There Was a Lively Movement in Deer Parks This Week.

THEY'RE RISING RAPIDLY

Good Silver and Lead Values in the by experts and many efforts were made | The government trail up the South | There Was a Flurry in Virginias and It Rose as High as 94 Cents-Iron Masks Sinmped From 98 to 90 Cents -Monte Christos Are Spasmodic.

> There have been some flurries in the stock market during the past week and sale of the Centre Star (which is just now bearing its legitimate fruit of strengthening the standards), the new strikes that are being made and the generally bright mining outlook. A large number of investors who have taken their profit out of the higher priced market. The number of investors and speculators in the shares of the camp is growing, and the expansion will surpass in a year or two the most sanguine expectations of the hopeful. It is a form with their money. If a man purchases shares he can keep them as long as he would be the case with real estate on which taxes must be paid whether in-

come yielding or not. By far the largest movement of the week was in Deer Parks. These shares are being purchased in large blocks in Toronto, where the head office of the company is located. The shares were 18½ early in the week and on Friday they rose to 21 cents, and last night they were firm at that figure. The announcement that was made by H. G. Scott, Q. C., of Toronto, one of the directors of the company, that a seven-drill compressor was to be immediately installed at the mine and the further fact that he was so pleased with the looks of the property that he had, while, here, increased his holdings of stock doubtless had something to do with the advance in the price. The excellent condition in velopment will te much more rapid when machinery is installed, has also increased public confidence so greatly Parke will go to 25 cents within a very

There was quite a flurry in Virginias

during the week, and the prices ranged from 83 to 94 cents. They were firm at the last figure yesterday. These shares went up and down for the last month. ranging from 83 cents to \$1.05. The cause of the frequent declines is that so many desire to unload when the price of the shares reaches the vicinity of the \$1 mark. It is thought there will be noexception to this in the present instance. There was a slump in Iron Masks during the week. They fell from 98 to 90 cents. This decline is due to the failure of the Spokane syndicate to sell to the Gooderham syndicate as anticipated. It is an open secret that the Spokane syndicate offered to dispose of interests on the basis of \$625,000 for the entire property. Negotiations are still in progress on the part of both syndicates, but sofar no agreement has been arrived at. Insiders say that the price asked is conthat the Gooderham syndicate is picking News comes from Butte, Montana, to up blocks of Iron Masks here and there the effect that F. A. cents. Good reports continue to come

from the properties of the company.

IN HARD LUCK. A Train Breaks Into the Building and

Inflicts Considerable Damage. The Columbia & Western Railway company seems to be in hard luck late-Monday it lost eight ore cars which broke away at the War Eagle and jumped the track near the Lion brewery. Early Tuesday morning a train which was switching at the station on St. Paul street backed a freight car squarely into the building and did no little damage to the office. There is a switch on the north side of the station leading past the freight shed. The end of the switch runs up to the side of the ticket office and is marked by a big mass of timbering to prevent the cars running into the building. Yesterday morning, however, club have decided to hold a club tourna- the bulkhead failed to stand up under
