NO CARE FOR THE POLICE.

The Outrageous State of Police Head quarters-An Inconvenient Building. Notwithstanding that the building use as above was condemned, and the city ac tually indicted for harboring a nuisance more than a year ago, yet no steps have been taken to remedy this state of things, and if the season be allowed to pass away, during which a proper building could be

put up, the nuisance will have to drag its weary way through another winter inflicting ill-health and even death, not only on some of the guardians of our peace, who certainly deserve more consideration at the hands of the city fathers, but upon all who may be compelled to pass any time in

with robbing John Brydes, the jury re-turned a verdict of acquittal. Two previence of opinion as to the magnitude of the nuisance, and no patching up can possibly ous convictions were put in against the mend matters, nor if torn down would the site be at all fitted or adequate for a new

building as there is not space enough. The cells for prisoners must necessarily be on the ground floor, and no offices or Marche.

rooms must be placed over the cells. The police court and chief offices should also be on the ground floor. At present the cells are placed in the basement of the building and the result is that the atmos

building and the result is that the atmos-phere of the rooms above are rendered at once impure and unwholesome, in fact the stench during the winter months and in wet weather, when the doors and windows have to be closed, is simply enough to knock one down. Besides this it is a mat-ter of almost impossibility to take up and down long flights of stairs a drunken or powerfal obstreperous man or woman, and then the chances of escape are numerous and hard to guard against, owing to the mode in which the building is laid out, having three entrances and staircases all open during the day, so that in the case of a prisoner being taken in at night even, he has first to be taken down stairs and he has first to be taken down stairs an placed in the cells below safely, then in the morning has to be brought up two pair of stairs through long passage ways, afterwards placed in the "cage" on the second floor until his turn comes before the magistrate, thence he is taken into court, and after examination has to be again taken down stairs, again placed in

"The Little World."

A visit to the exposition would be incomplete without an inspection of Mr. W. H. . Robertson's working world in miniature, which occupies a prominent position in a pavilion near the railway entrance. The "Little World" is the result of twenty years' effort, and the ingenious mechanic who has embodied his ideas in the wonderwho has embodied his ideas in the wonder-ful combination is now reaping the reward of his labor. The attraction is so great that hundreds yesterday were unable to gain admittance, and all who entered were unanimous in their praise. At San Fran-cisco recently over 40,000 visited Mr. Robertson's great curicity, and he is sure cisco recently over 40,000 viniced with Robertson's great curiosity, and he is sure of generous patronage wherever he pitches his tent. An American exchange says of the Little World: "A sensation has often been made by the discovery of something new, but nothing in the exhibition line has over caused so much excitement as 'The Little World.'". Mr. Robertson got a splendid advertisement on Sunday evening. when one of the most popular preachers of this city used "The Little World" to wel lustrate a point in his sermon. Be sure and see this, the great attraction of the
