## The Alpha Gas Engine

Doesn't need a skilled mechanic. So well built that it plugs right along like a steady well-broken horse. No worry, no bother, no tinkering.

THE ALPHA IS A GOOD ENGINE for any purpose, but because there is no mystery in either its construction or operation, it is an ideal engine for farm use.

IT ISN'T BUILT OF ROUGH castings and bolted together. It is made from the best of material, and the workmanship and design are high grade in every particular.

IT STARTS AND RUNS ON a slow speed magneto. That alone is a big item because it means you have no batteries to fuss with or get run down or out of order when you need to use your engine the most.

Eleven sizes, 2 to 28 horse-power. Each furnished in stationary, semi-portable, or portable style, and with either hopper or tank cooled cylinder.

Every farmer needs an "Alpha." Send for new catalogue.

WHEN YOU GET READY TO use an Alpha you give it a supply of gasoline or kerosene, oil it up, give it a pull, and away it goes and saws your wood, cuts your fodder, grinds your corn, pumps your water, runs your cream separator or your washing machine, or anything else that you want it to do.

IF YOU WILL INSTALL AN Alpha it won't be long before you come to the conclusion that it is the best investment you ever made, and you will wonder how you ever managed to get along without one. It's a great labor saver on the farm.
