Help Us Give Even Better Telephone Service

Many complaints that you do not hear when you telephone, or that others do not hear you, are possibly due to improper methods of speaking into the mouthpiece.

Engineers, after exhaustive tests, have made the following conclusions:

"The best results are obtained when the lips are very close to the telephone. Removing the lips from the telephone has the same effect as lengthening the line then in use.

"For instance, one inch away lengthens the line six miles. You have to speak one-third louder for the party listening to hear you than if your lips were close to the telephone. With your lips two inches away from the telephone, the line is lengthened ten miles; three inches, 16 miles; four inches, 18 miles."

You can readily see how care in this matter will make telephoning easier and more satisfactory.
