The Test of Binder Twine

This Trade-mark is on every ball of the best twine made.

Is what it does, and what it costs to do what it does. Breakages mean expense every time you stop the binder—cost of time, men and horses, and wasted twine. How cheap is the common kind of twine when put to practical use, and what does that kind cost in the long run? These questions are important, because harvest time is short and help expensive.

We know of no stronger advocates of the many good qualities, smoothness, length, strength of

PLYMOUTH BINDER TWINE

than those farmers who have used it. That's one reason why we recommend it to you, we know that one trial will convince the most exacting farmer. PLYMOUTH is the cheapest, because it is the best.

The Wortman & Ward Co.'s Hay Fork Outfits

have been in the market for upwards of 25 years and have always been in the lead. There are many thousands in use in Canada, and they are known from the Atlantic to the Pacific as reliable in every respect. Hundreds of them bought 20 to 25 years ago and are still doing as good service as when first bought. There are forks that are lower in price, but if an extra investment of only a few dollars will secure a rig that will last a lifetime, the extra expenditure is certainly in the interests of economy. Agents located in all the principal towns. Others wanted. Send for booklet with full particulars to
