FURTHER WORK ON ROCKY MOUNTAIN FOREST RESERVE

Eastern Boundary Will be Located During the Summer

Department of the Interior, Forestry Branch Press Bulletin.

The boundary of the Rocky Mountain Forest Reserve has now been located from the international boundary northward to a point due west of Lacombe.

This was accomplished last summer (1910) by two parties sent out by the Dominion Forestry Service.

One of these, under G. H. Edgewood, B. Sc., B. Sc. P., started at Calgary and worked southwards, while the other, under P. Z. Caverhill, B. Sc., worked northward from the same starting point.

The full report of these examinations has just been published.

During the coming summer (1911) it is expected that the level of the eastern boundary of the reserve will be located to its northern limit (about forty or fifty miles north of the latitude of Edmonton).

Object of the Reserve. The primary aim in preserving the forests of this area is to provide a supply of timber easily accessible to the dwellers in the area, and especially at their headwaters, in this respecting stream-flow is well known.

Moreover, in order to keep up the level of the prairie reserves, the level of the rivers must be maintained, and the flow not allowed to decrease to a mere dribble in the summertime.

In the maintenance of this volume of water in the rivers the forests have an important effect.

In deciding as to what land to include in the reserve the chief question asked is, "Is it suitable for farming?"

It is, the rule has been to leave it out; if not suitable to include it, the reserve has also been an important consideration.

The boundary fixed by the order-in-council setting aside the reserve was found largely unsuitable.

CITY OF VAGABONDS IS PLANNED IN NEBRASKA

Tramps, Drunks and Delinquents Will Be Made Citizens

Object is Reclamation and Class Aiming To Be Helped Will Be Sent To "City" Instead of Jail—The Project in Detail

Lincoln, Neb., July 6.—A "City of Vagabonds," may be established by the state of Nebraska, and all tramps, drunks and delinquents of other kinds who drift into this state will be in danger of being made citizens of the new colony.

The "city" will not rob the penitentiary of any of its inmates, but it is intended to take care of this large class of unfortunate designated by professional charity workers as "below the poverty line."

The bill calls for the proposed "City of Vagabonds" is in full working order. In addition to a few farming areas there will be shops of all kinds, an iron foundry, a shoe shop, a book bindery, a tailor shop, a furniture factory, a planing mill and others.

The output of the mill and other shops will be sold to the inmates of the penitentiary, and the proceeds will be used, in great measure, by the state in the different state institutions.

THE COSTERMONGERS' BALL

"Kit," in July Canada Monthly (formerly Canada-West).

Mr. Albert Chevalier, the laureate of the costers, would have been proud to see his proteges foot it to "fiddle and lute and big bassoon" at the annual ball in Limehouse Hall in old London town.

Mr. Chevalier is travelling in America, and, moreover, has been seen in the streets of New York, where he has recognized Liza and her "Pearlie."

Hobble skirts and high-heeled golden slippers were the order of the night among the "Lizas" correct calico-hammer and white tie disguised her "Arny."

The dancers were the right among those who lined the hall were resplendent in their finery, and the night among the "Lizas" correct calico-hammer and white tie disguised her "Arny."

Tomorrow, that ancient dower with the diamond earrings and ropes of pearls who sits like a duchess in her sumptuous velvet gown, will haggle with the host of them over a bunch of carrots in the Old Kent Road—but they are kings and queens, dukes and princesses, this one night in the Kent Road.

GAS ON THE STOMACH

Relieved at Once by Father Morriarty's No. 11 Tablets.

Many people find that no matter how carefully they watch their diet and eat themselves thin, that the other favorite ailment, gas, still affords every meal gas forms in the stomach and everything seems to turn sour.

Besides causing great discomfort, this condition makes it impossible to get the full benefit from the food eaten, and the body continually starves with a full stomach.

Father Morriarty's No. 11 Tablets promptly relieve this and other stomach disorders. Each Tablet has the power of digesting a pound and three-quarters of food, and that even though the stomach may be in a very bad or weakened condition one tablet taken after each meal will insure proper digestion and prevent sourness, gas in the stomach, pain and discomfort.

The case of Miss Maggie Lecky, of West Franklin, Ont., is a sample of what Father Morriarty's No. 11 Tablets can do. Writing on Jan. 26, 1910, she says:

"You No. 11 Tablets have done me exactly as I needed. I have had better since using them. I can eat anything I like and I don't feel any gas or anything else. I can eat anything I like and I don't feel any gas or anything else."

If you have been troubled with indigestion or dyspepsia or a course of Father Morriarty's No. 11 Tablets will soon put your stomach on a healthy condition again.

LITTLE SCHOONER CUD DOWN BY EVOLUTION IN FOG OFF DIGBY

Digby, N. S., July 5.—One of the worst collisions which has occurred in Digby waters for years took place off Light House Point, at the entrance of Digby Gut, about 7 o'clock this morning during a dense fog, when the big coasting schooner Evolution, Captain Baird, bound for St. John, struck the little schooner Cora Gertie, Captain M. G. Crocker, bound out under power from Digby for Freeport.

Both captains claim they were properly sounding their fog alarms, but it appears that neither heard the other. Captain Crocker, when interviewed by your correspondent, said he was blowing his air-whistle every minute and had a man keeping a close lookout forward, when suddenly a big job boom appeared right ahead, and he put his wheel hard over and yelled to the other vessel to do the same.

The Evolution struck the Cora Gertie near the main rigging, carrying away the latter's main mast, main boom, pilot house, bracing station and in fact cutting the new schooner down to the water's edge.

Captain Crocker's son, Earl, was thrown overboard, but was fortunately rescued by the Cora Gertie's crew. It is believed that the Evolution, which was anchored in Turner's Bay, was almost damaged. The Cora Gertie, after Captain Crocker and crew got his wreckage somewhat cleared up, including the cutting of the lines, which were in the propeller, returned to Digby and docked in the Recreative.

The Evolution, which is 173 tons register, built from Parrabro, having been built at Spencer's Island in 1889. She was under the arrangement whereby the department of agriculture pays the freight charges, should exceed the limit fixed by the agreement, no objections will be raised by the department while the present heat continues.

EXPLAINED HIS MISTAKE. (Philadelphia Record.)

"The more I think of it the more I am convinced that I made a mistake when I married you," he exclaimed. She drew herself up proudly.

"You can undo it," she replied. "Alas! it is too late," he said. "I suppose the organist has already spent the \$10 I intended to give the minister, and the minister has excommunicated me for the 82nd hymn."
