ENGINEERING: Literature Pertaining to		Ice Troubles in Hydro-Electric Plants	693	Notes on Mining Activities . . .	761
The Filing of Engineering Literature	629	Initial Operation of Cedars Rapids Plant	742	Ontario's Mineral Production in 1913	651
How Engineers May Best Use Technical Journals	560	Installation of Transformers for Toronto Power Company . .	490	Mining in Quebec, 1913	321
ENGINEERING EDUCATION:		Kananaskis Falls Hydro-Electric Development	261	MINERALS: Production of	
Faults in		Large Hydro Development on the St. Maurice River	557	The Stripping, Quarrying and Mining of Gypsum	780
Possible Faults in Our Methods of Teaching	448	The Maximum Power Capacity of a Pipe Line	657	MINING: Efficiency in	
ENGINEERING SOCIETIES:		Power Development at Wasdell's Falls, Ont.	509	The Fundamentals of Mining Efficiency	215
Meetings of		Progress at Cedars Rapids, Quebec	138	MOTOR TRUCKS: Utility of	
American Society for Testing Materials	128	Speed Variation by a Graphical Method	566	The Greatest Practical Test for the Motor Truck	662
Canadian Electrical Association, 24th Annual Meeting in Montreal	128	The Wawaiten Falls and Sandy Falls Hydro-Electric Power Plants	202	MUNICIPAL ENGINEERING: Geological Factors in	
ENGINEERING SOCIETIES: Activities of		HYDRO-ELECTRIC POWER:		Applied Geology in Municipal Engineering	204
Reports of Committees Canadian Society of Civil Engineers	818	Equipment for		MUNICIPAL GAS SUPPLY: Installation of	
ENGINEERING: Technical Training for		A New Governor for Water Turbines	216	A Notable Submarine Gas Supply	236
A Notable Gathering of Engineering Educators	126	HYDRO-ELECTRIC POWER: Transmission of		MUNICIPAL WORK: Financing of	
Present Tendencies in Engineering Education	151	Steel Tower Transmission Lines	449	United States' Opportunity as Banker	378
EXPLOSIONS: Nature and Efficiency of		ICE: Crushing Strength of		MUNICIPAL WORK: Progress of	
Lost Pressure in Gaseous Explosions	465	The Crushing Strength of Ice . .	743	Municipal Improvements in Alberta Towns and Cities . . .	661
EXPLOSIVES: Classes of		INDUSTRIAL PLANTS: Design of		PATENTS: Filing of	
Classes of Permissible Explosives	425	Prince Rupert, B.C., Shipbuilding Plant	148	Canadian Patents Owned by German and Austrian Subjects	751
EXPLOSIVES, Fuses for		INDUSTRIAL WORKS: Construction of		PATENTS: Filing of Applications for	
New Safety and Detonating Fuse	668	Improved Building Materials . .	254	Information Respecting Patents of Invention	513
EXPLOSIVES: Production of		INDUSTRIAL WORKS: Design of		PATENTS: Suspension of	
United States' Production of Explosives	594	Economical Design of Industrial Works	190	Patents of German and Austrian Invention	589
FLOODS: Prevention of		INDUSTRY: Extent of		PIERS AND DOCKS: Construction of	
Flood Prevention	238	Industrial Situation in Germany	380	Deep Water Terminals at Halifax	229
FLUMES: Construction of		IRON AND STEEL: Corrosion of		Tide Water Activities at Halifax	745
Logging Flume Construction . . .	277	The Corrosion of Iron	416	POWER: Economical Considerations	
Timber Flume Construction . . .	148	IRON AND STEEL: Preservation of		The Cost of Power as a Factor in Locating Industries	669
FUELS: Combustion of		New Process of Rust Prevention	140	POWER: Development of	
An Alternative Method of Machine-Firing by Coal or Gas	804	IRON AND STEEL: Production of		Steam Turbine Power Plant at Kamloops, B.C.	611
FUELS: Consumption of		American Pig Iron, Rolled Iron and Steel	537	POWER DEVELOPMENT: Equipment for	
The Successful Burning of Lignite	744	Canada's Steel Industry	366	A Combined Gas and Steam Engine Unit	413
FUELS: Investigation of		Electro-Thermic Manufacture of Steel	395	POWER PRODUCTION: Costs of	
Fuel-briquetting Investigations . .	314	Germany Eliminated from the Iron and Steel Trade	525	At What Price is Power Cheap? .	572
Japan's Oil Discovery	352	South African Iron Industry . .	742	POWER; Production of	
FUELS: Production of		The Iron and Steel Situation . .	656	Flow of Steam Through Pipes	751
Investigation for Coal in Northern Canada	313	IRON AND STEEL: Testing of		The Law of Steam Power House Economy	763
Saskatchewan Lignite	718	Determination of Carbon in Iron and Steel	340	POWER: Transmission of	
HARBORS: Construction of		LAND SURVEYING: Practice of		Transmission Line Characteristics	616
Public Works on the Pacific Coast	720	A Land Survey Problem	156	Transmission Line Characteristics	533
Quay Wall at Victoria, B.C. . .	365	MILITARY ENGINEERING: Development of		POWER: Utilization of	
HARBORS: Development of		The Royal Engineers of the British Army	671	Use of Power from Irrigation Dams	756
Toronto Harbor and Waterfront Development	485	MILITARY ENGINEERING: Examples of		PUBLIC UTILITIES: Co-operation with	
HARBORS: Development of		Entrenchments and Obstacles . .	732	Public Utilities and the Public . .	805
Improvements to Navigation in and Around Montreal Harbor	801	MILITARY: Precautions		RAILWAYS: Administration of	
HYDRO-ELECTRIC POWER: Application of		Sanitation and the War	674	Thirty-third Convention, American Electric Railway Association	470
Fields for the Industrial Application of Canadian Water Powers	680	MILITARY SUPPLIES: Canadian Manufacture of		RAILWAYS: Administration of	
HYDRO-ELECTRIC POWER: Development of		Canadian Manufacture of Shrapnel Shells	728	Economics of Electric Railway Distribution	777
Bow River Hydro-Electric Plants	768	Canadian Manufacture of Shrapnel Shells	552	RAILWAYS: Construction and Maintenance of	
Large Projected Hydro-Electric Station in Norway	650	MILITARY SUPPLIES: Design of		Track Construction and Maintenance	275
The "Fall Increaser" for Low Water Falls	645	German Submarines	684		
Hydro-Electric Plant at Panama	209	MINERALS: Production of			
		Copper and the War	759
