Young People's Meeting, Friday evening at 7.30.
Strangers and visitors welcomed to all services.

In connection with the above list of Church Services, the Ministers suggest that as much notice as possible should be given of Marriages and Funerals, and that the hour should not be fixed until the Minister concerned has been consulted. Also that Funerals should not take place on Sundays unless there be most urgent cause.

WHEN APPETITE FAILS

It is because your food does not digest properly. Your stomach, liver and bowels need strengthening. Don't neglect the danger-signal.

TAKE MOTHER'S SEIGEL'S SYRUP

NEURALGIA.

Hon. Mr. Lemieux to Go to Japan

OTTAWA, October 11.—The government has about completed the statement which Hon. Mr. Lemieux is to carry with him to Japan. Mr. Lemieux hopes to persuade the country to release Canada from the obligation entered into eight months ago for the free admission of Japanese immigrants. The postmaster-general realizes that it is a humiliating task to beg release from so recent an engagement, and requires to have the argument carefully prepared for him. Mr. Lemieux will not start for a week.

JOSEPH POPE GOES WITH THE MINISTER.
He will not be accompanied by MacKenzie King but by Joseph Pope, C.P.G., under secretary of state, himself a skilful diplomatist. Mr. Pope has the additional qualification that he acted as guide and friend of Prince Fushimi when that nobleman visited Canada. For these attentions he was decorated with the order of the Rising Sun. MacKenzie King has been commissioned to proceed to Vancouver, and assess the damages inflicted on the Japanese by the August riot. It seems that no definite claim has yet been filed, though direct claims are understood to be \$4,500. There is reason to believe that indirect or consequential damages amounting to several times that sum will be claimed later on.

To check a cold quickly, get from your druggist some little Candy Cough Tablets called Preventives. Druggists everywhere are now dispensing Preventives, for they are not only safe, but decidedly certain and prompt. Preventives contain no Quinine, no Bismuth, nothing harsh nor sickening. Taken at the "onset stage," Preventives will prevent Pneumonia, Bronchitis, La Grippe, etc. Hence the name, Preventives. Good for feverish children. 45 Preventives, 25 cents. Trial boxes 5 cents. Sold by Royal Pharmacy.

A PLEA FOR OATMEAL.
Dr. Chalmers Watson, the author of numerous studies of dietetic problems, writes in "The Hospital": "Oatmeal, what is termed in Scotland 'use it or lose it' is apt to be looked upon as an insufficient defence even for a well-established and generally recognized food habit. Justification must be provided by the chemical and physiological laboratory. Upon evidence so obtained Dr. Watson found a suggestion that a large measure of the food value of oatmeal is due to its capacity to stimulate the activity of the thyroid gland. After feeding a number of young rats for four to eight weeks on a diet of uncooked oatmeal and water, an autopsy revealed in each instance considerable enlargement of the thyroid, together with evidences of increased glandular activity. The observation was made all the more striking by the absence of any such changes in a bread-and-milk diet. The suggestion now is that it is by stimulation of the thyroid that porridge produces the excellent results which it can claim as a food for children. Turning to the practical side Dr. Watson makes one or two detailed proposals for the use of oatmeal. He approves of its use at breakfast in the form of porridge and milk and advises that the meal be completed by a glass of milk and some bread and butter, and shall not include bacon or any form of meat. If meat is introduced it tends to induce a distaste for the less appetizing porridge, which sooner or later, therefore, is neglected. Rats, equally with children, it seems, display this same dietetic perversity: they will not eat oatmeal or bread when meat is available. As porridge does not encourage the use of the muscles of mastication, children should also receive a supply of crusted bread, rusks, etc., and these should be taken 'dry' and not washed down with fluid. Lastly, it is necessary to recognize that some adults can not digest oatmeal. Food value and digestibility are not one and the same thing, and the public ignorance of this fact is responsible for many misconceptions."

CARE OF LINOLEUM.
Linoleum, while not an inexpensive floor covering, is a very neat and durable one.
Good linoleum, properly cared for, should wear at least five years on a kitchen or dining room floor, provided of course that the usage is not extremely hard.
In cleaning this floor covering the fact should be borne in mind that the dirt is only on the smooth varnished surface and needs no scrubbing with soap or other strong agent to remove it.
Wiping with flannel wrung from warm water or half water and half milk, will remove all germs. A mop is not good for wiping floors unless a cloth is used to wipe the baseboard and mopping after the mopping. If this is not done, the wood soon becomes streaked and dirty. A good furniture polish applied twice a year will be beneficial to the linoleum.

A THOUGHT.
A great many people drift through life without aim or effort. They float along avoiding all obstacles and shrinking from anything that looks like hard work. Their great desire is to get "an easy job."
They do not concern themselves at all as to whether or not there is any prospect of advancement in it, whether it offers any opportunity for self development or not, or whether it is a stumbling block instead of a stepping stone to their future welfare. This policy leads to but one thing—failure.

MINARD'S LINIMENT RELIEVES NEURALGIA.

A SHEAF OF DELIGHTFUL MEMORIES.

(From the Yarmouth Herald.)
Mr. Editor:—On Monday morning I was invited to visit the beautiful church that I might see the beautiful windows and listen to some music. The singer appeared to be quite a young girl, and as she began her first selection, which was very familiar to me ("I Heard the Voice of Jesus Say"), there was an momentary touch of disappointment at her apparent nervousness and the seeming inequality between the acoustics of the chancel and the vocal volume.
Very soon this feeling vanished in a thrill of pleasure as I listened to a very fresh voice, which had been developed by an excellent method. The next, "I Extol Thee, O Lord," decided me that the young woman was probably an oratorio singer. I left the church for a few minutes to deliver a message, and returning took a seat near the door. She was just beginning an aria from "The Messiah," "Rejoice, Rejoice, Rejoice Greatly, O Daughter of Zion."
The voice rippled over the melody, taking the higher notes with the precision and freedom which come only from good breath control and knowledge of tone production. Every word was distinct, and our Mother-tongue being (of all language we are likely to hear on the concert stage) the most difficult in which to sing well, one could appreciate the value of thorough training in this respect.
The soprano aria, "Come unto Me all ye that labour, and I will give you rest," was rendered with both taste and religious feeling.
I could not remain longer, but am convinced that I heard a voice of much promise, which has been developed thus far on good lines. With pleasure and surprise I learned that Miss Gladys McMillan is a resident of Newton Centre, Mass., formerly of Bear River, Digby Co., and is studying here.
Much refreshment for soul, mind and body has been gathered in this beautiful haven. With the hope of returning another summer, I am bearing with me a sheaf of delightful memories.

None of these will abide longer, nor recur more often than the vision of a young girl, in white, standing in the dim chancel, the warm autumn sunbeams streaming through the "angel windows," and that voice ringing sweetly down the quiet arches. Indeed the message of joy, peace and rest to all the toilers, travellers and wanderers of the world.
A BIRD OF PASSAGE.
Because you have contracted ordinary colds and recovered from them without treatment of any kind, do not for a moment imagine that colds are not dangerous. Everyone knows that pneumonia and chronic catarrh have their origin in a common cold. Consumption is not caused by a cold, but the cold prepares the system for the reception and development of the germs that would not otherwise have found lodgment. It is the same with all infectious diseases. Diphtheria, scarlet fever, measles and whooping cough are much more likely to be contracted when the child has a cold. You will see from this that more real danger lurks in a cold than in any other of the common ailments. The easiest and quickest way to cure a cold is to take Chamberlain's Cough Remedy. The many remarkable cures effected by this preparation have made it a staple article of trade. For sale by W. A. Warren, Elm St.

Cough Caution
Never, positively never poison your lungs. If you cough—even from a simple cold—your lungs are always weak, and you should always keep them strong. Don't blindly suppress it with a stifling poison. It's strange how soon illness finally comes about. For twenty years Dr. Shoop has constantly warned people not to take such mixtures or prescriptions containing Opium, Chloroform or similar poisons. And now, little late though—Gouras says. But on the other hand, if you get a "Cough Cure" (Dr. Shoop's) and others, should insist on having Dr. Shoop's label—and none in the medicine, else it must be law be on the label. It is the only safe rule. It is said to be by those who know it best, a truly remarkable cough remedy. Take to enhance them, particularly with your children. Insist on having Dr. Shoop's Cough Cure. Compare carefully the Dr. Shoop package with others and note the difference. No poison marks them! You can always be on the safe side by demanding

Dr. Shoop's Cough Cure
ROYAL PHARMACY.

MOONEY'S PERFECTION Cream Sodas

5 or 500 or 5,000,000

—They are all alike.
