ld at thirty old at young at sixty

Some men are young at sixty; others are old at thirty. Which will you be? It depends largely on how you eat.

"Old-age diseases have increased 100 per cent in thirty years,"-so say health statistics. Here is a dire indictment of extravagance in eating.

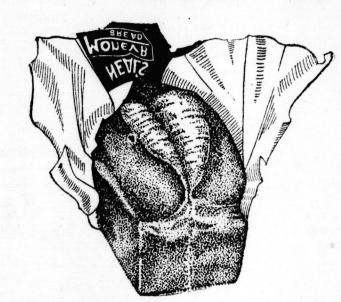

To sustain health the body must be nourished with plenty of simple food, free from poisonous wastes. That food is Bread.

Too rich foods, if persisted in, result in premature decay of tissue, breakdown and old age. Finally the scrap-heap.

Prolong your youth and joy of living. Stop at your grocer's for a loaf of GOOD BREAD today.
