Long distance 'phone. **L. E. MORGAN, Milliken P.O., Co. of York.**

Desiccated Eggs.
 Publication has been given to a process devised in Melbourne, but carried out in Sydney, for desiccating eggs. For this process, high claims have been made, and J. S. Larke, Canada's alert Commercial Agent in Australasia, transmits an account of it in his regular report to the Department of Trade and Commerce. It has been thus described:

"Desiccated eggs are not substitutes for eggs, but newly-laid eggs treated by a process by which only the shell and water contents of the egg are removed, and the whole substance of the egg, yolk and albumen converted into powder. The eggs first pass through a dark room, being carried on a perforated rolling table over a 50-candle-power light. Any eggs not perfectly fresh, or dirty in any way, are at once detected and put on one side. The sound eggs are carried along, and go into a centrifugal separator, revolving at a tremendous rate. Here the eggs are smashed, and the shells separated from the liquid matter, which flows into a small tank, and is then pumped up to another tank, where a preservative is added. Below this tank, in a very hot room, with a temperature of 120 to 130 degrees, there are great cylinders, or drums, slowly revolving at the rate of 1 to 2½ minutes. The liquid-egg substance goes from the tank into troughs below these cylinders, and, as they revolve, become attached to them. By the time a cylinder has completed its revolution, the coating has dried, and a further coating adheres. Ultimately this coating comes off in flaky pieces, which are ground into a powder. This powder will, it is claimed to have been proved, keep for years, and only requires the addition of milk or water, when the powdered eggs will reconstitute, and be ready for use for any purpose, the same as a newly-laid egg. The powder is rich and attractive looking, and is reported, by the government analysts of New South Wales and Victoria, to contain no chemical preservative. No part of the egg, except the water, has been removed.

"In all probability," adds Mr. Larke, "an account of this process will reach Canada. There is no question that if it were perfect, as the newspapers state, it would be of great value in Canada as in Australia. It must, however, be added, that the process is not yet perfected. The inventor has some difficulties still to overcome before it can be a commercial success; one of which is the reduction of the dried egg to powder. It is hoped that this and other obstacles to success will shortly be overcome. If so, the appliance should receive consideration in Canada, where a cheap process of preserving eggs would be most useful."

MEN, BE MANLY

Do Not Let Physical Weakness Mar Your Life.

YOUNG MEN men young in years but aged in experience, aged in vitality, wan-featured, dull-eyed, slow-minded young men, young men who have in a few short years thrown away the precious vigor of youth, young men who have scarcely stepped upon the pinnacle of manhood and find that they have lost their right to stand upon it, young men who look back a few years and see themselves as they were, blooming into manhood, and now, as they are, at the age when manhood should be complete, the heart strong, the eye bright, they find the force of manhood gone. Middle-aged men and old men, who realize that they have not the force of vitality that should be theirs—men of any age who are lacking in animal vitality—can be made new by Dr. McLaughlin's Electric Belt. It will not fail. It cannot fail, as it infuses into the weakened parts the force of life and strength—the force which is the origin of all vital power, Electricity.

DR. McLAUGHLIN'S ELECTRIC BELT

The grandest invention of the age for weak men; the surest and easiest cure for all nervous and chronic diseases. Its wonderful power is directed to the seat of the nervous system, through which its vitalizing strength penetrates into all parts of the body, carrying new life to every function which has been weakened by excesses or dissipation, restoring energy to the brain, and power to the vital organs. No weak man, no sickly or delicate woman will ever regret a fair trial of the Dr. McLaughlin Electric Belt, which is nature's restorer of vitality. It will cure every case of Rheumatism, Nervous Debility, Weak Stomach, Kidney and Liver Troubles, Lamé Back, Sciatica, Varicocele, loss of Vitality, and all Weaknesses in Men and Women.

READ WHAT THE CURED SAY:

Dr. McLaughlin: Milltown, N. B., Dec. 16th, 1907.
 Dear Sir,—Have been wearing Belt for about two weeks, and now report improvement. I was almost intoxicated first application of the Belt. Slept eight hours first night of it, and eleven the second, and sleep normal since. Have now one and sometimes two bowel movements daily. Appetite is sharper. Much less irritation at bladder. Rheumatism almost gone; feel it only very slightly on exposure to bad weather. **ALEX. CLENDENNING.**

Dr. McLaughlin: Care of McFadden & Malloy, Camp No. 4, Webbwood, Ont., Dec. 13th, 1907.
 Dear Sir,—It is now high time that I should report to you. I must say that I feel like a new man since I began the use of your Belt. My sore back has not troubled me since the first time that I buckled my Belt around my waist, and my appetite is very good. **HUGH McCULLOCH.**

I can send you one from your own town if you will drop me a card. I don't ask anyone to buy my Belt on speculation. I know that it will cure any case of Rheumatism, Varicocele, Indigestion, Constipation, or any weakness caused by ignoring the laws of nature, Lamé Back, Sciatica, Kidney Disease that has not gone as far as Bright's Disease. I am willing to take all chances. All I ask is for you to give me reasonable security that I will get my pay when you are cured, and I will arrange a Belt with all necessary attachments suitable for your case, and send it to you, and you can

PAY WHEN CURED.

Split-log Drag Competition.

We are in receipt of your handsome Christmas number, containing the results of the split-log-drag competition. We wish to thank Mr. McLean and "The Farmer's Advocate" for awarding us first prize. We gave our piece of road our best efforts, and are glad to think it was considered worthy of first place. However, we wish to call your attention to a slight error in print. You have the initials of the name W. A., which should be W. S. Wishing "The Farmer's Advocate" a Happy and Prosperous New Year. **W. S. McIlquham.**
 Perth Co., Ont.

Two young ladies on the promenade of a seaside resort had been watching the vessels pass, through a telescope lent them by an "ancient mariner." On handing the glass back, one of them remarked that it was a very good one. "Yes, miss," said the old tar; "that ere telescope was given me by Lord Nelson." "Good gracious! Why Nelson has been dead nearly a hundred years." "Well, I'm blowed," remarked the salty one, quite abashed; "ow the time do fly."

The Father.—What is that book you are reading, my son?
 The Son.—It's a story of a man who invested his money in a Western gold mine and lost every cent of it.
 The Father.—O, that's all right, my boy. I was afraid you'd got a hold of a work of fiction!
