MARTIN, Pharm. Chemist. SOUTHAMPTON, ENG.

**Keep the Records.**

Those farmers who have been keeping record of the amount of milk their cows have produced during the past two or three years are now in the best of position to know which calves should be kept for breeding purposes. A calf from a cow that yields 7,000 or 8,000 pounds of milk per year is much more valuable than one from a 5,000-pound cow. Every farmer is aware of this fact, still but a very few put themselves in position to take advantage of it. It is the man who takes advantage of every opportunity for improvement that makes a success of farming. He is the fellow who buys his neighbor's farm at what seems an enormous price, but what may be a big price to one man may be a low price to another. It all depends upon the man's ability to get returns from the soil.

**Producers' Prices Staying Up.**

Most Profitable Branch of Agriculture Being Neglected—What Co-Operative Marketing Can Do For The Farmer.

Andrew Cottingham, a farmer to whom the cackle of the hen and the early morning salute of the rooster has such an appeal that he keeps from three to four hundred of them around his farm near Brantford the whole year

Cool enjoyment

round, visited St. Lawrence market this morning to make arrangements for autumn for his poultry, says the Toronto News, of Sept. 12th, 1910.

"The people of Ontario do like nice young chicken," was a statement Mr. Cottingham made, and they are willing to pay the price for it. The market for poultry is improving all the time, but Ontario farmers seem slow to realize this, and the consequence is that the supply never exceeds the demand. On a large scale, chicken raising is one of the most profitable branches of farming in existence.

"A good hen will pay 100 per cent. on the investment and often twice as much, while it is a good cow that pays 50 per cent. on the money invested in her. Chickens, however, need attention and should be studied."

Mr. Cottingham was reluctant to give an opinion as to about how much the poultry layers of Ontario would have to pay this fall for their favorite dish, but that it would be in excess of the present price of 18 cents to 25 cents a pound he felt pretty sure.

This Christmas will be a bonanza for the chicken raisers," he concluded.

There is no doubt that Mr. Cottingham is absolutely right in his statements. Poultrying is unquestionably being neglected in Ontario—is not getting the attention that its enormous profits warrant.

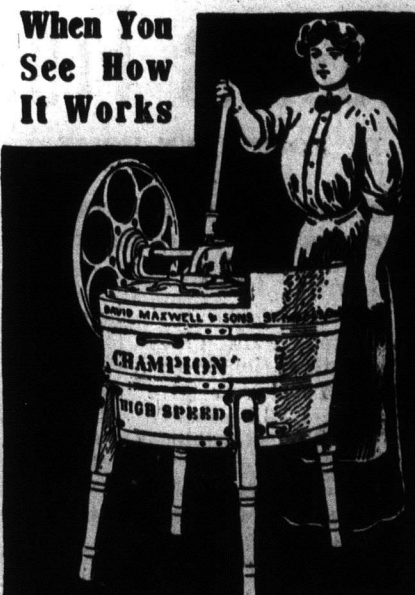

In his recent "open letter" to Ontario's Minister of Agriculture, Mr. Flavell called attention to this same state of affairs. He pointed out also that

the demand far exceeded the available supply. "Last fall," he said, "one firm in a town in Ontario took orders in the Pacific Provinces and in British Columbia for 40 car-loads of poultry, in all, 1,300,000 pounds. They were sold at prices that netted the shipper 16 cents per pound on board cars in Ontario." Again, he says: "Recently, on a visit made to the east, a wholesale dealer from Victoria, B.C., made purchases of 23 carloads of eggs (10, 350 cases of 30 dozen each) at a price approximating 24 cents per dozen, f.o.b. cars in Ontario. Winnipeg merchants during this week have been enquiring for 20 car-loads of eggs for shipment this fall. Other wholesale merchants in Winnipeg, Calgary, Vancouver and Victoria have trade calling similar supplies.

A number of his critics—practical farmers all of them—concur in one of Mr. Flavell's statements, that is, that "the farmers of this and other provinces have been diverted from poultry raising." Why? Because they were being deprived of a legitimate share of the returns for their labors. This has unquestionably had a great deal to do with the small output. The farmer does not want to produce and then have his prices forced down to where there is no profit for him. Consequently, he has simply decreased production. But the farmer would increase production tomorrow were he assured of present prices continuing—were he assured that he would not be at the mercy of

**Electric Insect Exterminator**  
The only practical dry powder sprayer—no water required. With this sprayer, one pound of Paris Green will cover an acre of potato plants. Our patented device regulates the quantity of powder and prevents waste. Machine works up, down and sideways, so every part of the plant is reached and every bug killed. Children can keep vegetables and flowers free of insects, without trouble, when you have the Electric Insect Exterminator. Illustrated catalogue of Sprayers, Seeders, Planters, Drills, Wagon Boxes, etc., sent free on application. The Eureka Planter Co., Limited, Woodstock, Ont.

**When You See How It Works**

you will want a "CHAMPION" Washing Machine right off. The Momentum Balance Wheel, which almost runs itself—the up-and-down stroke of the Lever, which means greatest power with less effort—the absolute perfection of the "CHAMPION"—will make you want one for your home. "Favorite" Churn gets all the butter out of the cream. Easy to churn, too. If your dealer does not handle these home necessities, write us. DAVID MAXWELL & SONS, - ST. MARY'S, ONT. Western Representative JOHN A. McEWAN, 603 Union Bank Bldg., Winnipeg

**Make Big Money Training Horses!**  
Prof. Beery, King of Horse Tamers and Trainers, has retired from the Arena and will teach his wonderful system to a limited number, by mail. **\$1200 to \$3000 a Year**  
At Home or Travelling  
Prof. Jesse Beery is acknowledged to be the world's master horseman. His exhibitions of taming man-killing horses, and conquering horses of all dispositions have thrilled vast audiences everywhere.
