Holloway's Pills are securities of health toull nations, of whatever clime. They have given hope, relief, and comfort to millions. In irritation and debility, generated by excesses of any kind, or in general prostration of the system, their effect is rapidly soothing, renovating and restorative. They rapidly drive from the system the morbid cause of allment, and renew in the frame its pristine animation, health, and vigour. They greatly increase the appetite, give tone to the stomach, assist the digestion, and impart elasticity to the spirits; their essence enters the cliculation and, carried through its course, exerts its cleansing power over every organ. In the lungs they affect most striking changes, converting the impure venous into pure arterial blood, by which the whole frame is recruited.
