LONDON, TUESDAY, SEPT. 10.

AGAINST THE ASIATICS.

The recent anti-Japanese disturbances at San Francisco, taken in conjunction with the subsequent uprising against Hindus at Bellingham, Wash., and the more recent outbreak against Japanese at Vancouver, indicate that this race-feeling is general along the Pacific Coast and on both sides of the International boundary line. It is against the Japanese that this feeling seems to be mainly directed, both In British Columbia and California, the Chinese being now regarded as less a menace to white labor than when they were almost the sole "yellow peril" with which these communities were confronted. The steady decrease In Chinese population, synchronizing with the rapid increase of Japanese, no says, was directly due to the banking doubt accounts for this. In 1890, the pressure, and argues that a banking Chinese population of California was 72,472, composed mainly of working and distress, must follow the outbreak males. Ten years later it had fallen of a war in which Britain was into 45,753, and there is reason to be- volved. Overwhelming would be the lieve that it has since steadily de- mischief and ruin which the first few As regards the Japanese official figures tell an altogether different tale. In 1890 there were but 1.147

showers of missiles of various kinds. and at close quarters used knives, lutely necessary. They appeared to be inspired by pride of race and to be conscious that behind them they had the might of a great nation. The failure of the local authorities to cope with the rioters has made the situation more embarrassing for this country. It will be necessary to offer some redress for the destruction of property and the insult to the national honor of Japan, more especially as an affront has been put upon a staunch ally of Great Brifull liberty to enter, travel or reside in any part of the dominions and possessions of the other contracting party, and shall enjoy full and perfect protection for their persons and property." There has been a violation of treaty rights, for which Canada cannot escape responsibility, as does the United States, by raising constitutional difficulties. It is reassuring to learn that the Dominion Government has not been indifferent to the problem created in the coast province by the recent influx of Japanese, and that negotiations have been in progress for some time between Tokio and Ottawa. The Tokio Government some years ago entered into an undertaking to limit the emigration from Japan to Canada to one emigrant for each Japanese province. Japan has kept faith, and there was no serious grievance in British Columbia until the disturbance of the sugar industry in Hawaii sent droves of Japanese coolies to this continent in search of work. It is said that Japan will undertake to control her subjects in Hawaii and put a stop to their migration to the Pacific coast. The comparatively few Japanese already in British Columbia are not a menace, and if immigration can be brought within the previous limits, the yellow peril will disap-

IF BRITAIN SHOULD BECOME IN-VOLVED IN WAR.

A matter that has of late engaged British Government, and been the subflags, they be guaranteed by the Government against losses by canture This, it is thought, would prevent dem from soaring in war time, no matter what captures may be made at in Ontario? sea by the enemy. A treasury committee has the suggestion under consideration at the present time.

Sir Robert Giffen, an acknowledged authority on the subject, discusses, in an article in the Nineteenth Century, the contingencies of Britain being involved in a naval war. He points out

war must involve other economic dan- by opponents for providing for the gers even more worth attending to and official inspection of canneries. that the American civil war-a conflict in which Britain had no part - fur-astrous and far-reaching efforts upon the latter country of the interruption of business resulting from war. That struggle had the effect of paralyzing the British cotton industry, of ruining British merchants and manufacturers, Engineer Bell, of St. Thomas, a and of throwing a vast army of British workmen out of their usual employment for a number of years. In India and other countries that were drying up. Which horn of the dilemma able to partly supply the demand for will our contemporary take? cotton resulting from the shortage in the United States there was immense speculation, while m Great Britain

THE MOROCCAN MIX-UP

French Cabinet Meet to Discuss Matter of Indemnity.

Parls, Sept. 10 .- A special meeting of the cabinet was held vesterday to consider the Moroccan situation. These conclusions were reached: First-The Moroccan Government

should be held responsible for the well as for the damages suffered as a result of the pillage or the repress-Second-The indemnities should be

fixed by an international commission. Incidentally this is France's answer to the demands of the German exporters at Casablanca, that France compensate them for the losses they sustained during the bombardment.

Germany's reply to the French note relative to the formation of a Moroccan police from French and Spanish troops says that Germany assumes that the measure proposed is that merely of a provisional character and without prejudice to the terms of the Algeciras convention. The reply of Germany calls attention to the opinion of the German representative at Tangier that the appearance of foreign police there and at other Moroccan ports now is likely to result in the mountain tribes attacking the cities, with consequent danger to the lives and property of Europeans. unless efficient military support for the police is provided.

In regard to the German claims for damages sustained at Casablanca, no difficulties, it is asserted, are likely to arise.

REFUSED REWARD

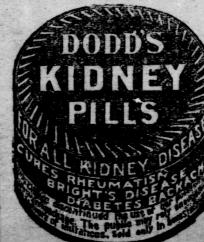

After Restoring \$200 That Convivial

Chicago, Sept. 10 .- Here's a man who not only returned \$200 which he found under his pillow on a lake steamer but refused to take a drink or a smoke or a share of the purse offered by the grateful owner. He's P. C. Atkinson, secretary of the Hyde Park department of the Chicago association. The thing occurred on a trip to Ludington, Mich., from which he has just returned. Cots had been set up in the cabin, and in some way the sleepers became mixed. Shortly after Mr. Atkinson handed over his find to the purser of the boat he was hailed by a wildly excited young

"You found my money," the stranger shouted, "come on and we'll drink all the boose on the boat."

"But I don't drink," objected the Y. M. C. A. man. "Well, come on and take a cigar."

insisted the man, who was fondling \$200
