

(6) No person shall be obliged to have his fruit inspected, but, if he desires the benefits of the higher prices which will be eventually secured by the inspector's brand, he will be expected to pay a fee of at least one cent per barrel for each barrel branded by the inspector.

(7) On account of some lots going by Suspension Bridge and New York to Great Britain, and other lots going to Chicago, the inspector should have, as soon as practicable, one or two trained assistants in Western Ontario during the apple season, ready to go when called upon, to any station for the inspection of carlots of apples which are ready for shipment.

(8) The inspector may make arrangements, wherever practicable, to do the work of inspection at railway stations where apples are being loaded, providing a certain number of car-loads are in readiness.

(9) The inspector shall also make it his business to see that all lots of apples branded by him are properly named as well as graded.

(10) The inspector shall take especial care to make known to growers generally his address, and business, and also to give them a full description of the proper methods of packing and grading as to the No. 1 or the No. 2 brand.

(11) Grade No. 1 shall consist of well-grown samples of the variety named, somewhat uniform in size, well-shaped, of normal color, free from scab, worm holes, curculio knots, etc.

(12) Grade No. 2 shall consist also of apples free from scab and worm holes, but which, for lack of uniformity in size, deficiency in color, abnormal shape, or for any other reason, are considered by the inspector unfit to be graded No. 1.

(13) In addition to the ordinary grades No. 1 and No. 2, the inspector may use his judgment in the use of one or more stars, in cases of very fancy stock in his opinion having especial merit.

(14) Any inspector proven guilty of receiving compensation for his work from interested parties, and thus being in any way influenced to favor any particular shipper, shall at once forfeit his position, and be subject to a heavy fine.

(15) It might, perhaps, be well, the first season, to have little or no fee for inspection until the benefits of the work begin to be appreciated, and growers begin to find that they can sell for cash f. o. b. to distant buyers their inspected stock, on account of the confidence gained by the brand.

A CHEAP GREENHOUSE.

SIR,—In your March number you have a plan for heating a greenhouse. I send you the plan of one we made ourselves. It works very well, and costs very little. We use old gas pipes, costing only one cent a foot, a box stove for the

coil, and a barrel for water. The size of the greenhouse is 30 ft. by 16 ft. The pipes run under the beds. I send you ground plan of it, and will be pleased to answer through your journal, any questions concerning it.

Mount Clemens, Mich.
