxious Insect, ever molest them. When they want to get rid of it, they go into the Water, and rub themselves all over with Mud or Clay, and let it dry upon them, and then rub it off; but whenever they are free from the Oil, the Flies and Musketoes immediately attack them, and oblige them again to anoint themfelves.

The Indians make no use of Honey ; he faw no Bees there but the wild Humble Bee; but they are fo much afraid of being ftung with them, they going naked in Summer, that they avoid them as much as they can: Nor did he fee any of the Maple they use in Canada to make Sugar of, but only the Birch, whole Juice they use for the fame Purpose, boiling it until it is black and dry, and then using it with their Meat. They ufe no Milk from the Time they are weaned, and they all hate to tafte Cheefe, having taken up an Opinion, that ir is made of dead Men's Far. They love Prunes and Raifins, and will give a Beaver-fkin for Twelve of them to carry to their Children; and also for a Trump, or Yew's Harp. He fays the Women have all fine Voices, but have never heard any mufical Inftrument. They are very fond of all Kinds of Pictures, or Prints; giving a Beaver for the least Print: And all Toys are like Jewels to them.

When he got to the Natives Southward of Pachegoia, he had about 30 Cowries left, and a few fmall Bells, lefs than Hawks Bells: When he fhewed one of them, they gave him a Beaver-fkin for One; and they were fo fond, that fome gave him Two Skins, or Three Marten-fkins for One, to give their Wives, to make them fine. The Martens they take in Traps; for if they fhot them, their Skins would be fpoiled; They have generally Five or Six at a Litter.

He fays, the Natives are fo difcouraged in their Trade with the Company, that no Peltry is worth the Carriage; and the fineft Furs are fold for very little. When they came to the Factory in June 1742, the Prices they took for the European Goods were much higher than the fettled Prices fixed by the Company; which the Governors fix fo, to shew the Company, how zealous they are to improve their Trade, and fell their Goods to Advantage. He fays, they gave. but a Pound of Gunpowder for 4 Beavers, a Fathom of Tobacco for 7 Beavers, a Pound of Shot for 1, an Elliof coarde Cloth for 15, a Blanket for 12, 2 Hifthooks, or 3 Flints, for 1, a Gun for 29, a Biltol for 10, a common Hat with white Lace 7; an Axe 4, a Bill-hook 1, a Gallon of Brandy 4, a chequer'd Shirt 7; all which are fold at a monftrous Profit, even to 2000 per Cent. Notwithstanding this Discouragement, the two Fleets: which went down with him, and parted at the Great Fork; carried down 200 Packs, of 100 each, 20,000 Beavers ;. and the other Indians who arrived that Year, he computed carried down 300 Packs, of 100 each, 30,000, in all 50,000 Beavers, and above 9,000 Martens,

The Firs there are much more valuable than the Furs upon the Canadu Lakes, fold at. New York ; for these will give Five or Six Shillings per Bound, when the others tell at Three Shillings and Sixpence. He fays, that if a Fort was built at the Great Fork, 60 Leagues above York Fort, and a Factory with European Goods were fixed there, and a reasonable Price was put upon European Goods; that the Trade would be wonderfully increafed: For the Natives from the Southward of Pachegoia could make, at least, Two Returns in a Summer; and those at greater Distances could make One, who can't now come at all; and above double the Number would be employed in Hunting, and many more Skins would be brought to Market, that they can't now afford to bring for the Expence and low Price given for them. The Stream is fo gentle from the Fork to York Fort, on either Branch, that large Veffels and Shallops may be built there, and carry down bulky Goods, and also return again against the Stream : And the Climate is good, and fit to produce Grain, Pulse, &c. and very good Grass and Hay for Horses and Cattle. And is afterwards any Settlements were made upon Pachegoia, and Vessels built to navigate that Lake, which is not more Northerly than Lat. 52 Degrees, the Trade would be still vastly more enlarged and improved, and fpread the Trade not only up the Rivers and Lakes as far as the Lake Du Bois, and De Pluis, but also among the Affinibouels, and Nations beyond them; and the Nation de Vieux Hommes, who are 200 Leagues Westward of Pachegoia. He fays, the Nations who go up that River with Prefents, to confirm the Peace with them, are Three Months in going up; and fay, they live beyond a Range of Mountains beyond the Affinibouels; and that beyond them are Nations who have not the Use of Fire Arms; by which means, many of them are made Slaves by them, and are fold to the Affinibouels, Panis Blanc, and Christi-naux. He faw feveral of them, who all wanted a Joint of their little Finger, which they faid, was cut off foon after they were born; but gave no Reafon for it.

Whilft he was at York Fort he got acquainted with an old Indian, who lived at fome Diftance from Nelfon River, to the Weftward, being one of those they call the Home Indians, who had about 15 Years ago, gone at the Head of Thirty Warriors, to make War against the Attimospiquois, Tete Plat, or Plascotez de Chiens, a Nation living Northward on the Weftern Ocean of America: He was the only one who returned, all the rest being either killed, or perished through Fatigue, or want of Food, upon their Return. When they went, they carried their whole Families with them, and hunted and fished from Place to Place for Two Winters,
