No. 68,849. Grain Car Door. (Porte à grain de chars.)

John Clarke, Orangeville, Ontario, Canada, 29th September, 1900; 6 years. (Filed 12th September, 1900.)

Claim.—1st. In a grain car door, the combination with a door opening having a pair of keepers secured on each stile thereof, of a door carrying two sets of connected levers adapted for movement in arcs of aligned circles, the ends of the levers to engage the keepers, substantially as described. 2nd. In a grain car door, the combination with the door opening having a pair of keepers secured on each stile thereof and provided with inclined lips, of a door carrying two sets of connected levers having bevelled free ends, the levers being adapted for movement in arcs of aligned circles, the bevelled ends of the levers to engage the keepers, substantially as described. 3rd. In a grain car door, the combination with the door opening having a pair of keepers arranged on each stile thereof and provided with inclined lips, of a door carrying two sets of connected levers adapted for movement in arcs of aligned circles, the levers having bevelled ends to engage the inclined lips of the keepers, and means for holding the levers at the desired adjustment, substantially as described. 4th. In a grain car door, the combination with the door opening having a pair of keepers arranged on each stile thereof provided with inclined lips, of a door carrying two sets of connected levers adapted for movement in arcs of aligned circles, the levers having bevelled ends to engage the inclined lips of the keepers, means for holding the levers at the desired adjustment, guides secured to the car adjacent to the door opening, and runners carried by the door and engaging the guides, substantially as described.

No. 68,850. Shoe. (Chaussure.)

Andrew Osborn, Bridgewater, Massachusetts, U.S.A., 29th September, 1900; 6 years. (Filed 11th September, 1900.)

Claim.—1st. A shoe comprising a vamp, a welt, and an outer sole, the welt terminating adjacent the forward part of the shank of the shoe, and an external piece of heavy, stiff, non-pliable material extending from adjacent the end of said welt to the heel, and being secured to the outside of the vamp and outer sole, substantially as described. 2nd. A shoe having opposite combined stiffeners and

protectors secured at the shank of the shoe and extending exter nally of the vamp so as to cover and protect the latter in the region

of the shank part thereof, and extending under the heel at their rear ends and between the sole and vamp and stitched to the vamp, substantially as described.

No. 68,851. Knob. (Bouton).

Daniel W. Rand, Dubuque, Iowa, U.S.A., 29th September, 1900; 6 years. (Filed 11th September, 1900.)

Claim.—A knob attachment consisting of a split sleeve, one end of which at its adjacent edges is cut away to form a recess, and the side of which is provided with a bulged screw head seat, said sleeve being adapted to be engaged with the shank of an ordinary door knob, substantially as and for the purpose set forth.

No. 68,852. Spoon Hook for Fishing. (Hameçon de pêche.)

George H. Bacon, Burlington, Vermont, U.S.A., 29th September, 1900; 6 years. (Filed 28th August, 1900.)

extending from adjacent the end of said welt to the heel, and being secured to the outside of the vamp and outer sole, substantially as described. 2nd. A shoe having opposite combined stiffeners and the semi-circular end freely supporting the spoon and the bent end
