POROUS EARTHENWARE

— OR —

TERRA COTTA

FOR Fireproof building purposes is recommended by Architects and Insurance Companies as unexcelled for protecting against fire. It is not cracked or injured by the application of heat or water. Weight is only one third that of brick. Mortar adheres to it without the use of lath. It may be nailed, sawed and worked with carpenter's tools. It takes the place of wood or brick for outer and inner walls and floors at about the same cost, ensures immunity from dampness and vermin, giving warmth in winter and coolness in summer, lowers insurance, and increases the life of the building.

Persons contemplating rebuilding old structures or erecting new, are solicited to consult their architects or write us direct in reference to this material.

FOOT-POWER MACHINERY.

CHAS. P. LEE, Carpenter and Builder, Northampton, N. S. SAYS: "I have had one of your Hand Circular Rip-Saws for about three months, and am much pleased with it. I have done the ripping for 10 houses in that time, which is over forty miles through inch boards, as high as Dutch plans. It is the best good for ripping; having rubbed all joints, and saved all strips for 100 windows."

Read the Following Letters from Builders:
ALFRED SANFORD, Lima, Ohio, says: "A few days since we had some 100 small drawers to make for a drug store; the steam power mill wanted 50 cents each for making them. With my foot-power machinery I made them, and saved 200 good wages on the job. If desired, these machines will be sold ON TRIAL. The purchaser can have ample time to test them in his own shop and on the work he wishes them to do. Descriptive Catalogue and Price List Free."
