Technical education.

In the year 1910, the Laurier Govern

rnment appointed a Commission, with Or. James Robertson as chairman, to go

forth and learn all about the subject of Technical Education in all lands where there was anything to be learned. After

mission was to draw up a report and out-line in detail the best possible plan for assisting and carrying out the most effi-

Yesterday was the grand Rejection Day There is every indication that we are in for a financial crisis similar to that of 1907, according to the happenings on the agreed Stock Exchanges of New York and alsewhers. The value of shares of even the most valuable holdings in the world, the most valuable holdings in the world, like the C. P. R., for instance, has been falling very rapidly. Banks are tighten to the control of the proposed by Parliament. The majority in the Commons rejected the Bill as amended by the most valuable and money is head to There is every indication that we are alsewhere. The value of shares of even the most valuable holdings in the world. He the C. P. R., for instance, has been falling very rapidly. Banks are tightening purse strings, and money is hard to botain generally. Under such circum. eral grant shall be apportioned among the sound the old warning, so often repeated, so seldom accepted, against extravagance in living and in doing business. Not many years ago, right here in Halifax as elsewhere, the man in business put all his attention and effort upon building up and developing that business. In many cases, if he was a merchant, he lived in apartments over his shop, lived in apartments over his shop, lived in apartments over his shop, lived in apartments to extend and enlarge of his profits to extend and enlarge visible aim of the present Federal Administration to centralize power in the hands economically, and used the spare during the profits to extend and enlarge visible aim of the present Federal Admin-bis business. This he took a pride in doing, and as a result many of the great-of the cabinet at the cost of provincial est establishments of the city were thu built up. But now a different spirit prevails and a different method obtains. There can be no mistaking the direction towards which the finger of destiny is pointing. Then comes the craze to get rich quick.
On all sides, mushroom schemes are being floated and glittering promises are held gaged to be married. - The French airman, Auguste Ber nard, and a passenger, were killed yester-day while flying at the ærodrome at Buc, floating before the vision which France. Typography, illustrations, paper and tearealladmirable, especially charm ing being the frontispiece portraitur The articles are numerous, brief and well written, the editorial being a real bright little business announcement; but when we meet the phrase, "We older girls," we raise an inquiring brow. The story called "The Ring" is interesting, moving and shows genuine constructive talent, the writer being Miss Marjorie MacKenzie "Opinions" shows real fumour. The dainty little portrait over "Personal Notices" is signed M. S. Campbell, but we really gruly took it for Minniehaba. The little lady on page 16 evidences the real artistic touch. "School Life in Germany," by Miss M. F. McL. Grant, is brief, but instructive The "Suffragette," is not given much sym-pathy by Miss Schaffner, and indeed she is not deserving of much. The article on "Pauline Johnson," the Indian poetess, is thoughtful and shows the true apprecia-tive faculty. The St. John Globe says of the moving pictures at the Academy of Music next week: pictures at the Academy of Music next week:

A moving picture programme such as has rarely, if ever, been witnessed in St. John is the attraction at the Opera House. The pictures are those of Paul J. Rainey's African Hunt, and were taken at heavy expense in the African jungle. Mr. Rainey is a Cleveland millionaire, and he, together with an expedition of 350 men, espent a year in the dark continent taking moving pictures of the animals of the jungle in their native haunts. Baboons, rhinosceri, giraffes, zebrae, lions and elephants are shown and a closer opportunity is afforded to study the African fauna than is available in the best menagerie or mological garden. The programme comprises six reels of film, and an explanatory lecture is delivered by Dr. E. N. Giover as the pictures.

Paris.

Paris, June 4. Among the passengers on the Titanio whese names were given as among those lost, was Madams Brung, a native of Bethune. Her hutband lamented her loss for a reasonable time, and then

ner loss for a resonance time, and then married another whoman.

On Tuesday M. Breuy received a letter from his first wife, saying she was very much alive, and was on her way book to Bethine. The husband became very much excited and fired four bullets at his second wife, killing her. He then committed suicide rather than take the wife who had been resoued from the Titanic.

vote reversed.
An effort will be made to get the Keefe sponsible for the sub-contracts.
Ald, Smith thought this a foolish thing to do now that the contract was awarded.
Ald, Harris moved to amend a report of the Buard of Control in reference to the Buard of Control in reference to the Ilcense fee for shooting galleries.
Controller Harris explained that the Council could not amend the report without the unanimous consent of the Board. This was obtained and the fee was fixed at from \$1 to \$15 amonth.
The jaunt to Saskatoon was next on the order paper for digussion.
Controller Scarlam did not think the city was in a position to send two delegates. Controller Scarlan did not think the city was in a position to send two delegates. It would cost about \$1,000. The Board had not been able to vote \$1,000 towards a firemen's toursament next sear, but now there was no trouble to vote that amount to two or three people on a joy trip. It would be better to spend the money in keeping down the dust on the streets. REAL ESTATE MORTGAGES owned by us

Let us get down to business and talk sense.
Controller O'Comor stated that in suggesting three delegates he had good reasons to believe that good would result. Heretofore men had gone on joy rides when buying engines or horses. In supporting Controller Hoben he did not think he was a joy rider. They had had no business together until after the election, and he now found out that Mr. Hoben was a diager after information, and he was positive he would as "minister of works" bring home much valuable information which would help the city for years to come. In reference to Mayor Bligh he would go to uphold the dignity of the City of Hallitax. In connection with Engineer Doane he could devote himself while away to the water question.

Controller Harrie, Ald, Powell and others spoke on the subject and then a motion to send only one delegate was lost by a vote of 3 to H.

A motion to send only one delegate was lost by a vote of 3 to H.

A motion to send two, carried, and then Mayor Bligh was unanimously chosen as one of them. The vote on the others, is given below:

For Controller Hoben—Ald. Parker, Hubley, Harris, Riordan, Murphy, Hines, Gastonguay, Coxe, Brown, and Controller (Counce—10.

For Engineer Doane—Ald. Smith, and Controllers Scanlan and Harris—3.

For City Solictor Bell—Ald. Pawell—1.

ARTICLE NO. 3, The next item of importance in the cost of Hard Coal after the Coal itself is the one of FREIGHTS.

There was a time when Freights on Hard Coal were lowest the beginning of the Season, and got higher as the Summer passed on. Now, they are high and firm at the opening of the Season, and increase as they formerly did on the approach of Autumn. Just as the time is long since gone by when dealers could purchase a block of 5,000 to 10,000 tons of Coal at Spring prices for late delivery, so is the time gone by when low Freights can be counted on. In late years, vessels have been known to sail from United States Ports in ballast rather than bring Coal to Provincial Ports at lower vances which is certain freights that those demanded. This question of freights is to occur after the end another one which Dealers have to consider and consider seriously when making prices for Summer and later delivery, and is another factor which helps to prevent them meeting Customers' wishes for late delivery of Hard Coal at lowest Summer prices. As an illustration of how Dealers might be caught on late deliveries at low prices, it may be instanced that between June, 1911, and February, 1912, Freights advanced more than \$1.00 per ton.
