Awarded by the Royal Humane Society, for Saving Archie Frith's Life.

A rather interesting and somewhat

A rather interesting and somewhat unusual ceremony took place in the mayor's office at City Hall on Fri-day, when J. P. Cale was presented with the Royal Humane Society's medal for bravery. This medal had been granted some time ago, but Mr. Cale has been out of the city, and later was confined to his bed through illness so that the presentation was necessarily contact dependence of the city of the

The ceremony took place at eleven o'clock, in the presence of quite a large number of people, including members of the S. P. C. A., aldermanic beard and quite a few ladies. Hon J. V. Ellis introduced the proceedings, as president of the S. P. C. A. He thanked Mayor White for the use of the room, spoke briefly on the happy nature of the event and introduced Dr.

the room, spoke briefly on the happy nature of the event and introduced Dr. A. A. Stockton, counsel of the S. P. C. A., who was to make the address of presentation. Dr. Stockton told the story of the act for which the medal had been awarded to Mr. Caie. It happened on June 4, 1901, near Flatlands, on the Restigouche. A young man named driving fell into the water and being unable to swim was in danger of being drowned. terday morning—after two days and nights in the open air—the old man made his appearance. He explained that within a short distance of his son's house he was overcome by weakness. Although conscious, he was unable to make himself heard when searchers passed within twenty feet of him. He finally gained strength enough yester-day morning to get on his feet and make his way to the house. He was opmpletely worn out. On two previous occasions Mr. Lester had experiences of the same kind. He Assaulted Charles Marr Thursday Night, but Was Prevented from Escaping and Was Tied Up. That poor little suffering martyr, Fred Goodspeed, the mention of whose rame brings tears to the eyes of many, has, for the second time since his con-finement in the creformatory, shown of the same kind. what a lovable disposition he possesses And this second exhibition has almost CARDINAL SARTO

resulted in another murder. Mayor White, whose action in trying to keep Goodspeed out of the reformatory called forth so much com-

ment, is today justified in the stand he had taken and feels that the public generally will more fully endorse his conduct.

Goodspeed Thursday night attempted to kill one of the guards in the reformatory and the failure of his plan is due solely to the fact that the guard is a strong, able-bodied man. It appears that since Goodspeed's

trial he has grown so rapidly that those who saw him as a rather small and weak boy in the court room would be surprised at the change in his ap-pearance. He is now a big, strapping fellow with lots of muscle and vigor. Since the time he attempted to escape from the reformatory he has been confined in a cell by himself and has not been allowed to mingle with the other

boys. This cell is on the second floor of the enjoying all possible comfort. He has who is one of the guards, has always endeavored to make things pleasant for the boy, has been giving him books and performing other little attentions which seemed to be much appreciated. Another sister, now 33 years old, was born blind, and was educated in the blind asylum; but he was allowed to run about as he pleased, no attempt to educate him having ever been made. Dr. Ramsay says:

"He became so familiar with the country district (a few miles from Glasgow) in which he resided that he could go about without the slightest fear; and his hearing was so acute that he knew at once if there was anything unusual on a road along which he was walking, and thus he

"Experience taught him in the sam manner to find his way about the garden in which he worked, and he learnt to pluck flowers, to arrange them in inches, and to pack them in boxes for the market, not only without the slightest difficulty, but with very great accuracy. He distinguished different blossoms partly by touch, but chiefly by smell, and by dint of asking questions he got at last to know so much about their form and color that he could arrange them in a bouquet. He
