THE BT LITTER CARRIER

has splendid features not found on other makes, that are well worth noting. Its construction is simpler than any other. Its parts are stronger and more heavily built. Only the best of materials are allowed to enter into the construction of the BT Carrier. In lifting we use double purchase. The bucket can be tipped either way to discharge and can be wound up three inches closer to the track than any other carrier. The windlass shaft is made of cold rolled steel, no gas pipe being used in the construction of the BT. The above are only a few of the points that have made the BT Litter Carrier so popular and if you will let us send you a copy of our new catalogue you will learn a great many more. It is free and will interest you.

WRITE TO-DAY, TO
BEATTY BROS. BOX 1215, BRANDON, MAN.
