

CLAIM FOR EXTRAS

Messrs. Walkeley, King & Casey Send Their Bill of Extras to the Council.

Conditions Upon Which They Will Hand Over the Work to the City.

Council Declines to Have Anything to Do With Johnson, the Seattle Leper.

Last evening's meeting of the council was of more than usual importance, inasmuch as the mayor submitted the proposition upon which Messrs. Walkeley, King & Casey were willing to hand over their contract to the corporation, and the contractors' bill of extras. The meeting as usual commenced with the reading of communications.

J. G. Burnett wrote regarding the action of the police magistrate in fining him \$25 for allowing his chimney to catch fire. He stated that not all people were summoned for this infraction of the by-laws, and asked for a remission of at least a portion of the fine. Ald. Marchant suggested that the matter be referred to the fire wardens, but the mayor expressed doubt as to whether a fine could be remitted when it had been imposed by the magistrate.

The matter was finally referred to the fire wardens. An invitation was received from the mayor of Nanaimo to attend the Queen's birthday celebration. The invitation was received with thanks.

R. H. Jameson, secretary of the Scottish societies, asked for permission to erect a memorial fountain in Beacon Hill park to Robert Burns. Mayor Beaven explained that at the time the Douglas monument was erected it was the wish of many to have it placed in the park, but it was found that the council did not have the power to grant permission.

The letter was referred to the park committee. The officer in charge of the Salvation Army shelter sent the annual report and thanked the council for favors. The letter was received, the council expressing their appreciation of the work done.

Dr. G. Duncan, medical health officer, forwarded to the council a letter received from Mayor Wood of Seattle, asking under what arrangements the city would accept Johnson, the Seattle leper, at the Darcy Island lazaretto. Mayor Beaven thought this was a case in which the city could assist Seattle.

Ald. Williams moved that the letter be referred to the mayor and city health officer with power to act. It was no doubt the duty of the Dominion government to take over the lazaretto, but in the meantime the council might provide for the man.

Ald. Macmillan moved that the clerk be instructed to telegraph Mayor Wood advising him to apply to the Dominion government. It was strictly a federal question, the care of lepers, and the government should have long ago taken over the lazaretto. Ald. Marchant seconded the resolution.

Ald. Partridge and Cameron thought that Seattle should care for her own leper. Ald. Cameron moved in amendment that the letter be received and Mayor Wood instructed that the leper cannot be accepted.

Ald. Glover seconded the resolution. Ald. Macmillan objected to a blunt answer being sent to the authorities of Seattle. Ald. Cameron's amendment was carried.

Andrew Shaw, poundkeeper explained that since the extension of the city limits he could not keep the streets clear of both cattle and dogs, without assistance. Ald. Humphrey agreed with the poundkeeper.

Ald. Cameron moved, seconded by Ald. Wilson, that in view of Mr. Shaw's inability to do his work, he be notified that his services be not required after the end of the month. Ald. Marchant did not think a man could be found to cover every street in the city every day and gather in every stray animal.

Ald. Macmillan and Ald. Partridge favored the system of paying the poundkeeper a percentage. The motion to dispense with Mr. Shaw's services was carried.

The following report and correspondence re waterworks contract were read: The undersigned reporting as requested upon a letter dated 23rd ult. from Messrs. Walkeley, King & Casey, contractors for the work at Beaver lake and the two reservoirs of the council thereon of the 27th April ult., beg leave to say: With regard to the first resolution, that if the finishing of the reservoirs be taken off the contractors' hands by the corporation the contractors will make a deduction from the amount of the contract sum of the price of 900 cubic yards of concrete at \$8 per cubic yard, equal to \$7,200. They also to be paid at the rate of \$1.25 per

yard for broken stone to the reservoir—a quantity of about 200 yards. With regard to the conditions attached to the granting of an extension of time to complete the work to the 30th June, 1896, as mentioned in the said resolution: Messrs. Walkeley, King & Casey, who have been authorized by the council to board and lodge where they please provided they commence work and terminate their day's labor at 6 p.m. This latter condition practically precludes any work being done at the city and obtaining employment on the work.

We have also to report that during the discussion with the contractors it transpired that they claim to have performed extra work in addition to the iron work reported by Mr. Jorgensen to have been authorized by him and the trenching and puddling at the wing of the main dam recommended and authorized by Mr. Williams and Mr. Bell, C. E. The contractors were accordingly asked to state their case in writing; the letter from Messrs. Walkeley, King & Casey is herewith enclosed, from which it transpires that they claim a sum of \$11,731.10 for extra work performed at the wings of the main dam. ROBERT BEAVER, Mayor.

"JAS. L. RAYMUR, Water Commissioner. "E. A. WILSON, "Engineer in Charge." ENCLOSURE. Victoria, B. C., May 7, 1896.

To the Mayor and Corporation of the City of Victoria: Sirs—In accordance with the request of the Mayor and Corporation of the City of Victoria, we enclose herewith two bills of extra work performed by our clients, Messrs. Walkeley, King & Casey, in connection with their present contract with the city, and a summary thereof, showing the amount of the present date to be the sum of \$13,044.75. In making out these bills, our clients have left out of account a large amount of work which they think they can legally claim as extra, but as to which they think that the corporation, in so doing, the object is to promote a speedy and amicable settlement of the matters relating to the work. If our account, as rendered, is accepted and paid, we shall make no further demand in respect of extras; but if a contest should arise, we wish it to be distinctly understood that, in that event, the rendering of the present bills is without prejudice to the right of our clients to insist upon the payment of the full amount of their claim if they shall be so advised.

BOWELL & IRVING, Solicitors for Messrs. Walkeley, King & Casey. Detailed bills for the extras claimed showed the following: TRENCHING AND PUDDLING DAM. To excavating trench at wings of main dam wall, filling and puddling same with clay—4,473 hours labor @ 25c. 1,118 hours for same @ 30c. 100 1/2 hours blacksmith at 35c. 100 hours helper at 25c. To use of boiler, engine, pump, fuel and engineers' time, etc., 20 days at \$1.07 per hour. Total \$1,107. To 15 per cent. commission \$166. Total \$1,273.

EXTRA WORK DONE UNDER CONTRACT. Price per yd. Amt. Filling, above shown on public, \$8 00 \$1,240. Excavation ditto, 50 1,041. Stonework under culverts, 4 00 4,244. Stonework on ditches, 1 00 2,266. Concrete, main dam wall, 10 00 1,456. Concrete, central embankment wall, 8 00 281. Concrete foundations, 2 00 124. Concrete chambers, 8 00 680. Stonework, 4 00 80. Brickwork, 20 00 110. Metal pipe, 10 00 110. Masonry in water, 2 00 51. Excavation rock in reservoir, 10 00 110. Excavation earth, 5 00 1,220. West corner, 50 323. By concrete not placed in division walls, 8 00 \$13,796. Total \$11,771.

Mayor Beaven explained that the recent negotiations between the corporation and the contractors. The report was then taken up clause by clause. Ald. Humphrey moved, seconded by Ald. Wilson, that the first clause be adopted. Ald. Macmillan opposed this on the ground that the contractors were charged the city \$10 a yard for concrete and they were only willing to allow \$8 for work to be taken out of their hands. He was now in favor of allowing the contractors to complete the work and let it out in court. The city would have to do that anyway.

Ald. Marchant moved that the whole matter be laid over until the next meeting of the council. Ald. Williams in seconding the motion referred to the amount of claims as the most "gally" proposition he had ever seen. The motion was adopted. The electric light committee recommended that the contract for supplying gas be awarded to the C. P. E. company, their tender being \$3.75 for lump and \$2.50 for net; and for globes to the Canada General Electric Company, and for oil to the Imperial Oil Co. Adopted.

The fire wardens recommended that \$100 be voted for repairs to the fire alarm system; that new hydrants be placed as recommended by Chief Deary; that the old Tiger fire engine, the hand engine, the old hose wagon be repaired for sale; that new wheels be placed on the chemical engine and hose wagon. The report was adopted. The street committee reported that the engineer could examine and report on the complaint about the condition of Russell street. Adopted.

Ald. Williams moved, seconded by Ald. Macmillan, that tenders be called for the city advertising for the balance of the year. Separate tenders are to be called for publishing the by-laws and notices. Ald. Marchant was in favor of giving both papers an equal share of the advertising. He moved in amendment that the matter be referred to the printing committee to report. Ald. Partridge seconded the amendment. The amendment was adopted. Ald. Humphrey was granted leave to introduce a by-law to allow electors to vote whether they have paid their taxes or otherwise. The by-law was read a first time. Ald. Partridge introduced a by-law to regulate the use of bicycles on the public streets. The council adjourned at 10:40.

CREDITORS MEETING

Proposition to Extend the Time for Payment of Mortgage on Green-Worlock Property.

Offer Made for the Shoal Bay Property Not Considered High Enough.

From Wednesdays Daily.

About one hundred of the creditors of the Green-Worlock bank were present at the meeting held in the Board of Trade room this afternoon. Mr. C. B. Redner was voted to the chair. Mr. Beaven informed those present that a proposal was received from the Crown Insurance Co., who hold a mortgage on lot 106 and 106A, block 15, Victoria, in which they offer to establish and pay the mortgage on this property. The gist of the proposal is embodied in the following resolution, moved by Mr. Kinsman and seconded by J. Coigulippe: Whereas the trustees have reported that a resolution of the creditors of this estate held on the 10th day of December, 1895, they have communicated with the mortgagees of the property known as lot 106 and 106A, block 15, Victoria, city, and that said mortgagees have consented to extend the time for payment of said mortgage for a term of five years upon a payment of the sum of \$8,000 on account of principal, and that subject to the performance of the other conditions of the mortgage and upon receiving three months' notice, or interest in lieu thereof, they will accept further installments from time to time if not less than \$1,000 each on account of and in reduction of said principal sum of \$8,000.

Resolved that the trustees be authorized to make the said payment of \$8,000 out of any moneys in their hands belonging to the estate and obtain from said mortgagees said extension of time for the said period of five years; and be it further resolved that the trustees be authorized to make the said payment of \$8,000 out of any moneys in their hands belonging to the estate and obtain from said mortgagees said extension of time for the said period of five years; and be it further resolved that the trustees be authorized to devote such portion of the moneys in hand, or which shall hereafter come to their hands, or which shall see fit, to the payment of interest upon the said mortgage, and to the payment of the principal debt of said mortgage in accordance with the terms proposed by the mortgagees.

This resolution was carried, the vote being 206 for and 29 against. Mr. Beaven stated that with the consent of the creditors the trustees had endeavored to sell what was known as the Shoal Bay property. It contains a little over 48 acres, and was valued at the time of the assignment at over \$18,000. Resolved, that the trustees be authorized to sell the said property for the sum of \$8,500, but secured to offer at the figure, Dr. Jno. A. Duncan offered \$3500 for the property, and it was for the creditors to decide whether to sell for that figure or keep it.

After considerable discussion, during which Mr. Beaven explained that the rents from the property more than paid the fixed charges against it, the creditors decided not to sell for that figure by a vote of 220 to 20.

Mr. Beaven then brought up the matter of remuneration for the trustees. He stated that the question was brought up at the meeting held last December, but nothing definite was determined. He suggested that the fairest way to settle the question was by referring it to someone whom the creditors had confidence. Such a party would examine into the books and thus come to a fair decision as to what would be suitable remuneration.

After Mr. Beaven had answered several questions asked by creditors, and had given it as his opinion that the matter could be more satisfactorily adjusted by a judge of the supreme court, Dr. Quinlan moved the following resolution: Resolved, that the question of the amount of the past and future remuneration to be paid trustees for their services in connection with the estate be referred to the Hon. Mr. Justice Drake and that he be authorized as arbitrator to determine the amount and that the trustees be authorized to retain the amount so settled for any money in their hands from time to time, and that Mr. Wootton be instructed to attend on any application to fix such remuneration as a solicitor for the creditors. The resolution was seconded by Mr. Geo. Sheldon and was carried.

STARVING WITH MONEY. A German Laborer, with \$100, Goes Hungry for Four Days.

Oakland, Cal., May 13.—Hans Adolph Meissner, a German laborer, has starved in the streets of Oakland for four days with \$100 in his pocket.

Meissner worked in the country as a farm hand until last Monday, when he quit his employer's service and came to Oakland. He carried with him a letter with money in it from Germany last week, but it had not come when he reached this city. Tuesday, however, Meissner received a letter from the general delivery and found within the enclosure a check for \$100. It was in the form of a letter of credit, and called for \$100.

From that moment until yesterday afternoon at 4 o'clock Meissner tried in vain to cash his paper, and went hungry as a result for about four days. His appearance was not altogether in his favor, and those to whom he submitted his voucher looked upon him with distrust.

How to Get a "Sunlight" Book. Send 12 "Sunlight" Soap wrappers to a Lever Bros. Ltd., 23 Scott St., Toronto, who will send post-paid a paper-bound book, 100 pages. For 6 "Lifebuoy" Soap wrappers, a similar book will be sent. This is a special opportunity to obtain good reading. Send your name and address written carefully. Remember "Sunlight" sells at six cents per wrapper, and "Lifebuoy" at 11 cents. One cent postage will bring your wrappers by leaving the ends open.

DR. TAYLOR'S ASTHMA CURES ASTHMA CURES ASTHMA CURES. For night gasping for breath for fear of suffocation. Send your name and address, we will mail you a FREE TRIAL BOOK, 165 ADELAIDE ST. TORONTO, ONT.

THE COAST CATCH

From All Reports the Coast Sealers Have Done Better Than Last Year.

All Hope for the Schooner May Belle and Her Crew is Abandoned.

When the captains of the different sealing schooners returning from the West coast are asked concerning the probable fate of the May Belle, of which nothing has been seen or heard since January last, they all answer that she is undoubtedly lost with all hands. The ill-fated schooner was probably caught in the storm which wrecked the Wanderer in San Joseph's Bay. Both schooners belong to the Victoria Sealing & Trading Co., and both went out of the straits together. The storm was one of the worst of the many which retarded the work of sealers during the season. They claim that if the schooner was wrecked on the rocks some of the wreckage would have been driven on shore and found by the Indians. The greatest sympathy is felt for Mrs. Shields, the wife of the captain, who lives in Victoria and also for the relatives of the other members of the crew, all of whom made their homes in the city. The following were the crew of the schooner: Ed. C. Shields, master, Chas. Wilson, Daniel Kosan, Alex. Walker, M. Anderson, Sam Pike. As the May Belle was on the way to the West coast for hunters when caught by the storm, she had no Indians on board.

The bark Emma F. Herriman is taking on supplies at Seattle for a cod fishing cruise in Behring Sea. She is being sent out by a company recently formed in Seattle to engage in halibut fishing, and she will probably get away to-morrow. The vessel will be absent about four months and during her absence a packing house will be erected in Seattle, capable of handling the catch on the return of the bark. It is said that the Behring Sea cod is equal to that caught on the Atlantic coast and that it always brings a good figure in the eastern market. Captain MacPhee, who has charge of the Herriman, is probably better acquainted with the cod fishing than anyone on the coast, having for four years captained the Lizzie Colby, the only vessel heretofore leaving Seattle for cod. Captain MacPhee will take with him, all told, a crew of forty men, including 24 experienced fishermen.

The ship Elwell has again broken the record for the round trip between San Francisco and Vancouver. She made her last trip in 15 days, 21 hours. The Elwell has been making good round trips for some time past. She has lowered her record on half a dozen occasions and Captain C. Ryder is now over \$900 richer. On her last round trip the Wilna made it in sixteen days, 6 hours and broke the record. Captain Ryder determined not to be beaten, and he has now set a mark that will take a long time to lower.

Last evening the sealing schooners Libbie, Captain Fred Hackett, and the Saucy Lass, Captain Martin, returned from the West Coast, the former having 502 skins and the latter 470. Judging from the catches of the schooners which have already arrived, and from reports of the catches of the remaining schooners, it is safe to assume that this year's coast catch will exceed that of last year by nearly 3000 skins.

Ottawa, May 13.—The government has awarded a handsome binocular glass to Captain J. Calle, of the Spanish steamship Cadagua, of Bilbao, for rescuing the crew of the shipwrecked schooner Annie G. O'Leary, of Halifax, on November 30, last. To the first officer a gold watch was presented, and to the other four seamen \$10.

Rotterdam, May 13.—The serious state of affairs caused by the strike of the dockers continues to-day. Livie guards, police and marines are still on duty, and in addition, the ironclad Kortenaar has arrived in order to protect shipping.

This afternoon the colliers Wellington and Connaught, belonging to R. Dunsmuir & Sons, arrived in Esquimaux harbor, where they will lay up during the summer months.

The British ship Arrammore was towed today from Port Angeles to Charminas, where she loas a lumber for Sydney, Australia.

The Northern Pacific liner Strathleven arrived in Yokohama yesterday.

THE FEDERATION OF LABOR. Permanent Organization of Two Million Workmen in Sight.

New York, May 13.—The Herald says: A long struggle toward a permanent union between the Central Labor Union and the American Federation of Labor, which together control about two million organized workmen, was taken at last night's meeting of the Central Labor Union, which is a purely local body, unattached to either, but containing unions owing allegiance to both. A letter was received by Samuel Gompers, president of the federation, asking the Central Labor Union to sink all differences and join the federation. When the letter was read Charles W. Hoadey of the Electrical Workers' Union, a Knight of Labor, warmly endorsed it. The only opponent to Mr. Gompers' proposal was the Rev. E. B. Chavis, who furnishes the style to women's clothes is now being used through men's outer coats, to give that comforting warmth and protection which will defy wind or rain equally well, and yet adds no perceptible weight.

ROYAL Baking Powder. Highest of all in leavening strength.—U.S. Government Report

A FARMER'S WIFE

TELLS A TALE OF SUFFERING AND HAPPY RELEASE.

Suffered From Rheumatism to Such an Extent That to Walk Caused the Greatest Agony—Was Also Troubled With Sick Headache and Stomach Trouble—Her Experience Will Prove Helpful to Others.

Only those who have been afflicted with rheumatism can understand or appreciate fully the agony of days of pain, and their nights are nights of sleepless misery. And when one of those who have suffered thus is released from the thrall of pain, how eager they are to let their fellow sufferers know of the means by which they secured renewed health and happiness. In such cases people who are of a retiring disposition and who have an aversion to anything that savors of notoriety cast aside their personal feeling in the matter, and freely give their experience of the good it may do others. Such a one is Mrs. Bradford, wife of Mr. John Bradford, a much respected farmer who lives near Bishop's Mills, in the adjoining county of Grenville. She says: "Early last autumn I was seized with pains in my knees and limbs. At first they were but slight, but gradually increased in severity until it was with the greatest difficulty I could move about. Liniments usually tried in such cases were restored to without the least beneficial effect. On the contrary I was continually growing worse, and at last I reached a stage where, if seated in a chair it was almost impossible for me to arise, and when on my feet my limbs were so stiff that it caused me the most excruciating pain to walk. At this juncture a neighbor who had been benefited through the use of Dr. Williams' Pink Pills advised me to give them a thorough trial, and glad to grasp at any means which promised relief, I procured a supply of Pink Pills and began their use. By the time I had used three boxes there was a decided improvement, and I could walk with less stiffness and less pain than formerly. I continued taking the Pink Pills until I had used another six boxes, when I felt myself as well as ever, and feel firmly convinced that those who will give this wonder working medicine a fair trial can soon free themselves from the thralldom of rheumatism. I can also say that it was not alone in this respect that I found the Pink Pills beneficial. I had been much troubled with a tired and languid feeling and suffered very much with sick headache, which I believed was caused by stomach troubles. All these disagreeable symptoms disappeared under the treatment of Pink Pills, and I have had no return of the trouble. Although I am now well up in years I am enjoying the best of health, and I am willing that my testimonial shall be published for the good it may bring some other sufferers.

Dr. Williams' Pink Pills strike at the root of the disease, driving it from the system and restoring the patient to health and strength. In cases of paralysis, spinal troubles, locomotor ataxia, sciatic rheumatism, erysipelas, scrofulous troubles, etc., these are superior to all other treatment. They are also a specific for the troubles which makes the lives of so many women a burden, and speedily restore the rich glow of health to sallow cheeks. Men broken down by overwork, worry or excess, will find in Pink Pills a certain cure.

Sold by all dealers or sent by mail, post paid, at 50 cents a box, or six boxes for \$2.50, by addressing the Dr. Williams' Medicine Company, Brockville, Ont., by Schenectady, N. Y. Beware of imitations and substitutes alleged to be "just as good."

Man's Advantage Over Woman. A man, fortunately for him, is not such a victim to fashion's decrees as a woman. Neatness and comfort are the main requisites, after that the rest is left to the clothing manufacturer or tailor. Extreme features of any kind are rarely a success as few men care to make themselves noticeable by any pronounced effect in their costume, and very few changes are made through different seasons in the cut and style of men's suits. But any new idea for gaining extra comfort is quickly appropriated and thus the Fibre Chambray which furnishes the style to women's clothes is now being used through men's outer coats, to give that comforting warmth and protection which will defy wind or rain equally well, and yet adds no perceptible weight.

NEW FLYING MACHINE

Prof. Langley Has the Latest Story About Mechanical Aerial Navigation.

This New Machine Has an Awkward Habit of Letting the Steam Give Out.

Washington, May 13.—The first public statement regarding the flying machine experiments conducted by Prof. Samuel P. Langley, secretary of the Smithsonian Institute, for some months past, was made yesterday.

Prof. Langley, who is a well known scientist, has been a believer for years in the eventual practical use of air machines, and for a long period has been making experiments with a device of his own invention near Occoquan, Va. Much secrecy has been attached to these trials of the aerodrome, as the machine is called, and the little that has leaked out has excited much interest among scientists throughout the world. Prof. Langley has always been very guarded about his experiments, and his statement prepared by Prof. Alexander Graham Bell, the well known inventor and published with the sanction of Prof. Langley, will therefore be of great interest to the scientific world generally.

The statement says: "Last Wednesday, May 6, I witnessed a very remarkable experiment with Prof. Langley's aerodrome on the Potomac river. It consisted of me to me that the experiment was of such historical importance that it should be made public. I should not feel at liberty to give an account of all the details, but the main facts I have Prof. Langley's consent for giving you, and they are as follows: The aerodrome, or flying machine, in question, was made of steel, driven by a steam engine. It resembles an enormous bird, soaring in the air with extreme regularity in large curves, sweeping steadily upward in a spiral path, the spirals with a diameter of perhaps one hundred yards, until it reaches the height of about one hundred feet in the air at the end of a course of about half a mile, when the steam gave out, and the propellers which had moved it stopped. Then, to my further surprise, the whole, instead of tumbling down as settled slowly and gracefully as it was possible for any bird to do, touched the water without any damage and was immediately picked out ready to be tried again. The second trial was like the first, except that the machine went in a different direction, moving in one continuous circles like a great soaring bird. At one time it seemed to be in danger, as its course carried it over a neighboring wooded promontory, but all apprehension was immediately allayed as it passed twenty-five or thirty feet above the top of the highest trees there, and ascending still further, its steam finally gave out again and it settled into the water of the river not a quarter of a mile from the point at which it arose. No one could have witnessed these experiments without being convinced of the practicability of mechanical flight."

To be free from sick headache, biliousness, constipation, etc., use Carter's Little Liver Pills. Strictly vegetable. They gently stimulate the liver and free the stomach from bile.

Hon. E. G. Prior, Controller of Inland Revenue, returned from Ottawa last evening. He was met at Vancouver by A. S. Potts, secretary of the Conservative Association.

NOT WELL. The Nanaimo Conservator of the Queen's Birthday.

Nanaimo, May 13.—The anniversary of the 25th of May celebrated with greater success than anticipated, and the surpass anything of several in Nanaimo. The evening carefully prepared by the several committees in charge. The E. & acted magnanimously towards the sports, highly appreciated by all. It is the general opinion of the members of the Union committee that they may obtain six figures of the constitution of the Nanaimo M. containing a brilliant situation from standpoint.

There were about the Conservative M. but it could by no means be a representative of the conv. This evening.
