

## A FREE BOOK —

That shows you how to make money and save labor

**T**HE hog is one of the best money-makers on the farm. Yet it is easy to lose money on hogs unless disease is prevented by cleanliness, unless parasites are controlled by sanitation, unless the feed bill is held down. These preventive measures are all accomplished by concrete improvements such as those described in our free book, "What the Farmer Can Do With Concrete." It tells, among other things, how to build a concrete feeding floor that does away with mud, disease and waste of grain. Such a feeding floor means more pork with less corn—

enables you to get 100% profit annually from your stock. Concrete feeding floors and barnyard pavements are simply several walks laid side by side. The materials necessary are "Canada Cement," sand and pebbles or broken stone. The cement can be obtained from a dealer near you—you likely have the sand and pebbles on your farm. Anyone can readily learn how to make and use concrete—our free book TELLS how, in simple, easily-understood directions.
