## No Distinctive Feature Securities Securities

Trading Generally Heavy, But Tendency Favors Steadiness-La Rose Exhibits More Buoyancy.

PRICE OF SILVER.

Bar silver in London, 281/2d oz. Bar silver in New York, 51e oz. Mexican dollars, 43c.

Monday Evening, Nov. 29. The market for Cobalt mining securities continued without any distinctive feature to-day. Trading was, if anything, heavier than last week and

The market for continued without any distinctive feature to-day. Trading was, if anything, heavier than last week and stocks generally moved in a narrow ringe thruout the session.

Steadiness remains the predominant trafit of the mining issues and while considerable apartity prevails in the financial circles connected with this department of the exchanges, the floating supply of stock is being well taken care of and the shares which are being realized on continue in the main to be well placed.

La Rose, which closed on Saturday at \$4.40, opened this morning nearly 30 points higher, and tho this advance was not at times sustained, the stock displayed a much better tone than has been apparent for some time. The shares solid as high as \$4.85 for a small blot and were strong thruout, closing at \$4.77.

Crown Reserve was dull, changing and spaparently in poor demand.

Of the lower priced Cobalts, Beaver, Little Nipissing and Silver Lear remained steady with last week; Otisse sold fractionally higher; Rochester was quetter, but firm, tho in no case did the shares equal the high prices of Saturday; Chambers-Ferland opened easy, but sold up two points during the day and closed firm at 38 3-4. The other securities where dealt in were comparatively unchanged.

The market was moderately firm thruout the whole Hst. The strong thruout the was moderately firm thruout the whole Hst. The strong tone of La Rose augurs well for the future of that issue and the Co-shalts as a whole are likely to be sympathetically influenced by any buoyancy in the leaders, which has characterized dealings.

## Surely a Remarkable Letter

COBALT---La Rose Makes Further Recovery on Local Markets----COBALT

The World has been handed a remarkable letter. The letter was addressed to Mr. J. H. Waldman, President of the Waldman Mine. It was Mr. Waldman who handed the letter to The World. Mr. Waldman, as all who know him know, has done more for the true development of Cobalt within the short time he has been interested, than almost anyone else. He is naturally indignant that such a letter has been sent to him. He has nothing to conceal. His work on his Cobalt properties is well known, and can be

seen by all. It is an open book to everybody.

He asks The World to publish this letter, and The World gladly does so. He hopes that if there are any other mine owners who have received similar letters his example in this case may be emulated. Mr. Waldman is a fighter, and throws down the defi to any and every ready-letter-writer. Here is that remarkable letter:

PHONE 5269 RECTOR

SMITH'S REPORT SERVICE LONDON NEW YORK TORONTO

NEW YORK 33 BROADWAY

Nov. 23, 1909.

Mr. J. H. Waldman The waldman Exploration & Development Co.

Dear Sir:

Montreal, Canada.

We learn with regret that our Mr. Smith was unable to do business with you when in Montreal.

We hear rumors that the Waldman vein has been a failure so far at depth and that the publicity given your property is part of a campaign to enhance the value of the unsold mining claims of the Gillies Limit.

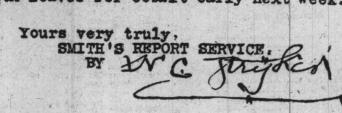

We had hoped to have been in the position through a personal visit to your property to refute these statements which if allowed to be published will detract greatly from the values of your holdings:

Before accepting your decision as final, we beg to suggest that a special illustrated article in the Twenty-five Cent December Number of the Cobalt News Bureau, written by our Mr. Smith, after a personal inspection of the Waldman Mine, would give widespread publicity to the true facts in Canada and the United States.

This would occupy three pages including the front cover page which would carry illustrations of the Waldman

Our terms for the three pages would be \$500.00 in advance, or \$1,000.00 including publicity in Buck's Weekly Cobalt Letter and the twenty-two associated publications in the United States and Canada as per the original offer made through Mr. Buck. This offer gives one additional page for reading matter in the Cobalt News Bureau.

We hope to hear from you in reply during the next few days as Mr. Smith leaves for Cobalt early next week.

The above is a photographic fac-simile of the letter to Mr. Waldman.

In the history of mining and of mineral production, the premier place is are residents in the Cobalt camp, many is quite accessible by rail and water, one of the best-known and generally at once connected to Cobalt. The silver of the old doubting school, who have values uncovered in this district within not yet awakened to the fact that they the past few years—in fact, it may be said, within the past few months—have midst—the very centre—of the great—not only amazed the ordinary individual, but, as well, have played havoc known, nor do they contemplate for with the generally accepted theories an instant the importance of the demineration of t with the generally accepted theories an instant the importance of all the cobalt camp mineralogists and geologists. To still retains beneath the surface insuch an extent is the latter statement absolutely true, that deed, the showings thus far are viewed deed, the showings thus far are viewed as the showings the s Ophir-500 at 98%.
