

THERE IS NO SECRET

In the cream-ripening business. We are perfectly willing to tell you all we know about it. The fact is, the mere know how won't do it. Unless you have proper facilities for producing the right conditions your knowledge will be useless.

WITH THE **Farrington Cream Ripener**

You can make scientific use of every bit of cream-ripening information you possess. This machine affords a perfect means of controlling the conditions under which the cream is brought to the proper churning acidity. We recommend the use of Hansen's Lactic Ferment as a starter, but the result will be satisfactory with any form of pure culture. It does not matter whether the weather is hot or cold with the Farrington, you can churn when you please with the cream at the right temperature and the right acidity. This means perfect body, perfect grain, perfect flavor, and maximum yield.

THESE ARE THE THINGS YOU WANT.
