

Editorial Notices and Answers to Correspondents.

We have now for some time been prescribing Dr. F. B. Wheeler's "Elixir Ferri et Calcis Phosphatis Co," and we must in justice to the Doctor, state that it is quite equal to if not superior to any compound of the kind. We have used it in the first stages of Phthisis with marked benefit, as also in cases of severe Dyspepsia where everything else had failed, and in many other affections. It is a pleasant preparation, and may be taken for a long time without "palling" on the stomach.

Opinion of the Press.

From the Canada Medical and Surgical Journal.

PUBLIC HEALTH MAGAZINE. — We have received the first number of a magazine, with the above title, a periodical which is destined, we hope, to do much good in the community. Its mission is educational, and if conducted in a proper spirit so as to call the attention of the masses to all subjects bearing on the laws of health, we doubt not that it will be a success, and take rank as "an authority" in Sanitary science to which it aspires.

This journal is edited by Dr. George A. Baynes, a gentleman who has already given evidence of his devotion to Sanitary subjects by a very excellent course of popular lectures delivered by him during the past winter, as also by a brochure on the disposal of the dead, which is worth reading. We wish the periodical every success, it is very neatly gotten up, and is issued from the printing establishment of John Dougall & Son.

From the Canada Medical Record.

PUBLIC HEALTH MAGAZINE. * * * * In general appearance, it is very creditable, and the contents are interesting and instructive. The subject of sanitary science is one which is attracting, we are glad to say, a considerable amount of public attention at the present time, and it is meet that sanitary literature should emanate from the Metropolis of the Dominion. Dr. Baynes has for some time back devoted much attention to the subject of hygiene, and as editor of the new Health Magazine he has our warmest wishes for its success.

From the Sanitary Journal, Toronto.

PUBLIC HEALTH MAGAZINE. — This is a new magazine, consisting largely of reports and original papers on important sanitary subjects. The field for sanitary labor is large and demands many laborers, at Montreal it appears to need vigorous husbandry. We wish our contemporary the success it merits.

From the Daily Witness, Montreal.

The great interest which is now generally felt concerning health matters renders this a favorable time for the publication of a monthly magazine of san-
